The American Mathematical Monthly

OFFICIAL JOURNAL OF

The Mathematical Association of America

is the Only Journal of Collegiate Grade in
The Mathematical Field in this Country

This means that its mathematical contributions can be read
and understood by those who have not specialized in mathematics
beyond the Calculus.

The Historical Papers, which are numerous and of high
grade, are based upon original research.

The Questions and Discussions, which are timely and inter­
testing, cover a wide variety of topics.

The Book Reviews embrace the entire field of collegiate
and secondary mathematics.

The Curriculum Content in the collegiate field is care­
fully considered. Good papers in this line have appeared and
are now in type awaiting their turn.

The Notes and News cover a wide range of interest and
information both in this country and in foreign countries.

The Problems and Solutions hold the attention and ac­
tivity of a large number of persons who are lovers of mathe­
matics for its own sake.

There are other journals suited to the secondary field,
and there are still others of technical scientific character in
the University field: but the MONTHLY is the only journal of
Collegiate grade in America suited to the needs of the non­
specialist in mathematics.
