

# Index

- American Stock Exchange, 7
- AMEX, 7
- approximate Brownian motion, 126
- arbitrage, 4, 16, 18
- arbitrage pricing, 18
- asset, 6
- at the money, 212
  
- Bachelier process, 118, 123
- Bachelier, Louis, 2, 118, 123
- Bank for International Settlements, 2
- Bernoulli, Jacob, 96
- Bernstein polynomials, 126
- Berry–Esséen theorem, 107
- binomial model
  - single period, 51
- binomial probability
  - cumulative distribution, 42
- binomial tree, 57
- birth processes, 38
- birth-and-death process, 38
- bisection search, 202
- black swans, 214
- Black, Fisher, 3, 4
- Black–Scholes
  - option pricing model, 4
- Black–Scholes equation, 185
  - boundary condition, 185
  - terminal value problem, 185
- Black–Scholes model, 3
- Black–Scholes pricing formula
  - call option, 190
  - put option, 196
- bond, 51, 56
- bounded variation, 141
- Boyle’s law, 27
  
- Brown, Robert, 118, 123
- Brownian motion, 2, 3, 39, 118, 123
  - with drift, 150
  - approximate, 126
  - continuity, 138
  - geometric, 151
  - Hausdorff dimension, 139
  - nonmonotonicity, 138
  - nowhere differentiable, 138
  - oscillation, 138
  - scaled, 150
  - zero as accumulation point, 139
  
- calculator, 3, 216
- Cauchy–Euler equation, *see also* Euler
  - equidimensional equation
- CBOE, 3, 7
- CDO, 42, 44
- Central Limit Theorem, 105, 171
  - Liapunov’s theorem, 106
  - Lindeberg’s theorem, 106
- Chaitin, G., 35
- Chebyshev’s inequality, 96
- Chicago Board Options Exchange, 7
- Chicago Board Options Exchange, 3
- coin toss, 32, 37
- collateralized debt obligation, 44
- compound Poisson process, 38
- convergence
  - in distribution, 104
  - in probability, 104
  - pointwise, 104
- Cox–Ross–Rubenstein, 59, 62
- credit-default swap, 2
- cycle of modeling, 20

- de Moivre, Abraham, 106  
degenerate probability distribution, 101  
Delta, 206  
derivative, 2, 51, 56  
difference equations, 71  
    general solution, 71  
    nonhomogeneous, 79  
diffusion equation, 116  
diffusions, 117  
Dolèan's exponential, 160  
Donsker's invariance principle, 136  
drift, 170  
dynamic hedging, 207  
dynamic portfolio, 3
- economic agents, 1  
efficient market hypothesis, 3, 179, 180  
Einstein, Albert, 2, 118, 123  
equation of state, 27  
    van der Waals, 28  
Euler equidimensional equation, 186  
Euler–Maruyama method, 150, 151  
exchanges, 2  
Existence-Uniqueness Theorem, 153  
experiment, 66  
expiry date, 6, 7
- fat tails, 172  
Federal Reserve requirement, *see also* reserve requirement  
finance, 1  
first passage probabilities, 70  
Fokker–Planck equation, 116  
forwards, 2  
Fourier series, 126  
fractal, 132  
futures, 2, 6
- Galileo Galilei, 25  
gambler's fallacy, 97  
gambler's ruin, 76  
gambling, 65  
Gamma, 207  
Gaussian processes, 38  
geometric Brownian motion, 3, 39, 151, 159, 169  
    lognormal distribution, 162
- mean, 162  
parameters, 164  
quadratic variation, 165  
ruin and victory probabilities, 165  
variance, 163
- heat equation, 184  
    initial value problem, 184  
hedge ratio, 3, 4, 14, 207  
hedging, 4, 12, 14, 208  
historical volatility, *see also* volatility,  
    historical  
hitting time, 133  
Holmes, Susan, 33  
Huygens, C., 26
- ideal gas, 27  
ideal gas law, 27  
implied volatility, *see also* volatility,  
    implied  
in the money, 212  
indicator random variable, 92  
Itô's formula, 159  
    standard Brownian motion, 159  
Itô's lemma, 159
- jump-diffusion models, 217
