# A Course in Mathematical Analysis

By EDOUARD GOURSAT, Professor of Mathematics in the University of Paris. Authorized translation by E. R. HEDRICK, Professor of Mathematics, and OTTO DUNKEL, Instructor in Mathematics, University of Missouri.

**VOLUME I** 548 pages, with diagrams, \$4.00.

**VOLUME II Part 1. Theory of Functions of a Complex Variable.** *In press.*

**Part 2. Theory of Differential Equations.**

*In press.*

Volume I treats the subjects studied in a second course in calculus in American colleges and universities and prepares the way for the study of the higher branches of analysis—notably differential equations and the theory of functions. Volume II, issued in two separately bound parts (each of which corresponds to an American college course), covers the theory of functions of a complex variable and the theory of differential equations.
