

IBM extends the range of programming

Are you interested in exploring
the capabilities of the computer?

Some of the most important programming developments are taking place now at IBM.

The broad scope of work underway at IBM offers important advantages to members of our professional programming staff. They have the opportunity to work on projects taken from the broad range of programming. They are face to face with the frontiers of applied, scientific and administrative programming.

Here are some areas you might work in if you were a programmer at IBM: theory of computing . . . artificial intelligence . . . simulation systems . . . scheduling methodology . . . communications control systems . . . space systems . . . and the design of total computer systems.

At IBM, you would find yourself in the kind of atmosphere that encourages accomplishment. You would help to design new hardware systems. You would work side by side with men of eminent professional stature: scientists, engineers and mathematicians who pioneer in the research

and development that make new computing systems possible.

What's more, you would be able to give your projects the time they deserve. Time for thinking. Time for achievement.

The scope of programming at IBM stimulates professional growth. It offers possibilities which merit serious consideration whether you are a master of the skills of programming or a relative newcomer to the field. Salaries and benefits at IBM are excellent. If you have experience in scientific or commercial programming, we would like to acquaint you with the wide range of responsible positions on our programming staff.

Programming facilities are located in plants and laboratories throughout the country. IBM is an Equal Opportunity Employer. For further details, please write, outlining your background and interests, to: Manager of Professional Employment, IBM Corporation, Dept. 529W, 590 Madison Ave., New York 22, N. Y.

MATHEMATICAL SURVEYS

**Published by
THE AMERICAN
MATHEMATICAL SOCIETY**

<i>Volume</i>	<i>List Price</i>
1. J. A. Shohat and J. D. Tamarkin, <i>The problem of moments</i> , 1943; reprinted 1960, xiv, 144 pp.	\$5.80
3. Morris Marden, <i>The geometry of the zeros of a polynomial in a complex variable</i> , 1949, x, 183 pp.	5.00
4. O. F. G. Schilling, <i>The theory of valuations</i> , 1950, viii, 253 pp.	6.00
5. Stefan Bergman, <i>The kernel function and conformal mapping</i> , 1950, viii, 161 pp.	4.00
6. C. C. Chevalley, <i>Introduction to the theory of algebraic functions of one variable</i> , 1951, xii, 188 pp.	4.00
7. (1) A. H. Clifford and C. B. Preston, <i>The algebraic theory of semi-groups</i> , 1962, xvi, 224 pp.	10.60

The price to members of the American Mathematical Society is 25% less than list

Chinese Mathematics ACTA

This is a cover-to-cover translation into English of Acta Mathematica Sinica, published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics. Starting with volume 1, 1960 (available in July, 1962), Chinese Mathematics will appear quarterly or as published. Volume 1 will have three issues; volume 2 four issues. About 650 pages a year.

ILLINOIS JOURNAL OF MATHEMATICS

A quarterly journal of basic research in pure and applied mathematics published by the University of Illinois, Urbana.

edited by

REINHOLD BAER • PAUL T. BATEMAN
D. G. BOURGIN • S. S. CHERN
A. H. TAUB • GEORGE W. WHITEHEAD

The subscription price is \$9.00 a volume (four numbers); this is reduced to \$5.00 for individual members of the American Mathematical Society. Subscriptions should be sent to the University of Illinois Press, Urbana, Illinois.

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$7.00 per annual volume of six numbers.

Research Problems and Invited Addresses offered by publication should be sent to WALTER RUDIN, Department of Mathematics, University of Wisconsin, Madison, Wisconsin; Book Reviews to FELIX BROWDER, Department of Mathematics, Yale University, New Haven, Connecticut. Research Announcements offered for publication should be sent to some member of the Council of the Society, and communicated by him to E. E. MOISE, Graduate School of Education, Harvard University, Cambridge 38, Massachusetts. All other communications to the editors should be sent to the Managing Editor, E. E. MOISE.

The members of the Council for 1962 are: H. A. Antosiewicz, P. T. Bateman, E. G. Begle, Lipman Bers, H. W. Bode, Raoul Bott, Felix Browder, R. C. Buck, P. E. Conner, M. M. Day, J. L. Doob, Eldon Dyer, Arthur Erdélyi, William Feller, G. E. Forsythe, A. M. Gleason, J. W. Green, P. R. Halmos, G. A. Hedlund, M. H. Heins, L. A. Henkin, M. R. Hestenes, Edwin Hewitt, A. S. Householder, G. B. Huff, G. A. Hunt, Nathan Jacobson, Fritz John, P. D. Lax, R. C. Lyndon, L. Markus, W. S. Massey, H. P. McKEAN, JR., A. E. Meder, Jr., E. E. Moise, Deane Montgomery, R. S. Phillips, R. S. Pierce, Everett Pitcher, Alex Rosenberg, Walter Rudin, I. M. Singer, E. H. Spanier, J. D. Swift, C. B. Tompkins, S. M. Ulam, J. V. Wehausen, George Whaples, J. W. T. Youngs, Daniel Zelinsky, Antoni Zygmund.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

The subscription price is \$11.00 per annual volume of six numbers.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Department of Mathematics, Cornell University, Ithaca, New York or GEORGE WHAPLES, Department of Mathematics, Indiana University, Bloomington, Indiana; in probability, real variables, logic, and foundations to P. R. HALMOS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan; in abstract analysis to either P. R. HALMOS or ALEX ROSENBERG; in geometry and topology to ELDON DYER, Eckhart Hall, University of Chicago, Chicago 37, Illinois; in other branches of analysis, applied mathematics, and all other fields to M. H. HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois or FRITZ JOHN, Courant Institute of Mathematical Sciences, 4 Washington Place, New York 3, New York. All other communications to the editors should be addressed to the Managing Editor, ALEX ROSENBERG.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1962. The subscription price is \$8.00 per volume.

Papers in analysis and applied mathematics should be sent to LIPMAN BERS, Courant Institute of Mathematical Sciences, New York University, New York, New York; in topology to W. S. MASSEY, Department of Mathematics, Yale University, Box 2155, Yale Station, New Haven, Connecticut; in algebra, number theory, and logic to DANIEL ZELINSKY, Department of Mathematics, Northwestern University, Evanston, Illinois; in geometry and abstract analysis to I. M. SINGER, Department of Mathematics, Massachusetts Institute of Technology, Cambridge 39, Massachusetts; in statistics and probability to H. P. McKEAN, JR., Department of Mathematics, Massachusetts Institute of Technology, Cambridge 39, Massachusetts. All other communications to the editors should be addressed to the Managing Editor,

W. S. MASSEY.

Journals Published by the American Mathematical Society

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the **DOKLADY AKADEMII NAUK SSSR** in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the **SOVIET DOKLADY**. (The **DOKLADY AKADEMII Nauk SSSR** is issued three times a month, six issues constituting a volume.)

Rates per annual volume are as follows: Domestic subscriptions, \$17.50; foreign subscriptions, \$20.00. Single issues are \$5.00.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

The publication of **MATHEMATICAL REVIEWS** was begun in 1940. Starting in 1961, it appears monthly, in two parts. Prior to 1961 it appeared in eleven single issues. Orders for complete volumes only are accepted. Volumes 1–21 are available at the following prices: Vols. 1–16 (1940–1955), \$42.00 each; all other volumes \$50.00. In 1962, it will be published in two volumes; the price of each volume will be \$50.00.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

The subscription price is \$7.00 per annual volume.

All communications should be addressed to the Editor, 190 Hope Street, Providence 6, Rhode Island. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A Journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields. Published by the Society for the National Academy of Sciences-National Research Council.

Subscription price is \$8.00 per volume of 4 issues. Single copies are \$2.50.

Chinese Mathematics—Acta

This is a cover-to-cover translation into English of *Acta Mathematica Sinica* published by Academia Sinica Peking, People's Republic of China. *Acta Mathematica Sinica* contains current research in all fields of pure mathematics. Volume 1, 1960 will have three issues (issue no. 1 was published in July, 1962); volume 2 will have four issues. Subscription price per volume \$20.00.
