

CONTENTS

<i>Foreword</i>	vii
<i>List of Participants</i>	ix
Aline Bonami, Sandrine Grellier, and Benoit Sehba An excursion around Stein's Theorem	1
M. Cristina Câmara, André Guimarães, and Jonathan R. Partington Paired operators and paired kernels	15
Guillermo P. Curbera, Susumu Okada and Werner J. Ricker The finite Hilbert transform on $(-1, 1)$	29
Mirela Kohr, Victor Nistor, and Wolfgang L. Wendland Layer potentials and essentially translation invariant pseudodifferential operators on manifolds with cylindrical ends	61
Christian Le Merdy A new approach to γ -bounded representations	117
Javad Mashreghi, Marek Ptak, and William T. Ross A decomposition theorem for unitary operators	133
Lajos Molnár A short survey of recent characterizations of central positive definite elements in C^* -algebras	151
