Preface	ix
Introduction	1
Chapter 1. Differential graded categories	3
1.1. Definitions	3
1.2. Quasi-equivalences	5
1.3. Drinfeld's DG quotient	11
1.4. Pretriangulated equivalences	13
1.5. Bondal-Kapranov's pretriangulated envelope	14
1.6. Morita equivalences	15
1.7. Kontsevich's smooth proper dg categories	16
Chapter 2. Additive invariants	21
2.1. Definitions	21
2.2. Examples	22
2.3. Universal additive invariant	26
2.4. Computations	29
2.5. Lefschetz's fixed point formula	32
Chapter 3. Background on pure motives	35
Chapter 4. Noncommutative pure motives	41
4.1. Noncommutative Chow motives	41
4.2. Relation with Chow motives	41
4.3. Relation with Merkurjev-Panin's motives	46
4.4. Noncommutative \otimes -nilpotent motives	47
4.5. Noncommutative homological motives	47
4.6. Noncommutative numerical motives	48
4.7. Kontsevich's noncommutative numerical motives	49
4.8. Semi-simplicity	50
4.9. Noncommutative Artin motives	52
4.10. Functoriality	53
4.11. Weil restriction	54
Chapter 5. Noncommutative (standard) conjectures	57
5.1. Standard conjecture of type C_{nc}	57
5.2. Standard conjecture of type D_{nc}	58
5.3. Noncommutative nilpotence conjecture	59
5.4. Kimura-finiteness	59
5.5. All together	60

Chapter 6. Noncommutative motivic Galois groups	63
6.1. Definitions	63
6.2. Relation with motivic Galois groups	65
6.3. Unconditional version	65
6.4. Base-change short exact sequence	66
Chapter 7. Jacobians of noncommutative Chow motives	69
Chapter 8. Localizing invariants	71
8.1. Definitions	71
8.2. Examples	72
8.3. Universal localizing invariant	73
8.4. Additivity	77
8.5. \mathbb{A}^1 -homotopy	79
8.6. Algebraic K -theory	82
8.7. Witt vectors	84
8.8. Natural transformations	85
Chapter 9. Noncommutative mixed motives	87
9.1. Definitions	87
9.2. Relation with noncommutative Chow motives	89
9.3. Weight structure	89
9.4. Relation with Morel-Voevodsky's motivic homotopy theory	90
9.5. Relation with Voevodsky's geometric mixed motives	91
9.6. Relation with Levine's mixed motives	93
9.7. Noncommutative mixed Artin motives	93
9.8. Kimura-finiteness	94
9.9. Coefficients	95
Chapter 10. Noncommutative motivic Hopf dg algebras	97
10.1. Definitions	97
10.2. Base-change short exact sequence	98
Appendix A. Grothendieck derivators	99
A.1. Definitions	99
A.2. Left Bousfield localization	101
A.3. Stabilization and spectral enrichment	102
A.4. Filtered homotopy colimits	102
A.5. Symmetric monoidal structures	103
Bibliography	105
Index	113
