Library of Congress Cataloging-in-Publication Data

Names: Maurice Auslander Distinguished Lectures and International Conference (2018 : Woods Hole, Mass.), issuing body. | Martsinkovsky, A. (Alex), editor. | Igusa, Kiyoshi, 1949- editor. | Todorov, G. (Gordana), editor.

Title: Representations of algebras, geometry and physics : Maurice Auslander Distinguished Lectures and International Conference, April 25 - 30, 2018, Woods Hole Oceanographic Institute, Woods Hole, MA / Alex Martsinkovsky, Kiyoshi Igusa, Gordana Todorov, editors.

Description: Providence, Rhode Island : American Mathematical Society, [2021] | Series: Contemporary mathematics, 0271-4132 ; volume 769 | Includes bibliographical references.

Identifiers: LCCN 2020043192 | ISBN 9781470452308 (paperback) | 9781470464257 (ebook)

Subjects: LCSH: Representations of algebras—Congresses. | Geometry, Algebraic—Congresses. | Commutative algebra—Congresses. | AMS: Commutative algebra – Theory of modules and ideals – Dimension theory, depth, related rings (catenary, etc.). | Algebraic geometry – Foundations – Generalizations (algebraic spaces, stacks). | Associative rings and algebras – Representation theory of rings and algebras – Representations of quivers and partially ordered sets. | Category theory; homological algebra | Group theory and generalizations – Special aspects of infinite or finite groups – Reflection and Coxeter groups.

Classification: LCC QA176 .M385 2018 | DDC 512/.22–dc23

Methods of constructive category theory SEBASTIAN POSUR	157
The HRS tilting process and Grothendieck hearts of t-structures CARLOS E. PARRA AND MANUEL SAORÍN	209

Preface

This volume of expository lectures is an outgrowth of the annual Maurice Auslander Distinguished Lectures and International Conference that took place April 25 - 30, 2018 at the Woods Hole Oceanographic Institute in Woods Hole, MA.

The continued – and gratefully acknowledged – support from the National Science Foundation and Bernice Auslander results in a combination of established experts and a large number of graduate students and young researchers attending the conference. Their interest and unabating enthusiasm is *raison d'être* for this series of expository works (for the previous collections, see Contemporary Mathematics, vols. 607, 673, and 716).

The selected expository lectures in this volume cover a rather wide area of research. Karin Baur and Charlie Beil introduce a new class of quiver algebras called geodesic ghor algebras which, unlike dimer algebras, exhibit good behavior on surfaces of higher genus. Ralph Kaufmann's detailed paper deals with algebraic aspects of Feynman categories, a subject that has found applications in algebra, category theory, geometry, number theory and physics. An intriguing connection between representations of quivers and Coxeter groups is discussed in Mark Kleiner's contribution. Amnon Neeman surveys the relatively new concept of approximable triangulated categories that leads to new powerful results. The question of when the heart of a t-structure is a Grothendieck category is dealt with by Carlos E. Parra and Manuel Saorín. Sebastian Posur introduces the reader to methods of constructive category theory by describing two computational examples. One deals with natural transformations between finitely presented functors and the other – with the differentials on the pages of a spectral sequence.

As we mentioned before, the primary audience for this volume are graduate students and young researchers working in and around representation theory. We believe, however, that this multifaceted volume may be of interest to a much wider audience.

The Editors

PUBLISHED TITLES IN THIS SERIES

- 769 **Alex Martsinkovsky, Kiyoshi Igusa, and Gordana Todorov, Editors**, Representations of Algebras, Geometry and Physics, 2021
- 765 **Michael Aschbacher**, Quaternion Fusion Packets, 2021
- 764 **Gabriel Cunningham, Mark Mixer, and Egon Schulte, Editors**, Polytopes and Discrete Geometry, 2021
- 763 **Tyler J. Jarvis and Nathan Priddis, Editors**, Singularities, Mirror Symmetry, and the Gauged Linear Sigma Model, 2021
- 762 **Atsushi Ichino and Kartik Prasanna**, Periods of Quaternionic Shimura Varieties. I., 2021
- 761 **Ibrahim Assem, Christof Geiß, and Sonia Trepode, Editors**, Advances in Representation Theory of Algebras, 2021
- 760 **Olivier Collin, Stefan Friedl, Cameron Gordon, Stephan Tillmann, and Liam Watson, Editors**, Characters in Low-Dimensional Topology, 2020
- 759 **Omayra Ortega, Emille Davie Lawrence, and Edray Herber Goins, Editors**, The Golden Anniversary Celebration of the National Association of Mathematicians, 2020
- 758 **Jan Šťovíček and Jan Trlifaj, Editors**, Representation Theory and Beyond, 2020
- 757 **Kaïs Ammari and Stéphane Gerbi, Editors**, Identification and Control: Some New Challenges, 2020
- 756 **Joeri Van der Veken, Alfonso Carriazo, Ivko Dimitrić, Yun Myung Oh, Bogdan D. Suceavă, and Luc Vrancken, Editors**, Geometry of Submanifolds, 2020
- 755 **Marion Scheepers and Ondřej Zindulka, Editors**, Centenary of the Borel Conjecture, 2020
- 754 **Susanne C. Brenner, Igor Shparlinski, Chi-Wang Shu, and Daniel B. Szyld, Editors**, 75 Years of Mathematics of Computation, 2020
- 753 **Matthew Krauel, Michael Tuite, and Gaywalee Yamskulna, Editors**, Vertex Operator Algebras, Number Theory and Related Topics, 2020
- 752 **Samuel Coskey and Grigor Sargsyan, Editors**, Trends in Set Theory, 2020
- 751 **Ashish K. Srivastava, André Leroy, Ivo Herzog, and Pedro A. Guil Asensio, Editors**, Categorical, Homological and Combinatorial Methods in Algebra, 2020
- 750 **A. Bourhim, J. Mashreghi, L. Oubbi, and Z. Abdelali, Editors**, Linear and Multilinear Algebra and Function Spaces, 2020
- 749 **Guillermo Cortiñas and Charles A. Weibel, Editors**, K -theory in Algebra, Analysis and Topology, 2020
- 748 **Donatella Danielli and Irina Mitrea, Editors**, Advances in Harmonic Analysis and Partial Differential Equations, 2020
- 747 **Paul Bruillard, Carlos Ortiz Marrero, and Julia Plavnik, Editors**, Topological Phases of Matter and Quantum Computation, 2020
- 746 **Erica Flapan and Helen Wong, Editors**, Topology and Geometry of Biopolymers, 2020
- 745 **Federico Binda, Marc Levine, Manh Toan Nguyen, and Oliver Röndigs, Editors**, Motivic Homotopy Theory and Refined Enumerative Geometry, 2020
- 744 **Pieter Moree, Anke Pohl, L'ubomír Snoha, and Tom Ward, Editors**, Dynamics: Topology and Numbers, 2020
- 743 **H. Garth Dales, Dmitry Khavinson, and Javad Mashreghi, Editors**, Complex Analysis and Spectral Theory, 2020
- 742 **Francisco-Jesús Castro-Jiménez, David Bradley Massey, Bernard Teissier, and Meral Tosun, Editors**, A Panorama of Singularities, 2020
- 741 **Houssam Abdul-Rahman, Robert Sims, and Amanda Young, Editors**, Analytic Trends in Mathematical Physics, 2020
- 740 **Alina Bucur and David Zureick-Brown, Editors**, Analytic Methods in Arithmetic Geometry, 2019
- 739 **Yaiza Canzani, Linan Chen, and Dmitry Jakobson, Editors**, Probabilistic Methods in Geometry, Topology and Spectral Theory, 2019

This volume contains selected expository lectures delivered at the 2018 Maurice Auslander Distinguished Lectures and International Conference, held April 25–30, 2018, at the Woods Hole Oceanographic Institute, Woods Hole, MA.

Reflecting recent developments in modern representation theory of algebras, the selected topics include an introduction to a new class of quiver algebras on surfaces, called “geodesic ghor algebras”, a detailed presentation of Feynman categories from a representation-theoretic viewpoint, connections between representations of quivers and the structure theory of Coxeter groups, powerful new applications of approximable triangulated categories, new results on the heart of a t -structure, and an introduction to methods of constructive category theory.
