

Index

- (p, q) condition, 113
- (p, q) property, 113
- (p, q) theorem for convex lattice sets, 137
- $(r, 2)$ -disjoint, 140
- d -intervals, 123
- d -skeleton, 18

- affine hull, 1
- algebraically independent, 21
- arc in a directed graph, 4

- bipartite graph, 4
- blown-up copy, 114
- Borsuk-Ulam theorem, 17, 68
- boundary, 2

- cap and cup, 63
- Carathéodory theorem, 9
- Carathéodory theorem, cone version, 10
- Carathéodory theorem, extra point, 10
- centrepoint theorem, 34
- chord, 35
- circuit in a graph, 4
- colourful (p, q) theorem, 119
- colourful Carathéodory theorem, 41
- colourful Carathéodory, cone version, 42
- colourful Helly theorem, 49
- colourful Helly theorem for convex lattice sets, 139
- colourful Kirchberger, 61
- colourful Tverberg theorem, 57
- complete k -partite hypergraph, 5
- complete k -uniform, 5
- complete k -uniform k -partite hypergraph, 6
- compression, 82, 110
- cone hull, 1
- connected graph, 4
- convex hull, 1
- convex lattice sets, 131
- convex position, 63
- convex set, 1
- copy of $K(k \times t)$, 6

- covering number, 77
- covering number theorem, 77, 87
- crossing, 95

- Dilworth theorem, 73
- directed cycle, 4
- directed graph, 4
- directed path, 4
- doubling algorithm, 115, 117

- edge density, 3, 5
- edge set, 3
- edges, 4
- Erdős-Szekeres theorem, 63

- fractional Helly, 39, 116
- fractional lattice Helly, 133
- fractional matching number, 4
- fractional transversal number, 5

- good cover, 117
- graph, 3

- halfspace, 1
- halving hyperplane, 128
- halving line, 127
- halving plane, 57
- halving segment, 127
- halving simplex, 128
- Helly number of convex lattice sets, 131
- Helly property, 29
- Helly's theorem, 13, 29
- hitting set theorem, 101
- homogeneous selection, 99
- homogeneous selection theorem, 59
- hypergraph, 3

- intermixing lemma, 137

- Jung's theorem, 34

- Kirchberger's theorem, 33
- Krasnoselski's theorem, 36

- lexicographic minimum, 40

- lexicographic ordering, 40
- linear programming, 3
- matching, 4
- matching number, 4
- multiple separation, 30
- nearest point lemma, 22
- nearest point map, 2
- octahedral construction, 46
- odd star lemma, 127, 129
- order type, 67
- partial transversal, 50
- path in a graph, 4
- point selection lemma, 87
- point selection theorem, 95
- polyhedron, 1
- polytope, 1
- Radon number of convex lattice sets, 133
- Radon partition, 13
- Radon point, 13
- Radon's theorem, 13
- reduction to polytopes, 30, 39, 49
- relative interior, 1
- same type lemma, 67
- Sarkaria's lemma, 54, 62
- Sarkaria's tensor trick, 53
- segment, 1
- separation along colours, 61
- separation theorem, 2
- simple polytope, 47
- simplex, 1
- spike, 71
- stair convex, 111
- staircase convex set, 85
- standard basis, 44
- standard limiting argument, 23
- star-shaped, 36
- Steinitz's theorem, 11
- stretched grid, 77, 81
- strict separation, 34
- subhypergraph, 7
- supporting hyperplane theorem, 2
- tensor product, 53
- topological Radon, 17
- transitive colouring, 66
- transversal, 4, 5, 41, 61
- transversal number, 4
- tree, 4
- Tverberg's theorem, 21
- uniform hypergraph, 4
- vertex set, 3
- weak k -net, 106
- weak hypergraph regularity lemma, 6
- weak ε -net, 114
- width, 37
