

Contents

1	Foreword	v
2	Preface	vi
3	How to use this book	vii
I	Algebra	1
1	Inequalities	5
1	Basics	6
2	The AM-GM Inequality	12
3	The Cauchy-Schwarz Inequality and Titu's Lemma	19
4	The Rearrangement Inequality	27
5	Hölder's Inequality for Sums	34
6	Schur's Inequality	40
2	Polynomials	47
1	Basics of Polynomials	47
2	Reducibility	55
3	Quadratics and the Discriminant	60
3	Miscellaneous Tips and Tricks	69
1	Homogeneity	69
2	Substitutions	73
3	Factoring	81
4	Symmetric Expressions in 3 Variables	88
5	Fudging, Smoothing, and Ordering	92
4	Problems	103
1	Problems	103
2	Solutions	111

II	Number Theory	141
5	Divisibility and Modular Arithmetic	145
1	Modular Arithmetic	145
2	Primes	150
3	Unique Factorization	154
4	Perfect Squares	160
6	Other Selected Topics	167
1	The Power of Factoring	167
2	Euler, Fermat, and Wilson	172
3	More Diophantine Equations	179
4	Constructions	182
7	Problems	185
1	Problems	185
2	Solutions	191
III	Hints to Selected Problems	215
	Other Books from XYZ Press	225
