

Contents

Preface	vii
Chapter 1. Basic definitions	1
1.1. The Koszul complex	1
1.2. Definitions in the algebraic context	2
1.3. Minimal resolutions	4
1.4. Definitions in the geometric context	5
1.5. Functorial properties	7
1.6. Notes and comments	11
Chapter 2. Basic results	13
2.1. Kernel bundles	13
2.2. Projections and linear sections	15
2.3. Duality	20
2.4. Koszul cohomology versus usual cohomology	22
2.5. Sheaf regularity	24
2.6. Vanishing theorems	25
2.7. Notes and comments	27
Chapter 3. Syzygy schemes	29
3.1. Basic definitions	29
3.2. Koszul classes of low rank	37
3.3. The $K_{p,1}$ theorem	39
3.4. Rank-2 bundles and Koszul classes	43
3.5. The curve case	46
3.6. Notes and comments	50
Chapter 4. The conjectures of Green and Green–Lazarsfeld	53
4.1. Brill-Noether theory	53
4.2. Numerical invariants of curves	55
4.3. Statement of the conjectures	57
4.4. Generalizations of the Green conjecture	60
4.5. Notes and comments	63
Chapter 5. Koszul cohomology and the Hilbert scheme	65
5.1. Voisin’s description	65
5.2. Examples	68
5.3. Vanishing via base change	72
Chapter 6. Koszul cohomology of a $K3$ surface	75
6.1. The Serre construction, and vector bundles on $K3$ surfaces	75

6.2.	Brill-Noether theory of curves on K3 surfaces	76
6.3.	Voisin's proof of Green's generic conjecture: even genus	79
6.4.	The odd-genus case (outline)	88
6.5.	Notes and comments	90
Chapter 7.	Specific versions of the syzygy conjectures	91
7.1.	Nodal curves on $K3$ surfaces	91
7.2.	The specific Green conjecture	92
7.3.	Stable curves with extra-syzygies	95
7.4.	Curves with small Brill-Noether loci	97
7.5.	Further evidence for the Green-Lazarsfeld conjecture	100
7.6.	Exceptional curves	103
7.7.	Notes and comments	103
Chapter 8.	Applications	105
8.1.	Koszul cohomology and Hodge theory	105
8.2.	Koszul divisors of small slope on the moduli space.	111
8.3.	Slopes of fibered surfaces	115
8.4.	Notes and comments	116
