Preface	vii
1 What is number theory?	1
1.1 Prerequisites	2
1.2 A problem in number theory	37
1.3 Introductory problems	40
2 The division theorem and divisibility	75
2.1 Divisibility and congruences	101
2.2 Divisibility criteria	126
2.3 The greatest common divisor and Bézout’s lemma	131
2.4 The Euclidean algorithm	136
2.5 Gauss’s lemma	145
2.6 Primes and the fundamental theorem of arithmetic	161
2.7 A reformulation of the fundamental theorem of arithmetic	176
2.8 A theorem of Legendre and some of its applications	186
2.9 Bertrand’s postulate	193
2.10 Problems	199
Bibliography	265
Index	267
Other Books from XYZ Press	269
