Preface	ix
1 Sequences and Limits	1
1.1 Calculus: Areas and tangents	1
Problems 1.1	7
1.2 Sequences	8
Problems 1.2	22
1.3 The sum of a sequence	24
Problems 1.3	31
1.4 Difference equations	34
Problems 1.4	40
1.5 Nonlinear difference equations	43
Problems 1.5	49
2 Functions and Their Properties	53
2.1 Functions and their graphs	53
Problems 2.1	64
2.2 Trigonometric functions	67
Problems 2.2	77
2.3 Limits and the notion of continuity	79
Problems 2.3	92
2.4 Continuous functions	94
Problems 2.4	101
2.5 Some consequences of continuity	102
Problems 2.5	109
3 Derivatives and Best Affine Approximations	111
3.1 Best affine approximations	111
Problems 3.1	119
3.2 Derivatives and rates of change	120
Problems 3.2	127
3.3 Differentiation of rational functions	130
Problems 3.3	136
3.4 Differentiation of compositions	137
Problems 3.4	144
3.5 Differentiation of trigonometric functions	146
Problems 3.5	152
3.6 Newton's method	154

Problems 3.6	159
3.7 The Mean Value Theorem	160
Problems 3.7	169
3.8 Finding maximum and minimum values	171
Problems 3.8	183
3.9 The geometry of graphs	185
Problems 3.9	192
4 Integrals	195
4.1 The definite integral	195
Problems 4.1	215
4.2 Numerical approximations	217
Problems 4.2	229
4.3 The Fundamental Theorem of Calculus	231
Problems 4.3	239
4.4 Using the Fundamental Theorem	241
Problems 4.4	249
4.5 More techniques of integration	251
Problems 4.5	256
4.6 Improper integrals	258
Problems 4.6	269
4.7 More on area	272
Problems 4.7	277
4.8 Distance, position, and length	278
Problems 4.8	286
5 Taylor Polynomials and Series	289
5.1 Polynomial approximations	289
Problems 5.1	299
5.2 Taylor's theorem	300
Problems 5.2	306
5.3 Infinite series revisited	307
Problems 5.3	315
5.4 The comparison test	316
Problems 5.4	321
5.5 The ratio test	322
Problems 5.5	325
5.6 Absolute convergence	326
Problems 5.6	330
5.7 Power series	332
Problems 5.7	340
5.8 Taylor series	342
Problems 5.8	348
5.9 Some limit calculations	349
Problems 5.9	355
6 More Transcendental Functions	357
6.1 The exponential function	357

Problems 6.1	365
6.2 The natural logarithm function	367
Problems 6.2	373
6.3 Models of growth and decay	375
Problems 6.3	383
6.4 Integration of rational functions	385
Problems 6.4	390
6.5 Inverse trigonometric functions	391
Problems 6.5	399
6.6 Trigonometric substitutions	400
Problems 6.6	408
6.7 Hyperbolic functions	409
Problems 6.7	417
7 The Complex Plane	419
7.1 The algebra of complex numbers	419
Problems 7.1	427
7.2 The calculus of complex functions	428
Problems 7.2	437
7.3 Motion in the plane	439
Problems 7.3	448
7.4 The two-body problem	451
Problems 7.4	460
8 Differential Equations	463
8.1 Numerical solutions	463
Problems 8.1	471
8.2 Separation of variables	474
Problems 8.2	480
8.3 First-order linear equations	482
Problems 8.3	486
8.4 Second-order linear equations	488
Problems 8.4	494
8.5 Pendulums and mass-spring systems	495
Problems 8.5	504
8.6 Phase planes	505
Problems 8.6	515
8.7 Power series solutions	519
Problems 8.7	527
A Answers to Selected Problems	529
A.1 Chapter 1	529
A.2 Chapter 2	531
A.3 Chapter 3	535
A.4 Chapter 4	541
A.5 Chapter 5	546
A.6 Chapter 6	551
A.7 Chapter 7	555
