Bulletin (New Series) of the American Mathematical Society

This journal is devoted to articles of the following types:

Research-Expository Surveys

These are, by definition, papers that present a clear and insightful exposition of significant aspects of contemporary mathematical research. Gibbs lectures, Progress in Mathematics lectures, and retiring presidential addresses will be included in this section.

Research Reports

These are brief, timely reports on important mathematical developments. They are normally solicited and often written by a disinterested expert.

Book Reviews

Book Reviews are accepted for publication by invitation only. Unsolicited manuscripts will not be considered.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to e-MATH. Articles are posted to e-MATH individually soon after proof is returned from authors and before appearing in an issue.

Subscription information. *Bulletin (New Series) of the American Mathematical Society* is published quarterly. The *Bulletin* is also accessible electronically, starting with the January 1992 issue, from www.ams.org/publications/. For paper delivery, subscription prices for Volume 37 (2000) are \$300 list, \$240 institutional member, \$180 individual member. The subscription price for members is included in the annual dues. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$8.00; subscribers in India must pay a postage surcharge of \$13.00. Expedited delivery to destinations in North America is \$12; elsewhere \$23.

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Bulletin (New Series) of the American Mathematical Society is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Periodicals postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Bulletin, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

INDEX TO VOLUME 37 (2000)

RESEARCH-EXPOSITORY SURVEYS

- Baouendi, M. S., Ebenfelt, P., and Rothschild, Linda Preiss. *Local geometric properties of real submanifolds in complex space*, 309
- Birkhoff, G. D. *A mathematical critique of some physical theories*, 65
- Brouwer, Dr. L. E. J. *Intuitionism and formalism*, 55
- Di Francesco, P. *Folding and coloring problems in mathematics and physics*, 251
- Ebenfelt, P. *See* Baouendi, M. S.
- Einstein, Albert. *Elementary derivation of the equivalence of mass and energy*, 39
- Fiske, President Thomas S. *Mathematical progress in America*, 3
- Fulton, William. *Eigenvalues, invariant factors, highest weights, and Schubert calculus*, 209
- Hilbert, David. *Mathematical problems*, 407
- McMullen, Curtis T. *From dynamics on surfaces to rational points on curves*, 119
- Morawetz, Cathleen Synge. *Variations on conservation laws for the wave equation*, 141
- Morris, W., and Soltan, V. *The Erdős-Szekeres problem on points in convex position – a survey*, 437
- Parshall, Karen Hunger. *Perspectives on American mathematics*, 381
- Pierpont, Professor James. *The history of mathematics in the nineteenth century*, 9
- Poincaré, Professor H. *The present and the future of mathematical physics*, 25
- Rothschild, Linda Preiss. *See* Baouendi, M. S.
- Saari, Donald G. *Introductory comments*, 1
- . *Note from the Editor*, 379
- Soltan, V. *See* Morris, W.
- Van Vleck, Edward B. *Current tendencies of mathematical research*, 45

BOOK REVIEWS

- Ahlfors, L. V. *Complex analysis*, reviewed by A. C. Schaeffer, 111
- Alexandroff, Paul. *Einfachste Grundbegriffe der Topologie*, with an introduction by David Hilbert, reviewed by P. A. Smith, 90
- Alexandroff, Paul, and Hopf, Heinz. *Topologie I*, reviewed by A. W. Tucker, 93
- Andrews, George E., Askey, Richard, and Roy, Ranjan. *Special functions*, reviewed by Jet Wimp, 499
- Arnold, V. I., and Khesin, B. A. *Topological methods in hydrodynamics*, reviewed by Steve Shkoller, 175
- Askey, Richard. *See* Andrews, George E.
- Bade, William G. *See* Dunford, Nelson
- Baouendi, M. Salah, Ebenfelt, Peter, and Rothschild, Linda Preiss. *Real submanifolds in complex space and their mappings*, reviewed by Nancy K. Stanton, 511
- Bartle, Robert G. *See* Dunford, Nelson
- Bass, H.; Buium, A.; and Cassidy, P. J. (editors). *Selected works of Ellis Kolchin*, reviewed by Andy R. Magid, 337
- Birkhoff, G. D. *Dynamical systems*, reviewed by B. O. Koopman, 88
- Bourbaki, N. *Éléments de mathématique*, reviewed by E. Artin, 112
- Buium, A. *See* Bass, H.
- Burnside, W. *Theory of groups of a finite order*, reviewed by G. A. Miller, 80
- Carathéodory, C. *Funktionentheorie*, reviewed by Maurice Heins, 108
- Cartan, Élie. *La théorie des groupes finis et continus et la géométrie différentielle traitées par méthode du repère mobile*, reviewed by Hermann Weyl, 96
- Cartan, Henri, and Eilenberg, Samuel. *Homological algebra*, reviewed by S. Mac Lane, 113
- Cassidy, P. J. *See* Bass, H.
- Chevalley, C. *Introduction to the theory of algebraic functions of one variable*, reviewed by A. Weil, 103
- Chevalley, Claude. *The theory of Lie groups, I*, reviewed by P. A. Smith, 105
- Chriss, Neil, and Ginzburg, Victor. *Representation theory and complex geometry*, reviewed by Ivan Mirković, 343
- Courant, R., and Hilbert, D. *Methoden der mathematischen Physik, Vol. 2*, reviewed by Hermann Weyl, 97

- Cox, David A., and Katz, Sheldon. *Mirror symmetry and algebraic geometry*, reviewed by V. Batyrev, 473
- Coxeter, H. S. M. *Regular polytopes*, reviewed by C. B. Allendoerfer, 107
- Curtis, Charles W. *Pioneers of representation theory*, reviewed by J. E. Humphreys, 359
- Dieudonné, J. *See Grothendieck, A.*
- Donkin, Stephen. *The q -Schur algebra*, reviewed by Brian Parshall, 467
- van den Dries, Lou. *Tame topology and o -minimal structures*, reviewed by David Marker, 351
- Dunford, Nelson and Schwartz, Jacob T., with the assistance of William G. Bade and Robert G. Bartle. *Linear operators. Part II. Spectral theory*, reviewed by Gian-Carlo Rota, 118
- Ebenfelt, Peter. *See Baouendi, M. Salah*
- Edgar, G. *Integral, probability, and fractal measures*, reviewed by Lars Olsen, 481
- Eilenberg, S., and Steenrod, N. *Foundations of algebraic topology*, reviewed by E. H. Spanier, 114
- Eilenberg, Samuel. *See Cartan, Henri*
- Etingof, Pavel I.; Frenkel, Igor B.; and Kirillov, Alexander, A., Jr. *Lectures on representation theory and Knizhnik-Zamolodchikov equations*, reviewed by Vyjayanthi Chari, 161
- Evans, L. C. *Partial differential equations*, reviewed by Jeffrey Rauch, 363
- Feller, William. *An introduction to probability theory and its applications, Vol. I*, reviewed by J. Wolfowitz, 109
- . *Festschrift zur Feier des 100 Geburtstages Eduard Kummer mit Briefen an seine Mutter und an Leopold Kronecker*, reviewed by L. E. Dickson, 82
- Frenkel, Igor B. *See Etingof, Pavel I.*
- Gelfand, I. M.; Kapranov, M. M.; and Zelevinsky, A. V. *Discriminants, resultants and multidimensional determinants*, reviewed by Fabrizio Catanese, 183
- Ginzburg, Victor. *See Chriss, Neil*
- Gödel, Kurt. *Consistency of the axiom of choice and of the generalized continuum-hypothesis with the axioms of set theory*, reviewed by C. C. Torrance, 102
- Goursat, Édouard. *Cours d'analyse mathématique*, reviewed by W. F. Osgood, 81
- Grothendieck, A. *Éléments de géométrie algébrique, rédigés avec la collaboration de J. Dieudonné*, reviewed by S. Lang, 115
- Hardy, G. H., and Wright, E. M. *An introduction to the theory of numbers*, reviewed by E. T. Bell, 99
- Hilbert, D. *See Courant, R.*
- Hilbert, David. *Poincaré's review of Hilbert's Foundations of geometry*, reviewed by H. Poincaré, 77
- Hodge, W. V. D. *The theory and applications of harmonic integrals*, reviewed by D. J. Struik, 102
- Hopf, Heinz. *See Alexandroff, Paul*
- Jost, J. *Riemannian geometry and geometric analysis*, reviewed by Werner Ballmann, 459
- Kapranov, M. M. *See Gelfand, I. M.*
- Katz, Sheldon. *See Cox, David A.*
- Khesin, B. A. *See Arnold, V. I.*
- Kirillov, Alexander A., Jr. *See Etingof, Pavel I.*
- Klain, Daniel A., and Rota, Gian-Carlo. *Introduction to geometric probability*, reviewed by Günter M. Ziegler, 205
- Kolmogoroff, A. *Grundbegriffe der Wahrscheinlichkeitsrechnung*, reviewed by H. L. Rietz, 91
- Krasil'shchik, I. S., and Vinogradov, A. M. *Symmetries and conservation laws for differential equations of mathematical physics*, reviewed by Peter J. Olver, 369
- Landau, Edmund. *Vorlesungen über Zahlentheorie*, reviewed by G. D. Birkhoff, 86
- Laugwitz, Detlef. *Bernhard Riemann, 1826-1866: Turning points in the conception of mathematics*, reviewed by Roger Cooke, 477
- Lebesgue, H. *Leçons sur l'intégration et la recherche des fonctions primitives*, reviewed by T. H. Hildebrandt, 87
- Lie, Sophus. *Vorlesungen über kontinuierliche Gruppen mit geometrischen und anderen Anwendungen*, reviewed by J. M. Brooks, 78
- _____. *Gesammelte Abhandlungen*, reviewed by R. D. Carmichael, 79
- Mac Lane, Saunders. *Homology*, reviewed by David A. Buchsbaum, 117

- Mathas, Andrew. *Iwahori-Hecke algebras and Schur algebras of the symmetric group*, reviewed by Brian Parshall, 467
- Mordell, L. J. *Three lectures on Fermat's last theorem*, reviewed by G. E. Wahlin, 84
- Morgenstern, Oskar. *See von Neumann, John*
- Murnaghan, Francis D. *The theory of group representations*, reviewed by R. Brauer, 100
- Murty, M. Ram, and Murty, V. Kumar. *Non-vanishing of L-functions and applications*, reviewed by Dorian Goldfeld, 155
- Murty, V. Kumar. *See Murty, M. Ram*
- Navarro, Gabriel. *Characters and blocks of finite groups*, reviewed by David Gluck, 169
- von Neumann, John, and Morgenstern, Oskar. *Theory of games and economic behavior*, reviewed by A. H. Copeland, 103
- Osgood, Dr. W. F. *Lehrbuch der Funktionentheorie*, reviewed by E. B. Van Vleck, 83
- Petersen, P. *Riemannian geometry*, reviewed by Werner Ballmann, 459
- Ramakrishnan, D., and Valenza, R. J. *Fourier analysis on number fields*, reviewed by Jeremy Teitelbaum, 373
- Reidemeister, K. *Knotentheorie*, reviewed by P. A. Smith, 90
- Reidemeister, Kurt. *Einführung in die kombinatorische Topologie*, reviewed by P. A. Smith, 90
- Riesz, F., and Sz.-Nagy, B. *Leçons d'analyse fonctionnelle*, reviewed by E. R. Lorch, 111
- Rota, Gian-Carlo. *See Klain, Daniel A.*
- Rothschild, Linda Preiss. *See Baouendi, M. Salah*
- Roy, Ranjan. *See Andrews, George E.*
- Sakai, T. *Riemannian geometry*, reviewed by Werner Ballmann, 459
- Schwartz, Jacob T. *See Dunford, Nelson*
- Seifert, H., and Threlfall, W. *Lehrbuch der Topologie*, reviewed by A. W. Tucker, 92
- Smart, Nigel P. *The algorithmic resolution of Diophantine equations*, reviewed by Maurice Mignotte, 207
- Srinivasan, Bhama. *Editor's introduction*, 75
- Steenrod, N. *See Eilenberg, S.*
- Steinitz, Ernst. *Vorlesungen über die Theorie der Polyeder unter Einschluss der Elemente der Topologie*, edited and completed by Hans Rademacher, reviewed by A. W. Tucker, 92
- Sz.-Nagy, B. *See Riesz, F.*
- Threlfall, W. *See Seifert, H.*
- Titchmarsh, E. C. *The theory of the Riemann zeta-function*, reviewed by N. Levinson, 110
- Traub, J. F., and Werschulz, A. G. *Complexity and information*, reviewed by Mark A. Kon, 199
- Valenza, R. J. *See Ramakrishnan, D.*
- Veblen, Oswald. *The Cambridge Colloquium, 1916, Part II. Analysis Situs*, reviewed by S. Lefschetz, 85
- Vinogradov, A. M. *See Krasil'shchik, I. S.*
- van der Waerden, B. L. *Moderne algebra*, reviewed by O. Ore, 89
- Weil, André. *Foundations of algebraic geometry*, reviewed by Oscar Zariski, 106
- Werschulz, A. G. *See Traub, J. F.*
- Weyl, Hermann. *The classical groups*, reviewed by N. Jacobson, 100
- Wright, E. M. *See Hardy, G. H.*
- Zariski, Oscar. *Algebraic surfaces*, reviewed by Solomon Lefschetz, 94
- Zelevinsky, A. V. *See Gelfand, I. M.*
- Zygmund, A. *Trigonometric series, 2d. ed.*, reviewed by R. Salem, 96
- Zygmund, Antoni. *Trigonometric series*, reviewed by J. D. Tamarkin, 95

Bulletin (New Series) of the American Mathematical Society

This journal is devoted to articles of the following types:

Research-Expository Surveys

These are, by definition, papers that present a clear and insightful exposition of significant aspects of contemporary mathematical research. Gibbs lectures, Progress in Mathematics lectures, and retiring presidential addresses will be included in this section.

Research Reports

These are brief, timely reports on important mathematical developments. They are normally solicited and often written by a disinterested expert.

Book Reviews

Book Reviews are accepted for publication by invitation only. Unsolicited manuscripts will not be considered.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to e-MATH. Articles are posted to e-MATH individually soon after proof is returned from authors and before appearing in an issue.

Subscription information. *Bulletin (New Series) of the American Mathematical Society* is published quarterly. The *Bulletin* is also accessible electronically, starting with the January 1992 issue, from www.ams.org/publications/. For paper delivery, subscription prices for Volume 37 (2000) are \$300 list, \$240 institutional member, \$180 individual member. The subscription price for members is included in the annual dues. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$8.00; subscribers in India must pay a postage surcharge of \$13.00. Expedited delivery to destinations in North America is \$12; elsewhere \$23.

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Bulletin (New Series) of the American Mathematical Society is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Periodicals postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Bulletin, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 37, No. 1

January 2000

Research-Expository Surveys

Donald G. Saari, Introductory comments	1
President Thomas S. Fiske, Mathematical progress in America	3
Professor James Pierpont, The history of mathematics in the nineteenth century	9
Professor H. Poincaré, The present and the future of mathematical physics	25
Albert Einstein, Elementary derivation of the equivalence of mass and energy	39
Edward B. Van Vleck, Current tendencies of mathematical research	45
Dr. L. E. J. Brouwer, Intuitionism and formalism	55
G. D. Birkhoff, A mathematical critique of some physical theories	65

Book Reviews

Bhama Srinivasan, Editor's introduction	75
H. Poincaré (Reviewer), Poincaré's review of Hilbert's Foundations of geometry , by David Hilbert	77
J. M. Brooks (Reviewer), Vorlesungen über kontinuierliche Gruppen mit geometrischen und anderen Anwendungen , by Sophus Lie	78
R. D. Carmichael (Reviewer), Gesammelte Abhandlungen , by Sophus Lie	79
G. A. Miller (Reviewer), Theory of groups of a finite order , by W. Burnside	80
W. F. Osgood (Reviewer), Cours d'analyse mathématique , by Édouard Goursat	81
L. E. Dickson (Reviewer), Festschrift zur Feier des 100 Geburtstages Eduard Kummer mit Briefen an seine Mutter und an Leopold Kronecker	82
E. B. Van Vleck (Reviewer), Lehrbuch der Funktionentheorie , by Dr. W. F. Osgood	83
G. E. Wahlin (Reviewer), Three lectures on Fermat's last theorem , by L. J. Mordell	84
S. Lefschetz (Reviewer), The Cambridge Colloquium, 1916, Part II. Analysis Situs , by Oswald Veblen	85
G. D. Birkhoff (Reviewer), Vorlesungen über Zahlentheorie , by Edmund Landau	86
T. H. Hildebrandt (Reviewer), Leçons sur l'intégration et la recherche des fonctions primitives , by H. Lebesgue	87
B. O. Koopman (Reviewer), Dynamical systems , by G. D. Birkhoff	88
O. Ore (Reviewer), Moderne algebra , by B. L. van der Waerden	89
P. A. Smith (Reviewer), Einfachste Grundbegriffe der Topologie , by Paul Alexandroff, with an introduction by David Hilbert; Einführung in die kombinatorische Topologie , by Kurt Reidemeister; Knotentheorie , by K. Reidemeister	90
H. L. Rietz (Reviewer), Grundbegriffe der Wahrscheinlichkeitsrechnung , by A. Kolmogoroff	91

A. W. Tucker (Reviewer), Vorlesungen über die Theorie der Polyeder unter Einschluss der Elemente der Topologie , by Ernst Steinitz; edited and completed by Hans Rademacher; Lehrbuch der Topologie , by H. Seifert and W. Threlfall	92
A. W. Tucker (Reviewer), Topologie I , by Paul Alexandroff and Heinz Hopf	93
Solomon Lefschetz (Reviewer), Algebraic surfaces , by Oscar Zariski	94
J. D. Tamarkin (Reviewer), Trigonometric series , by Antoni Zygmund ...	95
R. Salem (Reviewer), Trigonometric series, 2d. ed. , by A. Zygmund	96
Hermann Weyl (Reviewer), La théorie des groupes finis et continus et la géométrie différentielle traitées par méthode du repère mobile , by Élie Cartan	96
Hermann Weyl (Reviewer), Methoden der mathematischen Physik, Vol. 2 , by R. Courant and D. Hilbert	97
E. T. Bell (Reviewer), An introduction to the theory of numbers , by G. H. Hardy and E. M. Wright	99
N. Jacobson (Reviewer), The classical groups , by Hermann Weyl	100
R. Brauer (Reviewer), The theory of group representations , by Francis D. Murnaghan	100
C. C. Torrance (Reviewer), Consistency of the axiom of choice and of the generalized continuum-hypothesis with the axioms of set theory , by Kurt Gödel	102
D. J. Struik (Reviewer), The theory and applications of harmonic integrals , by W. V. D. Hodge	102
A. H. Copeland (Reviewer), Theory of games and economic behavior , by John von Neumann and Oskar Morgenstern	103
A. Weil (Reviewer), Introduction to the theory of algebraic functions of one variable , by C. Chevalley	103
P. A. Smith (Reviewer), The theory of Lie groups, I , by Claude Chevalley	105
Oscar Zariski (Reviewer), Foundations of algebraic geometry , by André Weil	106
C. B. Allendoerfer (Reviewer), Regular polytopes , by H. S. M. Coxeter .	107
Maurice Heins (Reviewer), Funktionentheorie , by C. Carathéodory	108
J. Wolfowitz (Reviewer), An introduction to probability theory and its applications, Vol. I , by William Feller	109
N. Levinson (Reviewer), The theory of the Riemann zeta-function , by E. C. Titchmarsh	110
A. C. Schaeffer (Reviewer), Complex analysis , by L. V. Ahlfors	111
E. R. Lorch (Reviewer), Leçons d'analyse fonctionnelle , by F. Riesz and B. Sz.-Nagy	111
E. Artin (Reviewer), Éléments de mathématique , by N. Bourbaki	112
S. Mac Lane (Reviewer), Homological algebra , by Henri Cartan and Samuel Eilenberg	113
E. H. Spanier (Reviewer), Foundations of algebraic topology , by S. Eilenberg and N. Steenrod	114
S. Lang (Reviewer), Éléments de géométrie algébrique , by A. Grothendieck, rédigés avec la collaboration de J. Dieudonné	115
David A. Buchsbaum (Reviewer), Homology , by Saunders Mac Lane ...	117

Gian-Carlo Rota (Reviewer), Linear operators. Part II. Spectral theory , by Nelson Dunford and Jacob T. Schwartz, with the assistance of William G. Bade and Robert G. Bartle	118
--	-----

Vol. 37, No. 2

April 2000

Research-Expository Surveys

Curtis T. McMullen , From dynamics on surfaces to rational points on curves	119
Cathleen Synge Morawetz , Variations on conservation laws for the wave equation	141

Book Reviews

Dorian Goldfeld (Reviewer), Non-vanishing of L-functions and applications , by M. Ram Murty and V. Kumar Murty	155
Vyjayanthi Chari (Reviewer), Lectures on representation theory and Knizhnik-Zamolodchikov equations , by Pavel I. Etingof, Igor B. Frenkel, and Alexander A. Kirillov, Jr.	161
David Gluck (Reviewer), Characters and blocks of finite groups , by Gabriel Navarro	169
Steve Shkoller (Reviewer), Topological methods in hydrodynamics , by V. I. Arnold and B. A. Khesin	175
Fabrizio Catanese (Reviewer), Discriminants, resultants and multidimensional determinants , by I. M. Gelfand, M. M. Kapranov, and A. V. Zelevinsky	183
Mark A. Kon (Reviewer), Complexity and information , by J. F. Traub and A. G. Werschulz	199
Günter M. Ziegler (Reviewer), Introduction to geometric probability , by Daniel A. Klain and Gian-Carlo Rota	205
Maurice Mignotte (Reviewer), The algorithmic resolution of Diophantine equations , by Nigel P. Smart	207

Vol. 37, No. 3

July 2000

Research-Expository Surveys

William Fulton , Eigenvalues, invariant factors, highest weights, and Schubert calculus	209
P. Di Francesco , Folding and coloring problems in mathematics and physics	251
M. S. Baouendi, P. Ebenfelt, and Linda Preiss Rothschild , Local geometric properties of real submanifolds in complex space	309

Book Reviews

Andy R. Magid (Reviewer), Selected works of Ellis Kolchin , by H. Bass, A. Buium, and P.J. Cassidy (editors)	337
Ivan Mirković (Reviewer), Representation theory and complex geometry , by Neil Chriss and Victor Ginzburg	343

David Marker (Reviewer), Tame topology and o-minimal structures , by Lou van den Dries	351
J. E. Humphreys (Reviewer), Pioneers of representation theory , by Charles W. Curtis	359
Jeffrey Rauch (Reviewer), Partial differential equations , by L. C. Evans ...	363
Peter J. Olver (Reviewer), Symmetries and conservation laws for differential equations of mathematical physics , by I. S. Krasil'shchik and A. M. Vinogradov	369
Jeremy Teitelbaum (Reviewer), Fourier analysis on number fields , by D. Ramakrishnan and R. J. Valenza	373

Vol. 37, No. 4

October 2000

Research-Expository Surveys

Donald G. Saari , Note from the Editor	379
Karen Hunger Parshall , Perspectives on American mathematics	381
David Hilbert , Mathematical problems	407
W. Morris and V. Soltan , The Erdős-Szekeres problem on points in convex position – a survey	437

Book Reviews

Werner Ballmann (Reviewer), Riemannian geometry and geometric analysis , by J. Jost; Riemannian geometry , by P. Petersen; Riemannian geometry , by T. Sakai	459
Brian Parshall (Reviewer), The q-Schur algebra , by Stephen Donkin; Iwahori-Hecke algebras and Schur algebras of the symmetric group , by Andrew Mathas	467
V. Batyrev (Reviewer), Mirror symmetry and algebraic geometry , by David A. Cox and Sheldon Katz	473
Roger Cooke (Reviewer), Bernhard Riemann, 1826–1866: Turning points in the conception of mathematics , by Detlef Laugwitz	477
Lars Olsen (Reviewer), Integral, probability, and fractal measures , by G. Edgar	481
Jet Wimp (Reviewer), Special functions , by George E. Andrews, Richard Askey, and Ranjan Roy	499
Nancy K. Stanton (Reviewer), Real submanifolds in complex space and their mappings , by M. Salah Baouendi, Peter Ebenfelt, and Linda Preiss Rothschild	511

Chief Editor: Donald G. Saari

Editorial Information

As of June 30, 2000, the backlog for this journal was approximately 0 issues. This estimate is the result of reducing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the number of articles assigned to issues to be published in four months (the time necessary for editing and composing a typical issue). In an effort to make articles available as quickly as possible, articles are posted to e-MATH individually soon after proof is returned from authors and before appearing in an issue.

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. For Research-Expository Surveys and Research Reports, copies of the manuscript—three copies for Surveys and four copies for Reports—may be submitted to Professor Donald G. Saari, Department of Mathematics, Multipurpose Science and Technology Building, University of California, Irvine, Irvine, CA 92697-3875. Manuscripts may also be submitted to other members of the respective Editorial Boards, with a copy of the cover letter and of the manuscript also sent to Professor Donald G. Saari. The author should keep one copy. Research-Expository Surveys and Research Reports can also be submitted electronically in \LaTeX or \TeX to bams@math.uci.edu. *If an editor is agreeable*, an electronic manuscript prepared in \TeX or \LaTeX may be submitted by pointing to an appropriate URL on a preprint or e-print server.

For Research-Expository Surveys and Research Reports, the first page must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be a brief technical description of the new material. Then, for Research Reports

there should be an introductory section addressed to nonexperts describing the motivation, background, and significance of the results announced. Following the statement of results, there should be a sketch of proofs that may be addressed to experts. Included with the footnotes in each paper should be the 2000 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from www.ams.org/msc/. The list of classifications is also available in print starting with the 1999 annual index of *Mathematical Reviews*. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from www.ams.org/publications/. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

For Book Reviews the first page must include the title of the book being reviewed; the name(s) of the author(s); publisher; city of publication; year of publication; number of pages, including front matter; price if known; and ISBN. There should also be a footnote with the 2000 *Mathematics Subject Classification* representing the primary and secondary subjects of the book under review. The classifications are accessible from www.ams.org/msc/ and are also available in print starting with the 1999 annual index of *Mathematical Reviews*. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/.

Electronically prepared manuscripts. The AMS encourages electronically prepared manuscripts, with a strong preference for $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, the *AMS Author Handbook*, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web. Because linking must often be added manually to electronically prepared manuscripts in other forms of $\mathcal{T}\mathcal{E}\mathcal{X}$, using $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time. $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ papers also move more efficiently through the production stream, helping to minimize publishing costs.

$\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the highly preferred format of $\mathcal{T}\mathcal{E}\mathcal{X}$, but author packages are also available in $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$. Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Manuscripts prepared electronically in $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or plain $\mathcal{T}\mathcal{E}\mathcal{X}$ are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ users will find that $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the same as $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ with additional commands to simplify the typesetting of mathematics, and users of plain $\mathcal{T}\mathcal{E}\mathcal{X}$ should have the foundation for learning $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$.

Authors may retrieve an author package from e-MATH starting from www.ams.org/tex/ or via FTP to [ftp.ams.org](ftp://ftp.ams.org) (login as `anonymous`, enter username as

password, and type `cd pub/author-info`). The *AMS Author Handbook* and the *Instruction Manual* are available in PDF format following the author packages link from www.ams.org/tex/. The author package can also be obtained free of charge by sending email to pub@ams.org (Internet) or from the Publication Division, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When requesting an author package, please specify $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{T}\mathcal{E}\mathcal{X}$, Macintosh or IBM (3.5) format, and the publication in which your paper will appear. Please be sure to include your complete mailing address.

At the time of submission, authors should indicate if the paper has been prepared using $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{T}\mathcal{E}\mathcal{X}$ and provide the Editor with a paper manuscript that matches the electronic manuscript. The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the paper manuscript to the Editor, who will forward a copy to the Providence office. Editors will require authors to send their electronically prepared manuscripts to the Providence office in a timely fashion. Electronically prepared manuscripts can be sent via email to pub-submit@ams.org (Internet) or on diskette to the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When sending a manuscript electronically, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available at www.ams.org/jourhtml/graphics.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator. No matter what method was used to produce the graphic, it is necessary to provide a paper copy to the AMS.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

Secure manuscript tracking on the Web and via email. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from www.ams.org/mstrack/ or via email sent to mstrack-query@ams.org. To access by email, on the subject line of the message simply enter the AMS ID and Article ID. To track more than one manuscript by email, choose one of the Article IDs and enter the AMS ID and the Article ID followed by the word *all* on the subject line. An explanation of each production

step is provided on the Web through links from the manuscript tracking screen. Questions can be sent to bull-query@ams.org.

T_EX files available. Beginning with the January 1992 issue of the *Bulletin* and the January 1996 issues of *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS*, T_EX files can be downloaded from e-MATH, starting from www.ams.org/journals/. Authors without Web access may request their files at the address given below after the article has been published. For *Bulletin* papers published in 1987 through 1991 and for *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS* papers published in 1987 through 1995, T_EX files are available upon request for authors without Web access by sending email to file-request@ams.org or by contacting the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T_EX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet email, please include the email address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because T_EX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, T_EX files cannot be guaranteed to run through the author's version of T_EX without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author's T_EX environment.

Inquiries. Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to bull-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

Research-Expository Surveys

This section is intended for reasonably broad expository surveys of a currently active area of mathematical research. To stress this fact, the name of the section has been changed from "Research-Expository Papers" to "Research-Expository Surveys". The level of exposition is expected to be such that a graduate student—or a research mathematician from a remote area—will be able to read an article in order to get an overview of a subject. A well-written article will include motivating problems and examples, some indication of the historical development of the subject, and of course the results and open problems that make it an interesting and exciting area of mathematics. In most cases proofs should be at most briefly sketched, and there should be a good bibliography whose main aim should be helping those wishing to pursue the subject further. Usually Research-Expository Surveys will be at most 40 pages long.

Certain of the Society's Lecture Series, including the Gibbs Lectures, Colloquium Lectures, and Progress in Mathematics Lectures, traditionally appear in the Research-Expository Surveys, and those invited to give these lectures are informed of this tradition and of the above guidelines. Research-Expository Surveys are also frequently solicited by the Editorial Board, but unsolicited manuscripts are also encouraged; in particular, those invited to give invited hour addresses at meetings of the Society should consider writing up their lecture in a manner that meets the requirements of the preceding paragraph and submitting their manuscripts for consideration by the Editorial Board for the Research-Expository Surveys.

Research Reports

A Research Report is a timely, short (4–8 pages) report on a recent accomplishment in mathematical research. It should be written so as to be understandable by mathematicians who are not experts in the subject matter of the Report. The context giving significance to the research being reported on should be made clear, and the consequences or potential consequences should be described. Usually only the barest hint of the methods of proof should be given, although elements of the proof which are novel should be included. In any case, references should be given so that an interested reader can find the details. It is expected that Research Reports will frequently be written by specialists other than the individuals immediately involved in the research.

Research Reports are normally solicited by the “Editorial Board for Research Reports”. They cordially invite suggestions for topics and reporters. Unsolicited manuscripts, submitted to a member of the Editorial Board for Research Reports, will also be considered.
