Projective Geometry

Volume I

By OSWALD VEBLEN, Professor of Mathematics in Princeton University, and J. W. YOUNG, Professor of Mathematics in Dartmouth College. \$4.00.

Volume II

By OSWALD VEBLEN (In Press)

Written for upper-class and graduate students in American universities, these volumes give an exposition of the principles of geometry, with an unusually complete and intelligible explanation of its foundations. The first volume deals with the most general parts of the subject, the second is concerned with the more important special branches.
