CORRIGENDUM, VOLUME 80

G. I. Lehrer, Weil representations and cusp forms on unitary groups, pp. 1137—1141.

In the section (§5) on applications of Theorem A of [1], the statement of Corollary 2, p. 1140 is stronger than what is yielded by the argument outlined in the succeeding discussion.

It should be replaced by

Corollary 2. For n odd, we have $\sum_{u \in R} J_n(u) = 0$ for $R$ the unipotent radical of any proper parabolic subgroup of $U_n$.
