Preface	xii
0 An introduction to the Texas Instruments BA II Plus	1
0.1 Choosing a calculator	1
0.2 Font convention	2
0.3 BA II Plus basics	2
0.4 Problems, Chapter 0	7
1 The growth of money	9
1.1 Introduction	9
1.2 What is interest ?	10
1.3 Accumulation and amount functions	11
1.4 Simple interest / Linear accumulation functions	15
1.5 Compound interest (The usual case!)	20
1.6 Interest in advance / The effective discount rate	25
1.7 Discount functions / The time value of money	29
1.8 Simple discount	40
1.9 Compound discount	42
1.10 Nominal rates of interest and discount	47
1.11 A friendly competition (Constant force of interest)	55
1.12 Force of interest	57
1.13 Note for those who skipped Sections (1.11) and (1.12)	60
1.14 Quoted rates for Treasury bills	61
1.15 Inflation	64
1.16 Choice of quotation base for interest rates	68
1.17 Problems, Chapter 1	70
2 Equations of value and yield rates	83
2.1 Introduction	83
2.2 Equations of value for investments involving a single deposit made under compound interest	84
2.3 Equations of value for investments with multiple contributions	86
2.4 Investment return	94
2.5 Reinvestment considerations	100
2.6 Dollar-weighted yield rates	102
2.7 Fund performance	108
2.8 Problems, Chapter 2	111

3	Annuities (annuities certain)	121
3.1	Introduction	121
3.2	Annuities - immediate	123
3.3	Annuities - due	137
3.4	Perpetuities	141
3.5	Deferred annuities and values on any date	143
3.6	Outstanding loan balances	147
3.7	Nonlevel annuities	153
3.8	Annuities with payments in geometric progression	155
3.9	Annuities with payments in arithmetic progression	158
3.10	Yield rate examples involving annuities	164
3.11	Annuity symbols for nonintegral terms	170
3.12	Annuities governed by general accumulation functions	173
3.13	The investment year method	177
3.14	Problems, Chapter 3	180
4	Annuities with different payment and conversion periods	195
4.1	Introduction	195
4.2	Level annuities with payments less frequent than each interest period	196
4.3	Level annuities with payments more frequent than each interest period	200
4.4	Annuities with payments less frequent than each interest period and payments in arithmetic progression	207
4.5	Annuities with payments more frequent than each interest pe- riod and payments in arithmetic progression	209
4.6	Continuously paying annuities	214
4.7	A yield rate example	219
4.8	Problems, Chapter 4	221
5	Loan repayment	229
5.1	Introduction	229
5.2	Amortized loans and amortization schedules	229
5.3	The Sinking Fund method	238
5.4	Amortized loans with other repayment patterns	245
5.5	Yield rate examples and replacement of capital	247
5.6	Problems, Chapter 5	255
6	Bonds	265
6.1	Introduction	265
6.2	Bond alphabet soup and the basic price formula	267
6.3	The premium-discount formula	272

6.4	Other pricing formulas for bonds	274
6.5	Bond amortization schedules	276
6.6	Valuing a bond after its date of issue	286
6.7	Selling a bond after its date of issue	292
6.8	Yield rate examples	301
6.9	Callable bonds	305
6.10	Floating-rate bonds	310
6.11	The BA II Plus calculator Bond worksheet	312
6.12	Problems, Chapter 6	317
7	Stocks and financial markets	327
7.1	Common and preferred stock	327
7.2	Brokerage accounts	331
7.3	Going long: buying stock with borrowed money	337
7.4	Selling short: selling borrowed stocks	340
7.5	Problems, Chapter 7	345
8	Arbitrage, term structure of interest rates, and derivatives	351
8.1	Introduction	351
8.2	Arbitrage	353
8.3	The term structure of interest rates	355
8.4	Loans with floating rate of interest	366
8.5	Interest rate swaps: the basics	369
8.6	Formulas for interest rate swaps	381
8.7	Market value of an interest rate swap	385
8.8	More swaps	387
8.9	Forward contracts	391
8.10	Commodity futures held until delivery	394
8.11	Offsetting positions and liquidity of futures contracts	401
8.12	Price discovery and more kinds of futures	405
8.13	Options	407
8.14	Using replicating portfolios to price options	413
8.15	Using weighted averages to price options	426
8.16	Problems, Chapter 8	433
9	Interest rate sensitivity	449
9.1	Overview	449
9.2	Duration	454
9.3	Convexity	467
9.4	Using duration to approximate price	475
9.5	Using duration and convexity to approximate price	480
9.6	Immunization	483
9.7	Other types of duration	491

x Contents

9.8 Problems, Chapter 9 495

10 Determinants of interest rates 503

10.1 Introduction 503

10.2 Supply and demand of loans 503

10.3 Default risk 506

10.4 Inflation risk 509

10.5 Banks and other financial intermediaries in the retail sector . . 516

10.6 Savings and lending interest rates in the retail sector 518

10.7 Bonds issued by governments and corporations 521

10.8 The role of central banks 526

10.9 Problems, Chapter 10 529

APPENDICES

A Some useful formulas 533

B Answers to end of chapter problems 541
