Bulletin (New Series) of the American Mathematical Society

This journal is devoted to articles of the following types:

Research-Expository Papers

These are, by definition, papers that present a clear and insightful exposition of significant aspects of contemporary mathematical research. Gibbs lectures, Progress in Mathematics lectures, and retiring presidential addresses will be included in this section.

Research Announcements

The purpose of this department is to publish quickly and disseminate widely significant new mathematics. A Research Announcement should be designed to communicate its contents to a broad mathematical audience and should meet high standards for clarity as well as mathematical content.

Research Reports

These are brief, timely reports on important mathematical developments. They are normally solicited and often written by a disinterested expert.

Book Reviews

Book Reviews are accepted for publication by invitation only. Unsolicited manuscripts will not be considered.

Subscription information. *Bulletin (New Series) of the American Mathematical Society* is published quarterly. Subscription prices for Volume 32 (1995) are \$238 list, \$190 institutional member, \$143 individual member. The subscription price for members is included in the annual dues. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$8.00; subscribers in India must pay a postage surcharge of \$13.00. Expedited delivery to destinations in North America \$12; elsewhere \$21. Beginning in January 1992, the Bulletin will be available from the electronic service e-MATH [telnet e-MATH.ams.org (or telnet 130.44.1.100)]. Login and password are e-math.]

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P. O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@math.ams.org.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Bulletin (New Series) of the American Mathematical Society is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Second class postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Bulletin, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

Editorial Information

As of February 4, 1995, the backlog for this journal was approximately 0 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in four months (the time necessary for editing and composing a typical issue).

A Copyright Transfer Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

Information to Authors and Editors

For Research-Expository Papers and Research Reports, the first page must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The *abstract* should be a brief technical description of the new material. Then, for Research Reports there should be an introductory section addressed to nonexperts describing the motivation, background, and significance of the results announced. Following the statement of results, there should be a sketch of proofs that may

be addressed to experts. For Research-Expository Papers and Research Reports, included with the footnotes to the paper, there should be the 1991 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual index of *Mathematical Reviews*, published with the December issue starting in 1990, as well as from the electronic service e-MATH [telnet e-MATH.ams.org (or telnet 130.44.1.100). Login and password are e-math.] For journal abbreviations used in bibliographies, see the list of serials in the latest *Mathematical Reviews* annual index. Authors are encouraged to supply electronic addresses when available. These will be printed after the postal address at the end of each article.

TeX files available upon request. Authors may request a copy of the TeX files of their papers by sending e-mail to file-request@math.ams.org or by contacting the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The TeX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet e-mail, please include the e-mail address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because TeX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, TeX files cannot be guaranteed to run through the author's version of TeX without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author's TeX environment.

Electronically prepared manuscripts. The AMS encourages submission of electronically prepared manuscripts in $\mathcal{A}\mathcal{M}\mathcal{S}$ -TeX or $\mathcal{A}\mathcal{M}\mathcal{S}$ -L^ATeX because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process. To this end, the Society has prepared author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, the *AMS Author Handbook*, samples, and a style file that generates the particular design specifications of that publication series for both $\mathcal{A}\mathcal{M}\mathcal{S}$ -TeX and $\mathcal{A}\mathcal{M}\mathcal{S}$ -L^ATeX.

Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Electronically submitted manuscripts prepared in plain TeX or L^ATeX are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. Users of plain TeX should have little difficulty learning $\mathcal{A}\mathcal{M}\mathcal{S}$ -TeX, and L^ATeX users will find that $\mathcal{A}\mathcal{M}\mathcal{S}$ -L^ATeX is the same as L^ATeX with additional commands to simplify the typesetting of mathematics.

Authors with FTP access may retrieve an author package from the Society's Internet node e-MATH.ams.org (130.44.1.100). For those without FTP access, the author package can be obtained free of charge by sending e-mail to pub@math.ams.org (Internet) or from the Publication Division, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When requesting an author package, please specify $\mathcal{A}\mathcal{M}\mathcal{S}$ -TeX or $\mathcal{A}\mathcal{M}\mathcal{S}$ -L^ATeX and the publication in which your paper will appear.

At the time of submission, authors should indicate if the paper has been prepared using \LaTeX or \LaTeX and provide the Editor with a paper manuscript that matches the electronic manuscript. The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the paper manuscript to the Editor, who will forward a copy to the Providence office. Editors will require authors to send their electronically prepared manuscripts to the Providence office in a timely fashion. Electronically prepared manuscripts can be sent via e-mail to `pub-submit@math.ams.org` (Internet) or on diskette to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When submitting an electronic manuscript, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to submit files are included in the author package.

Copies of the paper should be sent directly to the appropriate Editor, and the author should keep one copy. For Research-Expository Surveys (see below), two copies of the manuscript should be submitted to Professor Nolan R. Wallach, Department of Mathematics, University of California, San Diego, La Jolla, CA 92093-0001. For Research Reports, four copies of the manuscript should be submitted to Professor Haynes R. Miller, Room 2-237, Massachusetts Institute of Technology, Cambridge, MA 02139-4307. Research Reports can also be submitted electronically in \LaTeX or \LaTeX to `bams@math.mit.edu`.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

Research-Expository Surveys

This section is intended for reasonably broad expository surveys of a currently active area of mathematical research. To stress this fact, the name of the section has been changed from “Research-Expository Papers” to “Research-Expository Surveys”. The first Research-Expository Surveys are expected to be published in the July 1995 issue. The level of exposition is expected to be such that a graduate student—or a research mathematician from a remote area—will be able to read an article in order to get an overview of a subject. A well-written article will include motivating problems and examples, some indication of the historical development of the subject, and of course the results and open problems that make it an interesting and exciting area of mathematics. In most cases proofs should be at most briefly sketched, and there should be a good bibliography whose main aim should be helping those wishing to pursue the subject further. Usually Research-Expository Surveys will be at most 40 pages long.

Certain of the Society’s Lecture Series, including the Gibb’s Lectures, Colloquium Lectures, and Progress in Mathematics Lectures, traditionally appear in the Research-Expository Surveys, and those invited to give these lectures are informed of this tradition and of the above guidelines. Research-Expository Surveys are also frequently solicited by the Editorial Board, but unsolicited

manuscripts are also encouraged; in particular, those invited to give invited hour addresses at meetings of the Society should consider writing up their lecture in a manner that meets the requirements of the preceding paragraph and submitting their manuscripts for consideration by the Editorial Board for the Research-Expository Surveys.

Research Reports

In August 1993, the Council of the AMS voted to replace the Research Announcements with a new category of articles, to be called Research Reports. The first Research Reports are expected to be published in the October 1995 issue. The *Bulletin* stopped accepting submissions of Research Announcements on January 31, 1994. The Editor for Research Announcements will continue to serve as Editor for Research Reports.

A Research Report is a timely, short (4–8 pages) report on a recent accomplishment in mathematical research. It should be written so as to be understandable by mathematicians who are not experts in the subject matter of the Report. The context giving significance to the research being reported on should be made clear, and the consequences or potential consequences should be described. Usually only the barest hint of the methods of proof should be given, although elements of the proof which are novel should be included. In any case, references should be given so that an interested reader can find the details. It is expected that Research Reports will frequently be written by specialists other than the individuals immediately involved in the research. Approximately twenty-four Reports will be published each year.

Research Reports are normally solicited by the Editor for Research Reports and the Board of Associate Editors. They cordially invite suggestions for topics and reporters. Unsolicited manuscripts, submitted to the Editor for Research Reports, will also be considered.

Electronic Research Announcements of the AMS

The American Mathematical Society's first electronic journal, *Electronic Research Announcements of the AMS*, which will replace the Research Announcements section of the *Bulletin*, is ready for submission of papers. Further details on how to submit papers to *ERA-AMS* can be found on the *ERA-AMS* WWW page at the URL:

<http://www.ams.org/web/publications/era/era-home.html>

ERA-AMS will quickly publish high quality research announcements (up to about 10 journal pages) of significant advances in all branches of mathematics. All papers will be reviewed. Authors may submit manuscripts to any Editor. The entire Editorial Board must approve the acceptance of any paper.

Managing Editor: Svetlana Katok

Editorial Board

Douglas Arnold	Robert Lazarsfeld
Hyman Bass	Douglas Lind
Eugenio Calabi	Gregory Margulis
Alexandre Chorin	Hugh Montgomery
Ingrid Daubechies	Walter Neumann
James Glimm	Richard Schoen
Ronald Graham	Masamichi Takesaki
Leonard Gross	Michael Taylor
Yitzhak Katznelson	Thomas Wolff
David Kazhdan	Zhihong (Jeff) Xia
Alexandre Kirillov	Don Zagier
Frances Kirwan	Efim Zelmanov
Krystyna Kuperberg	Robert Zimmer

ERA-AMS will be published on e-MATH and disseminated via the World Wide Web, FTP, and electronic mail. To submit your paper for consideration to *ERA-AMS* via electronic mail, please fill out the template, include all your files with it, and send it to:

era-submit@math.ams.org

In order to obtain the template by e-mail, send an e-mail message to:

era-info@math.ams.org

with the word "help" in the subject line.

BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY
CONTENTS

Vol. 32, No. 2

April 1995

Research-Expository Papers

René Schoof , Families of curves and weight distributions of codes	171
Armand Borel , Values of indefinite quadratic forms at integral points and flows on spaces of lattices	184
Samuel S. Holland, Jr. , Orthomodularity in infinite dimensions; A theorem of M. Solèr	205

Research Announcements

Juan J. Manfredi and Enrique Villamor , Mappings with integrable dilatation in higher dimensions	235
Joyce R. McLaughlin and Ole H. Hald , A formula for finding a potential from nodal lines	241

Book Reviews

S. K. Donaldson (Reviewer), Topology of gauge fields and condensed matter by Michael Monastyrsky	248
Peter Sarnak (Reviewer), The Riemann zeta function by A. A. Karatsuba and S. M. Voronin	251
David Gluck (Reviewer), Representations of solvable groups by Olaf Manz and Thomas R. Wolf	254
David Drasin (Reviewer), (A) Normal families of meromorphic functions by Chi-tai Chuang, and (B) Normal families by Joel L. Schiff	257
V. Milman (Reviewer), Convex bodies: The Brunn-Minkowski theory by Rolf Schneider	261
Melvin Hochster (Reviewer), Cohen-Macaulay rings by Winfried Bruns and Jürgen Herzog	265
Arrigo Cellina (Reviewer), Multivalued differential equations by Klaus Deimling	275
Jerry Alan Veeh (Reviewer), Operator-limit distributions in probability theory by Zbigniew J. Jurek and J. David Mason	278
John T. Baldwin (Reviewer), Model theory by Wilfrid Hodges	280
Robert Hardt (Reviewer), Measure theory and fine properties of functions by L. C. Evans and R. Gariepy	285
Peter Constantin (Reviewer), Mathematical theory of incompressible viscous fluids by Carlo Marchioro and Mario Pulvirenti	288
