

# Contents

Preface	vii
Contents of the book	ix
Chapter 1. Notation and basic tools	1
1.1. General notation	1
1.2. Topological dynamical systems, orbits, $\omega$ -limit sets	1
1.3. Intervals, interval maps	4
1.4. Chains of intervals and periodic points	7
1.5. Directed graphs	9
Chapter 2. Links between transitivity, mixing and sensitivity	11
2.1. Transitivity and mixing	11
2.2. Accessible endpoints and mixing	21
2.3. Sensitivity to initial conditions	25
Chapter 3. Periodic points	33
3.1. Specification	33
3.2. Periodic points and transitivity	36
3.3. Sharkovsky's Theorem, Sharkovsky's order and type	41
3.4. Relations between types and horseshoes	52
3.5. Types of transitive and mixing maps	55
Chapter 4. Topological entropy	57
4.1. Definitions	57
4.2. Entropy and horseshoes	59
4.3. Homoclinic points	66
4.4. Upper bounds for entropy of Lipschitz and piecewise monotone maps	73
4.5. Graph associated to a family of intervals	76
4.6. Entropy and periodic points	84
4.7. Entropy of transitive and topologically mixing maps	93
4.8. Uniformly positive entropy	105
Chapter 5. Chaos in the sense of Li-Yorke, scrambled sets	109
5.1. Definitions	109
5.2. Weakly mixing maps are Li-Yorke chaotic	111
5.3. Positive entropy maps are Li-Yorke chaotic	113
5.4. Zero entropy maps	117
5.5. One Li-Yorke pair implies chaos in the sense of Li-Yorke	131
5.6. Topological sequence entropy	133
5.7. Examples of maps of type $2^\infty$ , Li-Yorke chaotic or not	145

Chapter 6. Other notions related to Li-Yorke pairs: Generic and dense chaos, distributional chaos	155
6.1. Generic and dense chaos	155
6.2. Distributional chaos	168
Chapter 7. Chaotic subsystems	175
7.1. Subsystems chaotic in the sense of Devaney	175
7.2. Topologically mixing subsystems	177
7.3. Transitive sensitive subsystems	180
Chapter 8. Appendix: Some background in topology	191
8.1. Complement of a set, product of sets	191
8.2. Definitions in topology	191
8.3. Topology derived from the topology on $X$	194
8.4. Connectedness, intervals	195
8.5. Compactness	196
8.6. Cantor set	197
8.7. Continuous maps	199
8.8. Zorn's Lemma	201
Bibliography	203
Notation	211
Index	213
