

Do you belong in IBM Applied Science?

This Consulting Job is now open!

Promoted only a short time ago, this man formerly worked as an IBM Applied Science Special Representative for the petroleum industry in Houston. Such service to the oil companies has become virtually essential. This man, for instance, counseled petroleum scientists and executives in the application of digital computers for exploration, production, and refining. He organized conferences and directed seminars . . . advising on coding systems and techniques. In addition to his other duties, he coordinated IBM contacts nationally with the petroleum industry in technical areas.

Could you fill it?

Rewarding careers are open to men with degrees in:

- Chemistry
- Mathematics
- Economics
- Physics
- Engineering
- Statistics

A previous knowledge of computing is not necessary. IBM will pay for your training.

Throughout the United States, IBM maintains approximately 100 Applied Science offices. You may request assignment in the location that is most desirable to you.

IBM Applied Science has quadrupled its staff during the past three years. In 1956, over 70 promotions were conferred. Doesn't this growth factor alone suggest more room for your abilities—more professional growth?

Why not act today? Write, outlining the details of your background and interests, to:

P. H. Bradley, Dept. 10605
International Business Machines Corp.
590 Madison Avenue
New York 22, New York

Responsibilities:

- Advise customers and prospects of the scientific and technical applications of IBM electronic equipment.
- Analyze customers' technical problems in terms of machines and their applications.
- Deliver talks about the computing field—supported by demonstrations—to customers, prospects, scientific groups, and IBM personnel.
- Maintain constant and close contact with the customers' top management and associated IBM executives.
- Continually analyze customer applications and develop new machine uses.
- Arrange for training of customers' executives, methods analysts, and operators of IBM electronic equipment.

150 YEARS OF PUBLISHING

LOOKING FORWARD

Robert Fulton's marvelous steamboat
fired the minds of forward-looking men
when she churned up the Hudson
in 1807.

To the House of Wiley, founded that same year,
the *Clermont's* voyage opened up
a new and exciting frontier in publishing.

If America were to exploit her new industrial age,
pioneering books would have to be provided.
It is this demand — greater in 1957 than ever —
that Wiley has been meeting successfully
for one hundred and fifty years.

Today, the *Clermont's* atom-powered granddaughter
slips through the seas . . .
the scientific community continues to expand . . .
and, planning for the future,

John Wiley & Sons looks forward to publishing
an ever-greater number of distinguished books
in all areas of pure and applied science.

JOHN WILEY & SONS, Inc.

440 Fourth Avenue, New York 16, N. Y.

WILEY

BOOKS

VECTOR ANALYSIS

By Louis Brand, *University of Cincinnati*. Furnishes the basic tools of vector algebra and calculus and gives an introduction to their applications. 1957. 282 pages. \$6.00.

VECTOR SPACES AND MATRICES

By Robert M. Thrall, *University of Michigan*; and Leonard Tornheim, *California Research Corporation*. Offers a dual approach to the subject—the concrete approach via matrices and the intrinsic approach via linear transformation. 1957. 318 pages. Prob. \$7.00

IRRATIONAL NUMBERS

By Ivan Niven, *University of Oregon*. Collects material on the subject which hitherto has been scattered in the literature and discusses fully the irrationality of the numbers of elementary analysis. 1956. 164 pages. \$3.00

PRINCIPLES AND TECHNIQUES OF APPLIED MATHEMATICS

By Bernard Friedman, *New York University*. Combines in one volume both abstract theory and practical applications of linear operators. A Publication in the Wiley Applied Mathematics Series, I. S. Sokolnikoff, Editor. 1956. 315 pages. \$8.00.

STATISTICAL ANALYSIS OF STATIONARY TIME SERIES

By Ulf Grenander, *University of Stockholm*; and Murray Rosenblatt, *Indiana University*. The first full-length treatment of the statistical theory of spectral analysis of stochastic processes. A Wiley Publication in Statistics, Walter A. Shewhart and S. S. Wilks, Editors. 1956. 300 pages. \$11.00.

SCIENTIFIC FRENCH

A Concise Description of the Structural Elements of Scientific and Technical French. By William N. Locke, *The Massachusetts Institute of Technology*. 1957. 112 pages. \$2.25.

SCIENTIFIC GERMAN

A Concise Description of the Structural Elements of Scientific and Technical German. By George E. Condoyannis, *Saint Peter's College*. 1957. 163 pages. \$2.50.

Design and Analysis of Multi-factor Experiments in Reliability Analysis of LARGE ROCKET ENGINES

Here at ROCKETDYNE, the nation's leading producer of high-thrust rocket engine systems, we are penetrating deeply into the complexities of a new dimension of propulsive power. This is a challenging and rewarding field for the creative statistician.

Increased demand for higher power levels and shorter project completion schedules gives vital importance to proficiency in design and analysis of multi-factor experiments. The work also involves the formulation of theories which describe basic relations in the field of Missile Reliability. Complex interrelationships among

technological advances, environmental barriers, material deterioration, engineering achievement and human deficiencies call for new approaches in reliability analysis techniques.

The most advanced digital computers, including the 704, are available. Should you desire it, you can be provided with valuable training in Computer Programming, on company time. Because of strong management support, this work offers excellent opportunity for advancement, as well as professional recognition beyond the ordinary.

WRITE: Mr. A. W. Jamieson, Rocketdyne Engineering Personnel Dept. BA-5,
6633 Canoga Avenue, Canoga Park, California

ROCKETDYNE

A DIVISION OF NORTH AMERICAN AVIATION, INC.

BUILDERS OF POWER FOR OUTER SPACE

Announcing A *NEW* expanded program for the translation and publication of four leading Russian physics journals. *Published* by the American

Institute of Physics with the cooperation and support of the National Science Foundation.

Soviet Physics—Technical Physics. A translation of the "Journal of Technical Physics" of the Academy of Sciences of the U.S.S.R. 12 issues per year, approximately 4,000 Russian pages. Annually, \$90.00 domestic.

Soviet Physics—Acoustics. A translation of the "Journal of Acoustics" of the Academy of Sciences of the U.S.S.R. Four issues per year, approximately 500 Russian pages. Annually, \$20.00 domestic. The 1955 issues of "Journal of Acoustics" U.S.S.R. will also be published. Will consist of two volumes, approximately 500 pages, and the subscription price will be \$20.00 for the set.

Soviet Physics—Doklady. A translation of the "Physics Section" of the Proceedings of the Academy of Sciences of the U.S.S.R. Six issues per year, approximately 900 Russian pages. Annually \$25.00 domestic.

Soviet Physics—JETP. A translation of the "Journal of Experimental and Theoretical Physics" of the Academy of Sciences of the U.S.S.R. Twelve issues per year, approximately 2,600 Russian pages. Annually \$60.00 domestic. Back issues of Volume I and II are available.

All journals are to be complete translations of the 1956 issues of their Russian counterparts. The number of pages to be published represents the best estimate based on all available information now at hand.

Translated by competent, qualified scientists, the publications will provide all research laboratories and libraries with accurate and up-to-date information of the results of research in the U.S.S.R.

VOLUME XXXVII

STRUCTURE OF RINGS

by **NATHAN JACOBSON**

In his preface, the author points out that a number of important developments have recently taken place in the theory of non-commutative rings. These include the structure theory of rings without finiteness assumptions, cohomology of algebras, and structure and representation theory of non-semi-simple rings. The main purpose of this volume is to give an account of the first of these developments.

MEMOIRS XXII

A GLOBAL FORMULATION
OF THE LIE THEORY OF
TRANSFORMATION
GROUPS

by

RICHARD S. PALAIS

In this volume the classical theory of Sophus Lie, which connects Lie algebras of vector fields on a differentiable manifold with local groups acting on the manifold, is reformulated in terms of the concepts of the modern global approach to differential geometry and Lie groups.

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings, with abstracts of all research papers presented. It contains some of the officially invited addresses presented before the Society, and reviews of advanced mathematical books.

The subscription price is \$7.00 per annual volume of six numbers.

Invited addresses offered for publication should be sent to B. J. PERTIS, Department of Mathematics, Tulane University, New Orleans 18, La.; Research problems to G. B. PRICE, Department of Mathematics, University of Kansas, Lawrence, Kan.; Book reviews to J. C. OXTOBY, Bryn Mawr College, Bryn Mawr, Pa. All other communications to the editors should be addressed to the Managing Editor, G. B. PRICE.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length.

The subscription price is \$11.00 per annual volume of six numbers.

Papers in algebra, number theory, logic and foundations should be sent to IRVING KAPLANSKY, Eckhart Hall, University of Chicago, Chicago 37, Ill.; in geometry and topology to HANS SAMELSON, Department of Mathematics, University of Michigan, Ann Arbor, Mich.; in probability, real variables and abstract analysis to SHIZUO KAKUTANI, Leet Oliver Memorial Hall, Yale University, New Haven 11, Conn.; in other branches of analysis, applied mathematics, and all other fields to R. P. BOAS, Lunt Building, Northwestern University, Evanston, Ill. All other communications to the editors should be addressed to the Managing Editor, R. P. BOAS.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Three volumes of two numbers each will be published in 1957. The subscription price is \$8.00 per volume.

Papers in geometry, differential equations and functions of complex variables should be sent to S. S. CHERN, Department of Mathematics, University of Chicago, Chicago 37, Ill.; in algebra and number theory to A. H. CLIFFORD, Cotuit, Cape Cod, Mass.; in analysis (except for differential equations and functions of a complex variable), applied mathematics and probability to Professor MARK KAC, White Hall, Cornell University, Ithaca, New York; in topology, logic and foundations to W. S. MASSEY, Department of Mathematics, Brown University, Providence 12, R. I. All other communications to the editors should be addressed to the Managing Editor, W. S. MASSEY.

Memoirs of the American Mathematical Society

This series is devoted to the publication of research monographs in pure and applied mathematics. The memoirs are issued serially, but not periodically. Each issue consists of either a single monograph or a group of cognate papers and is priced separately according to size and cost of publication. The editorial standards for acceptance are the same as for the TRANSACTIONS and manuscripts intended for publication should be submitted to the appropriate editor of the TRANSACTIONS. All other communications to the editors should be addressed to S. S. CHERN.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

MATHEMATICAL REVIEWS is published monthly, excepting July. The subscription price is \$35.00 per annual volume of eleven numbers.

OFFICIAL COMMUNICATIONS

MEETINGS OF THE SOCIETY

Abstracts for all meetings of the Society should be sent to the American Mathematical Society, 190 Hope St., Providence 6, R. I.

PULLMAN, WASHINGTON, June 15, 1957.

Abstracts must be received not later than May 2. By invitation of the Committee to Select Hour Speakers for Far Western Sectional Meetings there will be an address by Professor M. M. Day entitled *Rotundity and smoothness*.

SUMMER MEETING, UNIVERSITY PARK, PENNSYLVANIA, August 26–30, 1957.

Abstracts must be received not later than July 12. Professor N. E. Steenrod will deliver the Colloquium Lectures. By invitation of the Committee to Select Hour Speakers for Western Sectional Meetings there will be an address by A. P. Calderón entitled *Singular integrals and differential equations*.

WASHINGTON, D. C., October 26, 1957.

Abstracts must be received not later than September 12.

J. W. GREEN, *Secretary of the Society*
