

Index

- \mathbb{C} , 87
 - Arithmetic, 88
- \mathbb{R}
 - n -th roots of positives, 249
 - Archimedean property, 233
 - Bolzano-Weierstrass Theorem, 236
 - Cauchy sequences, 241
 - Closed sets, 96
 - Completeness, 227
 - Defining axioms, 231, 258
 - Greatest Lower Bound, 229, 232
 - Interval
 - Closed, 87
 - Half open, 87
 - Open, 87
 - Least Upper Bound, 227, 229, 231
 - Monotone Convergence Theorem, 234
 - Nested Interval Theorem, 238
 - Open sets, 96
- n -dimensional space, 89
- Algebraic number, 142
 - minimum polynomial, 142
- Binomial Symbol, 55
 - Formula, 56
 - Identities, 61
- Binomial Theorem, 60, 116
- Combinations, 53
- Euler, 303, 307
- Functions, 75
 - Composition, 79
 - Constant function, 78
 - Continuity, 207
 - Identity function, 79
 - Inclusion map, 79
 - Invertible, 81
 - Limits, 213
- Fundamental Counting Principle, 50
- Fundamental Theorem of Algebra, 142
- Graphs, 303
 - Bipartite Graphs, 327
 - Complete Graphs, 307, 330
 - Connected, 315
 - Connected Components, 316
 - Cut Edge, 317
 - Cut Vertex, 327
 - Cycle, 311
 - Definition, 305
 - Edges, 305
 - Lower Bound, 326
 - Finite, 306
 - Königsberg Bridge Problem, 303
 - Loops, 307
 - Multigraphs, 307
 - Path, 311
 - Regular Graphs, 330
 - Simple Graphs, 307
 - Subgraph, 313
 - Trail, 310
 - Euler Trail, 311
 - Trees, 329
 - Spanning Trees, 329
 - Vertices, 305
 - Degree, 307
 - Isolated, 307
 - Walk, 310
 - Subwalk, 311
- Groups, 261, 272
 - $GL_2(\mathbb{C})$, 275
 - Class Equation, 301
 - Cosets, 282
 - Cyclic, 276
 - Definition, 273
 - Homomorphism, 300
 - Isomorphism, 291, 292
 - Lagrange's Theorem, 282, 285
 - Order of element, 281, 286
 - Order of Subgroup, 282
 - Subgroup test, 280
 - Subgroups, 279
 - Generated by element, 281
 - Symmetric Group S_n , 270
 - Cycle Decomposition, 272
 - Symmetry, 287
 - Equilateral Triangle, 262

- Square, 266
- Heuristics, 102
- Induction, 107, 109
 - Strong form, 113
- Integers, 3
 - Mod 2, 5
 - Mod 3, 7
 - Mod n , 6, 165, 172, 173
- Klein Bottle, 161
- Möbius Strip, 159
- Mathematical Attitude, 101
- Matrices, 89–91, 275
 - Determinant, 276
- Permutations, 53
- Pigeonhole Principle, 18, 146
 - Generalized, 20
- Polya, George, 102
- Primes, 86
 - Unique Prime Factorization, 175
- Problem Solving, 101
- Proof Techniques, 103
- Recursive Definition, 114
- Schröder-Bernstein Theorem, 130
- Sequences, 198
 - Bounded, 204
 - Convergent, 201
 - Divergent, 201
 - Unbounded, 204
- Series, 217, 243
 - n -th term test, 243
 - Absolute Convergence, 245
 - Cauchy Test, 243
 - Conditional Convergence, 245
 - Geometric, 110, 218, 244
 - Harmonic, 225
 - Positive Terms, 248
 - Ratio Test, 246
 - Root Test, 246
 - Squeeze Theorem, 244
- Sets, 69
 - Cantor Set, 135
 - Cardinality, 121, 122, 126
 - \mathbb{Q} countably infinite, 128
 - \mathbb{R} uncountable, 129
 - Countable, 123
 - Countably infinite, 123
 - Finite, 122
 - Power Set, 95, 143
 - Uncountable, 123
- Closed Sets, 96
- Direct Product, 74
- Disjoint Union, 153
- Equivalence Relations, 149, 153
- Indexed Sets, 71
- Open Sets, 96
- Power Set, 74, 95, 143
- Relation, 149, 150
 - symmetric difference, 95
- Statement, 27
 - And, 35
 - Compound, 35
 - Implies, 37
 - Implies and is implied by, 41
 - Indexed by the integers, 36
 - Logically equivalent, 31
 - Logically opposite, 30
 - Negation, 30, 32
 - Or, 36
 - Truth value, 30
- Symmetry, 287
- Ternary expansion, 139
- Well-Ordering Principle, 125
- Without Loss of Generality, 243
