

JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

TRANSLATION JOURNALS

Soviet Mathematics–Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR.

Mathematics of the USSR–Izvestija, a bimonthly journal is a cover-to-cover translation of IZVESTIJA AKADEMII NAUK SSSR SERIJA MATEMATIČESKAJA.

Mathematics of the USSR–Sbornik is a monthly journal and is a cover-to-cover translation of MATEMATIČSKI SBORNIK (NOVAJA SERIJA).

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of the TEORIJA VEROJATNOSTEĬ I MATEMATIČESKAJA STATISTIKA.

Vestnik of the Leningrad University (Mathematics) is the complete translation into English of the mathematics section of the VESTNIK LENINGRADSKOGO UNIVERSITETA.

Transactions of the Moscow Mathematical Society is a translation into English of TRUDY MOSKOVSKOGO MATEMATIČESKOGO OBSČESTVA.

Proceedings of the Steklov Institute of Mathematics is a translation of the PROCEEDINGS OF THE STEKLOV INSTITUTE OF MATHEMATICS IN THE ACADEMY OF SCIENCES OF THE USSR.

RESEARCH JOURNALS

Submission information for these journals is included in the May and September issues of this *Bulletin*.

Bulletin (New Series) of the American Mathematical Society. Contains Research-Expository Papers, Research Announcements and Reviews of Books on Advanced Mathematics.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS.

OTHER JOURNALS

Current Mathematical Publications, issued biweekly, contains a subject-classified index of papers and books being published currently in mathematics.

Mathematical Reviews is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. A one-year subscription consists of twelve regular issues plus a midyear and an annual author/subject index.

BULLETIN (New Series) of the American Mathematical Society

EDITORS

EDITORIAL BOARD FOR RESEARCH-EXPOSITORY ARTICLES

Hyman Bass	Irving Kaplansky
Felix E. Browder	Peter Lax
Chairman	John W. Milnor
S. S. Chern	Hugh L. Montgomery
Frederick W. Gehring	Gian-Carlo Rota

EDITORIAL BOARD FOR RESEARCH ANNOUNCEMENTS

Charles L. Fefferman	Calvin C. Moore
Melvin Hochster	Chairman
Robert P. Langlands	David Mumford
Richard K. Lashof	Gian-Carlo Rota
Henry P. McKean, Jr.	I. M. Singer
	François Trèves

BOOK REVIEW EDITOR:	Meyer Jerison
MANAGING EDITOR:	Felix E. Browder

MANUSCRIPT, PROOF AND COPYING INFORMATION

SUBMISSION OF MANUSCRIPT

Articles submitted for publication should be typewritten and double spaced. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification can be found in the December index volumes of *Mathematical Reviews*.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the authors upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, copies are sent to the author who is designated to receive galley proof. Authors are urged to return the form immediately to prevent delays in processing and publishing of the manuscript. The 1978 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

PUBLICATION CHARGES

Research Announcements carry a page charge of \$40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

REPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (For details write Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970.)

ABCDEFGHIJ-RRD-898765432

RESEARCH — EXPOSITORY PAPERS

The mathematical approach to the sonic barrier by <i>Cathleen Synge Morawetz</i>	127
Poincaré and algebraic geometry by <i>Phillip A. Griffiths</i>	147
Problems on abelian functions at the time of Poincaré and some at present by <i>Jun-ichi Igusa</i>	161
Poincaré and Lie groups by <i>Wilfried Schmid</i>	175
The Cauchy-Riemann equations and differential geometry by <i>R. O. Wells, Jr.</i>	187
Graeme Segal's Burnside ring conjecture by <i>J. Frank Adams</i>	201

RESEARCH ANNOUNCEMENTS

A Π_1 factor with two nonconjugate Cartan subalgebras by <i>A. Connes and V. Jones</i>	211
The multiplicity of eigenvalues by <i>Peter D. Lax</i>	213
Lorentzian forms for the Leech lattice by <i>J. H. Conway and N. J. A. Sloane</i>	215
A note on a problem of Saff and Varga concerning the degree of complex rational approximation to real valued functions by <i>S. W. Ellacott</i>	218
Finite linear groups whose ring of invariants is a complete intersection by <i>Victor Kac and Kei-ichi Watanabe</i>	221

BOOK REVIEWS

Emmy Noether, 1882–1935 by <i>Auguste Dick</i> , translated by <i>H. I. Blocher</i> —Reviewed by <i>Hans Zassenhaus</i>	224
Product integration by <i>John D. Dollard and Charles N. Friedman</i> —Reviewed by <i>Michael A. Freedman</i>	230
Nonnegative matrices in the mathematical sciences by <i>Abraham Berman and Robert J. Plemmons</i> —Reviewed by <i>Charles R. Johnson</i>	233
Minimal factorization of matrix and operator functions by <i>H. Bart, I. Gohberg and M. A. Kaashoek</i> —Reviewed by <i>J. William Helton</i>	235
Spline functions: Basic theory by <i>Larry L. Schumaker</i> —Reviewed by <i>Joseph W. Jerome</i>	238
Polylogarithms and associated functions by <i>Leonard Lewin</i> —Reviewed by <i>Richard Askey</i>	248
