

Making a machine part of a system

To start with the raw computer components and shape them into an effective computer system—this is Systems Programming at IBM. It's a field of work that offers rich opportunities for achievement to experienced programmers.

In Systems Programming, you may have the chance to work with advanced computers even before they are commercially released. You may be working in one or more of these areas:

- Creating master control programs
- Establishing automatic operating systems
- Providing for exception cases (interrupt system)

- Determining termination procedures
- Programming advanced computer consoles which can be used to adjust parameters.

If you are a qualified programmer or mathematician and interested in joining professional people working in a professional atmosphere—with ample computer time to test your ideas—write to:

CONTEMPORARY PSYCHOLOGY

A Journal of
Reviews
Criticism
Opinion

No time to read?

Let *CP* help with . . .

Selective reviews of the latest books by specialists in the particular field involved.

Comment by the Editor on news from the publishing world, on the printed word in particular and in general, on criticism, reviewing, and opinion.

Feedback on controversial book reviews in a Letters-to-the-Editor section.

Reviews of films and other instructional media.

Lists of the latest books received.

Put *CP* in your brief case and read it on planes, trains, buses.

Keep in touch with the latest developments in your field of interest.

Subscription, 1961, \$10.00 (Foreign, \$10.50)

SENIOR MATHEMATICIANS

Doctorates in Mathematics, with emphasis on modern algebra, number theory, and combinatorial analysis. To pursue advanced research on algebraic and combinatorial problems of genuine mathematical significance, including areas which have important applications to information theory and coded communications.

AMERICAN MATHEMATICAL SOCIETY

190 Hope Street

Providence 6, Rhode Island

ILLINOIS

JOURNAL

OF

MATHEMATICS

A quarterly journal of basic research in pure and applied mathematics published by the University of Illinois, Urbana.

edited by

REINHOLD BAER • PAUL T. BATEMAN

S. S. CHERN • J. L. DOOB

A. H. TAUB • GEORGE W. WHITEHEAD

The subscription price is \$9.00 a volume (four numbers); this is reduced to \$5.00 for individual members of the American Mathematical Society. Subscriptions should be sent to the University of Illinois Press, Urbana, Illinois.

MATH LEARNING and TEACHING AIDS!

NEW! GRAPH RUBBER STAMP

Real time and labor saver for math teachers. If your tests require graph backgrounds—no need to attach separate sheets of graph paper and worry about keeping them straight. Simply stamp a graph pattern, 3" square as needed on each paper. Grading graph problems then become 100% easier.

Stamps are 3" square overall—2 different patterns.

Stock No. 50,255-DL (100 blocks) \$3.00 Pstpd.
Stock No. 50,351-DL (16 blocks) \$3.00 Pstpd.

TRIG AND CALCULUS CARDS

Used to clinch the learning of trig identities or calculus formulas. Each deck contains 52 playing cards, plus instructions, and is used to play a game similar to Solitaire. Our decks include Differential Calculus, Integral Calculus, Applied Calculus, and Fundamental Identities from Trig.

Stock No. 40,310-DL—
Applied Calculus \$1.25 Postpaid

Stock No. 40,311-DL—
Fundamental Identities 1.25 Postpaid

Stock No. 40,312-DL—
Integral Calculus 1.25 Postpaid

Stock No. 40,313-DL—
Differential Calculus 1.25 Postpaid

Stock No. 40,314-DL—Set of all four ..4.00 Postpaid

D-STIX CONSTRUCTION KITS

You can increase interest in geometry and teach it better by using D-Stix. Solid geometry is fun for pupils when you show them actual visualizations of regular polyhedrons, geometric figures from triangles and cubes through such multiple sided figures as icosahedrons, dodecahedrons, etc.

Stock No. 70,210-DL (370 pcs)\$5.00 ppd.
Stock No. 70,211-DL (452 pcs)\$7.00 ppd.

RADIAN PROTRACTOR

Eliminates the need to learn long tables of equivalences or buy expensive books of tables for translating degrees to radian.

Stock No. 50,253-DL—Pkg. of 25\$ 3.75 Postpaid
Stock No. 50,266-DL—Pkg. of 100 ...\$12.50 Postpaid

***"... the most thorough, modern treatment
of probability found in any book in
mathematical statistics."***

H. D. BRUNK'S

***AN INTRODUCTION TO
MATHEMATICAL STATISTICS***

This is only one of the many fine appraisals of Dr. Brunk's latest book. Instructors will appreciate the flexibility of this text which makes it usable in either a one- or two-semester course. Throughout, Dr. Brunk has conveyed a particularly clear understanding of the probabilistic background of the basic concepts of statistics.

A unique aspect of this book is the inclusion of a chapter on decision theory. Professor Brunk's approach to regression is more general, and therefore more satisfactory than that given in most comparable books. Especially pleasing is the large selection of problems and illustrative examples. Each new concept is introduced by means of an example rather than in terms of a cold definition. The problems cover an unusually wide field of topics.

For further information on this valuable new addition to the field of mathematical statistics, write to the Ginn and Company office nearest you.

Starting September 26 on Continental Classroom

A NEW KIND OF COLLEGE ALGEBRA COURSE

devoted primarily to:

- a brief survey of elementary algebra from an advanced point of view
- subsets of the set of real numbers (including natural numbers, rational numbers, and positive numbers)
- complex numbers
- simultaneous linear equations
- subsets of the plane and of three-dimensional space
- linear and quadratic functions of lines and planes
- introduction to matrix notation

INTRODUCTION TO MODERN ALGEBRA

by **JOHN L. KELLEY**, *University of California (Berkeley)*

Written by Professor Kelley specifically to accompany his Continental Classroom course, which will be nationally televised over more than 160 NBC stations, the text covers the complete 48-lesson course for college undergraduates.

Paperbound, 210 pages, \$2.75

STUDENTS MANUAL, by Roy Dubisch, \$1.00

TEACHERS GUIDE, by Roy Dubisch, \$2.00

To be sure of receiving your copies before the first televised lesson, place your order at once through your bookstore or directly to:

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription prize is \$7.00 per annual volume of six numbers.

Research Problems and Invited Addresses offered for publication should be sent to WALTER RUDIN, Department of Mathematics, University of Wisconsin, Madison, Wisconsin; Book Reviews to FELIX BROWDER, Department of Mathematics, Yale University, New Haven, Connecticut. Research Announcements offered for publication should be sent to some member of the Council of the Society, and communicated by him to E. E. MOISE, Department of Mathematics, Harvard University, Cambridge 38, Massachusetts. All other communications to the editors should be sent to the Managing Editor, E. E. MOISE.

The members of the Council for 1960 are: E. F. Beckenbach, E. G. Begle, Lipman Bers, R. H. Bing, R. P. Boas, Salomon Bochner, H. F. Bohnenblust, F. E. Browder, R. H. Bruck, R. C. Buck, M. M. Day, J. A. Dieudonné, J. L. Doob, Arthur Erdelyi, G. E. Forsythe, P. R. Garabedian, A. M. Gleason, J. W. Green, P. R. Halmos, Edwin Hewitt, G. P. Hochschild, G. B. Huff, Nathan Jacobson, Irving Kaplansky, L. H. Loomis, E. J. McShane, W. S. Massey, A. E. Meder, Jr., E. E. Moise, Deane Montgomery, R. S. Pierce, Everett Pitcher, G. de B. Robinson, Alex Rosenberg, P. C. Rosenbloom, Walter Rudin, Hans Samelson, I. J. Schoenberg, I. E. Segal, I. M. Singer, E. H. Spanier, A. W. Tucker, S. M. Ulam, J. V. Wehausen, J. W. T. Youngs, Oscar Zariski, Leo Zippin.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length.

The subscription price is \$11.00 per annual volume of six numbers.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Lunt Building, Northwestern University, Evanston, Illinois; in probability, real variables, logic and foundations to P. R. HALMOS, Eckhart Hall, University of Chicago, Chicago 37, Illinois; in abstract analysis to either P. R. HALMOS or ALEX ROSENBERG; in geometry and topology to HANS SAMELSON, Institute for Advanced Study, Princeton, New Jersey; in other branches of analysis, applied mathematics, and all other fields to R. P. BOAS, Lunt Building, Northwestern University, Evanston, Illinois. All other communications to the editors should be addressed to the Managing Editor, P. R. HALMOS.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1960. The subscription price is \$8.00 per volume.

Papers in analysis, applied mathematics and probability should be sent to LIPMAN BERS, Institute of Mathematical Sciences, New York University, New York, New York; in topology to W. S. MASSEY, Department of Mathematics, Yale University, Box 2155, Yale Station, New Haven, Connecticut; in algebra, number theory, and logic to G. P. HOCHSCHILD, Department of Mathematics, University of California, Berkeley 4, California; in geometry and abstract analysis to I. M. SINGER, Department of Mathematics, Massachusetts Institute of Technology, Cambridge 39, Massachusetts. All other communications to the editors should be addressed to the Managing Editor, LIPMAN BERS.

Journals Published by the American Mathematical Society

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet DOKLADY. (The DOKLADY AKADEMII NAUK SSSR is issued three times a month, six issues constituting a volume.)

Rates per annual volume are as follows: Domestic subscriptions, \$17.50; foreign subscriptions, \$20.00. Single issues are \$5.00.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

MATHEMATICAL REVIEWS is published monthly, excepting July. The subscription price is \$50.00 per annual volume of eleven numbers.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

The subscription price is \$7.00 per annual volume of 7 numbers. A single copy is \$2.00.

All communications should be addressed to the Editor G. L. WALKER, 190 Hope Street, Providence 6, Rhode Island. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Memoirs of the American Mathematical Society

This is a series of paperbound research tracts which are of the same general character as papers published in the TRANSACTIONS. An issue contains either a single monograph or a group of cognate papers. Published at irregular intervals. The latest numbers in this series are:

- | | |
