

Contents

Preface	iii
Program of Colloquium	viii
Relative Cartier Divisors and K-theory <i>Vivek Sadhu and Charles Weibel</i>	1
Naive vs. genuine \mathbb{A}^1 -connectedness <i>Anand Sawant</i>	21
Cellularity of hermitian K -theory and Witt-theory <i>Oliver Röndigs, Markus Spitzweck and Paul Arne Østvær</i>	35
On the η -inverted sphere <i>Oliver Röndigs</i>	41
Additive higher Chow groups and de Rham-Witt complexes <i>Jinhyun Park</i>	65
The relation between Grothendieck duality and Hochschild homology <i>Amnon Neeman</i>	91
Chow's moving lemma with modulus <i>Wataru Kai</i>	127
Multiplicative properties of the multiplicative group <i>Bruno Kahn</i>	145
Explicit Chow-Lefschetz decompositions for Kummer manifolds <i>Reza Akhtar and Roy Joshua</i>	157
Duality of integral étale motivic cohomology <i>Thomas H. Geisser</i>	197
The Vaserstein symbol on real smooth affine threefolds <i>Jean Fasel</i>	213

Strong cycles and intersection products on good moduli spaces <i>Dan Edidin and Matthew Satriano</i>	225
Orientation theory in arithmetic geometry <i>Frédéric Déglise</i>	241
Non rationalité stable d'hypersurfaces cubiques sur des corps non algébriquement clos <i>J.-L. Colliot-Thélène</i>	351
Computing topological Hochschild homology using twisted theories <i>Samik Basu</i>	371
