

CONTENTS

<i>Introduction</i>	vii
<i>Plenary speakers of the first NEAM</i>	viii
<i>Contributed talks</i>	ix
Miron B. Bekker and Joseph A. Cima Some classical integral operators on the Hardy spaces H^p	1
Abdellatif Bourhim and Javad Mashreghi The Bohr radius	19
Joel M. Cohen, Flavia Colonna and David Singman A global right inverse of the Laplace operator on trees with a Green function	39
D. E. Edmunds and J. Lang Remarks on j -eigenfunctions	47
Liangying Jiang, Gabriel T. Prajitura and Ruhan Zhao On Korenblum's Maximum Principle for some function spaces	59
E. Liflyand The Fourier transform of a convex function revisited	81
Stamatis Pouliaxis A reverse rearrangement inequality for energy integrals	93
Víctor M. Sánchez and J.B. Seoane-Sepúlveda A brief overview on some general criteria on lineability and spaceability	101
Zhijian Wu Distance to subspaces of L_ρ^∞ and applications	107
Malik Younsi Analytic capacity : computation and related problems	121
Nina Zorboska Unitary and normal weighted composition operators on reproducing kernel Hilbert spaces of holomorphic functions	153
