INDEX TO VOLUME 78

RESEARCH ANNOUNCEMENTS

Allan, N. D. Hecke rings of congruence subgroups, 541.
Amdursky, V. The existence of solutions to classical variational problems without assuming convexity, 394.
Anderson, D. R. Generalized product theorems for torsion invariants with applications to flat bundles, 465.
Andre, Michel. Nonnoetherian complete intersections, 724.
Baernstein, Albert II. Proof of Edre's spread conjecture, 277.
Baouendi, M. S. and Goulaouic, C. Nonanalytic-hypoellipticity for some degenerate elliptic operators, 483.
Batt, Jürgen. Strongly additive transformations and integral representations with measures of nonlinear operators, 474.
Baumslag, Gilbert. On finitely presented metabelian groups, 279.
Berger, M. S. On Hermitian structures of prescribed nonpositive Hermitian scalar curvature, 734.
Birman, J. S. and Hilden, H. M. Isotopies of homeomorphisms of Riemann surfaces and a theorem about Artin's braid group, 1002.
Bott, R. and Haefliger, A. On characteristic classes of \( \Gamma \)-foliations, 1039.
Bougerol, D. G. Set valued transformations, 597.
Brezin, Jonathan. See Auslander, Louis.
Brooks, J. K. Weak compactness in the space of vector measures, 284.
Brosowski, Bruno and Deutsch, Frank. Some new continuity concepts for metric projections, 974.
Browder, F. E. Generalizations of accretivity for nonlinear mappings of Banach spaces, 93.
Brown, Marianne. Constructing isotopies in noncompact 3-manifolds, 461.
Campbell, D. M. Majorization-subordination theorems for locally univalent functions, 535.
Cappell, S. E. and Shaneson, J. L. Submanifolds, group actions and knots. II, 1049.
Chang, B. C. Which abelian groups can be fundamental groups of regions in Euclidean spaces?, 470.
Chang, Theodore and Skjelbred, Tor. Group actions on Poincaré duality spaces, 1024.
Chapman, T. A. Characterizing shapes of compacta, 847.
Chen, B.-Y. Surfaces with parallel mean curvature vector, 709.
Chen, B.-Y. and Ludden, G. D. Rigidity theorems for surfaces in euclidean space, 72.
Chernoff, P. R. Nonassociative addition of unbounded operators and a problem of Brezis and Pazy, 562.
Clark, D. N. Extending Fourier transforms into Sz.-Nagy-Foiaş spaces, 65.
Coffee, J. P. Filtered and associated graded rings, 584.
Csordas, G. L. and Reiter, H. B. Some results on separating function algebras, 578.
Dennis, R. K. and Stein, M. R. A new exact sequence for $K_2$ and some consequences for rings of integers, 600.
DeMar, R. F. Multiple expansions in series of Boas and Buck polynomials, 550.
Deutsch, Frank. See Brosowski, Bruno.
Dickson, L. J. Estimates for the Szegö and Poisson kernels of sufficiently rounded tube domains, 844.
Dlab, Vlastimil and Ringel, C. M. Balanced local rings with commutative residue fields, 771.
Duvall, P. F., Jr. and Husch, L. S. Taming irregular sets of homeomorphisms, 77.
Edelstein, Michael. The construction of an asymptotic center with a fixed-point property, 206.
Eilert, L. Q. Nonseparating function algebras, 604.
Eisenbud, David and Evans, E. G., Jr. Basic elements: Theorems from algebraic K-theory, 546.
Elliott, R. J. and Kalton, N. J. Values in differential games, 427.
Evans, E. G., Jr. See Eisenbud, David.
Faith, Carl. Galois subrings of Ore domains are Ore domains, 1077.
Fitzpatrick, P. M. A-proper mappings and their uniform limits, 806.
Foucart, Charles. Pure, normal maximal subfields for division algebras in the Schur subgroup, 810.
Freese, Ralph. Varieties generated by modular lattices of width four, 447.
Garland, Howard. p-adic curvature and a conjecture of Serre, 259.
Geoghegan, Ross and Sumnerhill, R. R. Infinite-dimensional methods in finite-dimensional geometric topology, 1009.
Gersten, S. M. On the spectrum of algebraic K-theory, 216.
Gerstenhaber, Murray. The fundamental form of a finite purely inseparable field extension, 717.
Gilbert, R. P. and Hile, G. N. Generalized hyperanalytic function theory, 998.
Goguen, J. A. Minimal realization of machines in closed categories, 777.
Goldstein, Carl. Galois subrings of Ore domains are Ore domains, 1077.
Goldstein, Charles. The $\mathcal{F}$-matrix associated with nonselfadjoint differential operators, 411.
Goldstein, L. J. Relative imaginary quadratic fields of low class number, 80.
Gordon, W. B. Physical variational principles which satisfy the Palais-Smale condition, 712.
Gorostiza, L. G. A central limit theorem for a class of d-dimensional random motions with constant speed, 575.
Gossez, J.-P. Boundary value problems for quasilinear elliptic equations with rapidly increasing coefficients, 753.
Goulaouic, C. See Baouendi, M. S.
Griess, R. and Schur multipliers of the known finite simple groups, 68.
Grönwall, T. H. An inverse problem for Gaussian processes, 615.

On the existence of a “Wave Operator” for the Boltzmann equation, 759.
Guillemin, Victor. A remark on strong pseudoconvexity for elliptic operators, 432.
———. Remarks on some results of Gelfand and Fuks, 539.
Haeffiger, A. See Bott, R.
Hajnal, A. and Juhasz, I. Two consistency results in topology, 711.
Hansell, R. W. On the nonseparable theory of Borel and Souslin sets, 236.
Harary, Frank. See Chvátal, Václav.
Harte, Robin. The spectral mapping theorem in several variables, 871.
Hatcher, A. E. The second obstruction for pseudo-isotopies, 1005.
Helton, J. W. Jordan operators in infinite dimensions and Sturm Liouville conjugate point theory, 57.
Herrero, D. A. and Salinas, Norberto. Operators with disconnected spectra are dense, 525.
Hilden, H. M. See Birman, J. S.
Hile, G. N. See Gilbert, R. P.
Hilton, Peter, Mislin, Guido, and Roitberg, Joseph. Topological localization and nilpotent groups, 1060.
Hoffman, D. A. Surfaces in constant curvature manifolds with parallel mean curvature vector field, 247.
Howland, J. S. Perturbation of embedded eigenvalues, 280.
Huckleberry, A. T. and Nirenberg, Ricardo. On a class of complex spaces intermediate to Stein and compact, 852.

Husch, L. S. See Duvall, P. F., Jr.

Iarrobino, A. Punctual Hilbert schemes, 819.

Iitaka, Shigeru. On algebraic varieties whose universal covering manifolds are complex affine 3-spaces, 737.

Jaworowski, J. W. Extensions of maps in spaces with periodic homeomorphisms, 527.

Jensen, C. U. On Ext 0(A, R) for torsion-free A, 831.

Johnson, Jerry. Lipschitz function spaces for arbitrary metrics, 702.

Johnson, Kenneth and Wallach, N. R. Composition series and intertwining operators for the spherical principal series, 1053.

Jones, Lowell. The converse to the fixed point theorem of P. A. Smith, 234.

———. Three characteristic classes measuring the obstruction to PL local unknottedness, 979.

Juhasz, I. See Hajnal, A.

Kahn, D. S. and Priddy, S. B. Applications of the transfer to stable homotopy theory, 981.

Kalton, N. J. See Elliott, R. J.

Karell, M. L. Fourier coefficients of certain Eisenstein series, 828.

Karlin, Samuel. On a class of best nonlinear approximation problems, 43.

Kazdan, J. L. and Warner, F. W. Curvature functions for 2-manifolds with negative Euler characteristic, 570.

Kim, Ohoe. A representation of a positive linear mapping, 568.

Kinderlehrer, David. How a minimal surface leaves an obstacle, 969.

Knebusch, Manfred, Rosenberg, Alex and Ware, Roger. Signatures on semilocal rings, 62.

Knopfmacher, John. Finite modules and algebras over Dedekind domains and analytic number theory, 193.

Kra, I. and Maskit, B. Involutions on Kleinian groups, 801.

Kronk, H. V. and Mitchem, John. The entire chromatic number of a normal graph is at most seven, 799.

Kueker, D. W. Löwenheim-Skolem and interpolation theorems in infinitary languages, 211.

Lambek, J. Localization and completion, 582.

Laplaza, M. L. Coherence for categories with associativity, commutativity and distributivity, 220.

Laudenbach, F. On the 2-sphere in a 3-manifold, 792.

Lazarov, Connor and Wasserman, Arthur. Cobordism of U(n)-actions, 1035.

Lazarov, Connor and Wasserman, Arthur. Cobordism of U(n)-actions, 1035.

Leg.Constants and p.l. structures on spherical fibrations, 1064.

Lewis, D. C. A generalized Möbius inversion formula, 558.

Lewis, P. W. See Brooks, J. K.

Ludden, G. D. See Chen, B.-Y.

Mcauley, J. F. A topological Reeb-Milnor-Rosen theorem and characterizations of manifolds, 82.

Marcus, Moshe. A radial averaging transformation, capacity and conformal radius, 456.

Marcus, Moshe and Mizel, V. J. Functional composition on Sobolev spaces, 38.

Margolis, H. R. On the realizability of modules over the Steenrod algebra, 564.

Maskit, B. See Kra, I.

Milgram, R. J. On the Haefliger knot groups, 861.

Mislin, Guido. See Hilton, Peter.

Mitchem, John. See Kronk, H. V.

Mizel, V. J. See Marcus, Moshe.

Moreno, C. J. Prime number theorems for the coefficients of modular forms, 796.
