CONTENTS

S. K. PICHORIDES. A remark on exponential sums.......................................................... 283
JIH-MIN SHYR. Class numbers of totally positive binary forms over totally real number fields.......................................................... 286
S. LANG AND H. TROTTER. Primitive points on elliptic curves................................. 289
MICHAEL COWLING. The Kunze-Stein phenomenon...................................................... 293
HECTOR J. SUSSMANN. An interpretation of stochastic differential equations as ordinary differential equations which depend on the sample point.......................... 296

COUNCIL
PUBLICATIONS COMMITTEES*

Hyman Bass (18), Alexandra Bellow (46, 47), Carl-Wilhelm R. deBoor (41, 65), James H. Bramble (65, 38), Thomas A. Chapman (57A, 57C), S. S. Chern (53), Philip T. Church (54, 55, 57, 58), Ronald G. Douglas (46, 47), Samuel Eilenberg (18, 68), Solomon Feferman (02A-K, 04, 18A), Robert M. Fossum (12, 13, 14, 16, 18), Walter Gautschi (65D, F, L, Q), Richard R. Goldberg (40, 42, 43, 44, 46J), Paul R. Halmos (02, 04, 15, 28, 46, 47), William J. LeVeque (10, except 10D), D. J. Lewis (10), R. James Milgram (18, 55, 57), Richard K. Miller (33, 35, 46, 77), Barbara L. Osofsky (16, 18, 13), Maxwell A. Rosenlicht (12, 12H05, 14, 15, 20G), Jacob T. Schwartz (68, 93, 94), Robert T. Seeley (35, 33, 46, 47), Stephen S. Shatz (14, 13, 12), I. M. Singer (46, 53, 58), Elias M. Stein (22E30, 26, 35, 42, 44), Daniel W. Stroock (60, 62), Olga Taussky Todd (12, 15), Hans F. Weinberger (35, 45, 49), Joseph A. Wolf (22, 53), John W. Wrench, Jr. (10.25, 33, 65.05, 65.25).

OTHER MEMBERS OF THE COUNCIL

*Research announcements meeting the standards and limitations described at the beginning of the Research Announcement section may be submitted to the members of the Publications Committees listed above. The numbers indicate the fields of specialization of the communicators in terms of the AMS(MOS) Subject Classification Scheme used in the Mathematical Reviews Subject Index.

CONTENTS

March, 1977

L. CARLITZ. Functions and correspondences in a finite field................................. 139
WILHELM STOLL. Aspects of value distribution theory in several complex variables 166

BOOK REVIEWS

WILLIAM P. HANF. Large infinitary languages, model theory by M. A. Dickmann........ 184
JON BARWISE. An algebraic introduction to mathematical logic by Donald W. Barnes and John M. Mack; An outline of mathematical logic by Andrzej Grzegorczyk; Completeness, compactness, and undecidability by Alfred B. Manaster; and Mathematical logic by Daniel Ponasse................................................................. 186
V. LAKSHMIKANTHAM. Introduction to spectral theory: Selfadjoint ordinary differential operators by B. M. Levitan and I. S. Sargsjan.............................. 188
AUBERT DAIGNEAULT. Logic in algebraic form by William Craig; and An algebraic approach to non-classical logics by Helena Rasiowa........... 189
J. KAMPÉ DE FERIET. On measures of information and their characterizations by J. Aczél and Z. Daróczy................................................................. 192
ROBERT FEFFERMAN. Differentiation of integrals in $\mathbb{R}^n$ by Miguel de Guzmán... 196
J. R. ISBELL. Invariants for real-generated uniform topological and algebraic categories by Kevin A. Broughan................................................................. 200
JAMES KEESLING. Dimension theory of general spaces by A. R. Pears..................... 203
ERRETT BISHOP. Elementary calculus by H. Jerome Keisler.................................. 205
RICHARD BEALS. Basic linear partial differential equations by Francois Treves........ 208
K. R. GOODEARL. Simple Noetherian rings by John Cozzens and Carl Faith........... 211
JAMES A. JENKINS. Univalent functions – selected topics by Glenn Schober.......... 215
M. EDELSTEIN. Embeddings and extensions in analysis by J. H. Wells and L. R. Williams................................................................. 220
J. F. ADAMS. A geometric approach to homology theory by S. Buoncristiano, C. P. Rourke and B. J. Sanderson................................................................. 222
V. S. VARADARajan. Foundations of quantum physics by C. Piron.......................... 226
PETER A. LOEB. Non-archimedean fields and asymptotic expansions by A. H. Lightstone and A. Robinson................................................................. 231
KARL H. HOFMANN. Representations of commutative semitopological semigroups by Charles F. Dunkl and Donald E. Ramirez.............................................. 236
ROBERT J. ELLIOTT. Pursuit games by Otmar Hájek.............................................. 243

RESEARCH ANNOUNCEMENTS

S. A. AMITSUR AND LANCE W. SMALL. Prime PI-rings............................................. 249
R. A. HERB AND P. J. SALLY JR. Singular invariant eigendistributions as characters 252
S. D. FREDEARL. Simple Noetherian rings by H. Jerome Keisler.................................. 205
H. G. DALES AND J. ESTERLE. Discontinuous homomorphisms from $C(X)$........... 255
RICHARD D. BYRD, JUSTIN T. LLOYD, FRANKLIN D. PEDERSEN AND JAMES W. STEPP. Automorphisms of semigroups of complexes of Abelian groups........... 260
ABRAHAM BERMAN AND ROBERT C. WARD. Stability and semipositivity of real matrices................................................................. 262
FRANK GERTH, III. The Hasse norm principle for Abelian extensions of number fields................................................................. 264
S. RALLIS AND G. SCHIFFMANN. Discrete spectrum of the Weil representation........ 267
S. RALLIS AND G. SCHIFFMANN. Automorphic cusp forms constructed from the Weil representation................................................................. 271
G. S. WELLS. Spaces of smooth functions on analytic sets................................... 276
LOUIS PIGNO. Parts of measures of integer-valued transforms................................ 279
SELMAN AKBULUT AND HENRY C. KING. Real algebraic variety structures on P. L. manifolds................................................................. 281
