

# Contents

<b>Preface</b>	ix
<b>1 Analytic Functions and the Derivative</b>	1
1.1 The Complex Derivative	3
1.2 Power Series and the Extension Theorem	20
1.3 Multivalued Functions and Riemann Surfaces	44
1.4 The Cauchy-Riemann Equations and Harmonic Functions	67
1.5 Analytic Continuation	79
Notes for Chapter 1	86
<b>2 Complex Integration</b>	93
2.1 Complex Line Integrals	94
2.2 The Cauchy-Goursat Theorem	112
2.3 Cauchy's Integral Theorem	121
2.4 Top Ten Facts from Cauchy's Integral Theorem	129
Notes for Chapter 2	153
<b>3 Non-Entire Functions</b>	155
3.1 Singularities	156
3.2 Laurent Series	168
3.3 Cauchy's Residue Theorem and the Argument Principle	186
3.4 Applications of the Residue Theorem	197
Notes for Chapter 3	213
<b>4 Solving the Dirichlet Problem</b>	215
4.1 Conformal Maps	217
4.2 Solutions via Streamlines and Equipotentials	231
4.3 Solutions via Green's Functions	245
4.4 Solutions via an Integral Representation	254
Notes for Chapter 4	265
<b>5 Further Topics and Famous Discoveries</b>	269
5.1 Integral Transforms	269
5.2 Analytic Number Theory	284
5.3 The Riemann Hypothesis	293
5.4 Generalizing the Fundamental Theorem of Algebra	307
Notes for Chapter 5	323

<b>6 Linear Algebra and Operator Theory</b>	327
6.1 Bounded Linear Operators on a Hilbert Space	332
6.2 The Study of Finite-Rank Operators: Linear Algebra	350
6.3 Banach Spaces and Compact Operators	367
6.4 Open Research Questions	384
Notes for Chapter 6	389
<b>Acknowledgments and Credits</b>	395
<b>Solutions to Odd Exercises</b>	399
<b>Bibliography</b>	423
<b>Index</b>	431
