

CONTENTS

<i>Foreword</i>	vii
<i>List of Participants</i>	ix
Ernst Albrecht Small Möbius invariant function spaces on the unit ball	1
Esteban Andruchow and Gustavo Corach Curves of projections and operator inequalities	25
Cristina Benea and Camil Muscalu The helicoidal method	45
Albrecht Böttcher Four concrete applications of Toeplitz operators	97
Fadil Chabbabi and Mostafa Mbekhta Maps commuting with the λ -Aluthge transform under ω -addition	119
Sonja Currie, Marlena Nowaczyk, and Bruce A. Watson Inverse problems with a general transfer condition	131
Jireh Loreaux and Gary Weiss Traces on ideals and the commutator property	147
Gelu Popescu Free holomorphic functions on polydomains	157
Jean Renault Random walks on Bratteli diagrams	187
