INDEX, Volume 16 1283

The *Notices* of the American Mathematical Society is published by the American Mathematical Society, 321 South Main Street, P. O. Box 6248, Providence, Rhode Island 02904 in January, February, April, June, August, October, November and December. Price per annual volume is $10.00. Price per copy $3.00. Special price for copies sold at registration desks of meetings of the Society, $1.00 per copy. Subscriptions, orders for back numbers (back issues of the last two years only are available) and inquiries should be addressed to the American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904. Second class postage paid at Providence, Rhode Island, and additional mailing offices.

FOREWORD

This is the eleventh annual Special Issue of these *Notices*. This year the Special Issue contains a list of assistantships and fellowships available in mathematics, a selected list of stipends, articles on the tax status of grants, and an index of abstracts.

The list of assistantships and fellowships available in mathematics for 1970-1971 includes 412 departments of mathematics, statistics, computer science, and related mathematical disciplines, representing 324 universities and colleges. Colleges and universities have been grouped alphabetically within states, with Canadian institutions listed at the end.

The Special Issue is published as a service to the mathematical community, and in the past it has evoked enthusiastic response from both students and mathematics departments. The Society wishes to express its appreciation to those individuals associated with the institutions listed in this issue for their kind and generous help in assembling this information.

ASSISTANTSHIPS AND FELLOWSHIPS IN MATHEMATICS IN 1970-1971

TYPE of financial assistance (with number anticipated in 1970-1971)	STIPEND Amount (dollars)	9 or 12 mo.	TUITION if not included in stipend	SERVICE REQUIRED Hrs/Week	Type

ALABAMA

Auburn University

AUBURN, ALABAMA 36830
L.P. Burton, Head
Department of Mathematics
Applications must be filed by February 10, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 2863
Baccalaureate Degrees by Department: 89
Master's Degrees by Department: 17

PH.D. Degrees awarded during last three years by field specialization: Algebra and Number Theory, 3; Geometry and Topology, 3; Analysis and Functional Analysis, 4; Probability and Statistics, 1; Applied Mathematics, 1; TOTAL: 12

Teaching Assistantship (40)	2520-4800	9	$120/qtr.	5-10	Teaching or Equivalent
NASA, NSF Traineeship (10)	2400-2800*	12			
NDEA Fellowship (3)	2400**	12			

* Plus dependency allowance and possible supplement for teaching.
** Plus dependency allowance.

Auburn University

AUBURN, ALABAMA 36830
Leland H. Williams, Director
Computer Center
Applications must be filed by March 15, 1970

PH. D. Degrees awarded during last three years by field of specialization: Algebra and Number Theory, 3; Geometry and Topology, 3; Analysis and Functional Analysis, 4; Probability and Statistics, 1; Applied Mathematics, 1. TOTAL: 12

Research Assistantship (3)	5220-6240		$120/qtr.	26	Research in info. proc.
Computer Service (5)	2340-3000	9	$120/qtr.	13	Programming, Consulting, etc.

University of Alabama in Birmingham

BIRMINGHAM, ALABAMA 35233
Arthur C. Segal, Acting Chairman
Department of Mathematics
Applications must be filed by June 1, 1970

Teaching Assistantship (5-10)	2500	9		5	Teaching

TYPE of financial assistance (with number anticipated in 1970-1971)	STIPEND Amount (dollars)	9 or 12 mo.	TUITION if not included in stipend	SERVICE REQUIRED Hrs/Week	Type

University of Alabama in Birmingham

BIRMINGHAM, ALABAMA 35233
B.J. Trawinski, Director
Graduate Program in Biostatistics
Applications must be filed by February 1, 1970

Fellowship (6) *	2400-2800	9	+tuition	None	
Research Assistantship (2)	2500-3000	12		part-time acad. yr. full-time summer	
Summer Fellowships (3)	amount variable		+tuition		

*Certain fellowships have dependents' allowances.

University of Alabama in Huntsville

HUNTSVILLE, ALABAMA 35807
J. Hoomani, Chairman
Department of Mathematics
Applications must be filed by March 1, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 107
Baccalaureate Degrees by Department: 20
Master's Degrees by Department: 7

Teaching Assistantship	2700 (plus tuition & fees)	9		6	Teaching

University of Alabama, Tuscaloosa

UNIVERSITY, ALABAMA 35486
Robert L. Plunkett, Head
Department of Mathematics
Applications must be filed by February 15, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 2282
Baccalaureate Degrees by Department: 100
Master's Degrees by Department: 21

PH.D. Degrees awarded during last three years by field of specialization: Geometry and Topology, 3; Analysis and Functional Analysis, 8; Computer Science and Numerical Analysis, 1; Applied Mathematics, 9; TOTAL: 21

Fellowship (8)	2400-2800	12		NONE	NONE
Teaching Fellowship (6)	4000-4000	9	$212.50/sem	6	Teaching
Teaching Assistantship (30)	2350-3150	9	$212.50/sem	6	Teaching
Research Assistantship*					
Scholarship (4)	1750-2000	9	$212.50/sem	NONE	NONE

* Unknown at time of preparation.

ALASKA

University of Alaska

COLLEGE, ALASKA 99701
Robert W. Brown, Head
Department of Mathematics
Applications must be filed by May 1, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 214
Baccalaureate Degrees by Department: 3
Master's Degrees by Department: 2

Teaching Assistantship (6)	3150-3600	9	$200/yr	4	Teaching

TYPE of financial assistance (with number anticipated in 1970-1971)	STIPEND Amount (dollars)	9 or 12 mo.	TUITION if not included in stipend	SERVICE REQUIRED Hrs/Week	Type

ARIZONA

Arizona State University

TEMPE, ARIZONA 85281
Nevin Savage, Chairman
Department of Mathematics

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 3029
Baccalaureate Degrees by Department: 39
Master's Degrees by Department: 14

PH. D. Degrees awarded during last three years by field of specialization: Algebra and Number Theory, 6; Geometry and Toplogy, 7; Logic, 2; Analysis and Functional Analysis, 2; Differential Equations, 1. TOTAL: 18

Fellowship (8)	2400-2800*	12			
Teaching Assistantship (49)	2800-3500	9	$160/sem.	6	Teaching
Scholarship (10)	Out of State Fees				

* Supplementary Teaching may be available.

Northern Arizona University

FLAGSTAFF, ARIZONA 86001
Charles E. Little, Chairman
Department of Mathematics
Applications must be filed by March 15, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 900
Baccalaureate Degrees by Department: 23
Master's Degrees by Department: 13

Teaching Assistantship (6)	2250	9	res. $272 non. $862	10	Tutorial

Note on tuition: all graduate assistants pay fees of $272 per year. Some waivers of non-resident fees (an extra $590 per year) are granted-generally all our non-resident G.A.'s receive these waivers.

University of Arizona

TUCSON, ARIZONA 85721
Paul C. Fife, Chairman
Department of Mathematics
Applications must be filed by March 15, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 2950
Baccalaureate Degrees by Department: 38
Master's Degrees by Department: 32

PH. D. Degrees awarded during last three years by field of specialization: Algebra and Number Theory, 1; Geometry and Topology, 7; Logic, 1; Analysis and Functional Analysis, 5; Probability and Statistics, 1; Applied Mathematics, 5. TOTAL: 20

Fellowship (6)	2000-3000	9-12			
Teaching Assistantship (60)	2400-3600	9-12		18	Teaching, etc.
Research Assistantship (10)	2400-3600			18	Research, etc.
Scholarship Tuition (6)					

ARKANSAS

Arkansas State University

STATE UNIVERSITY, ARKANSAS 72467
J. L. Linnstaedter, Division Chairman
Division of Mathematics and Physics
Applications must be filed by April 1, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 817
Baccalaureate Degrees by Department: 45
Master's Degrees by Department: 5

Fellowship (2)	2400-3000	9	$300		
Teaching Assistantship (6)	2400-3000	9	$300

PASADENA, CALIFORNIA 91109
Marshall Hall, Jr., Chairman
Department of Mathematics
Applications must be filed by February 1, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 157
Baccalaureate Degrees by Department: 22
Master's Degrees by Department: 4

PH. D. Degrees awarded during last three years by field of specialization: Algebra and Number Theory, 10; Geometry and Topology, 1; Analysis and Functional Analysis, 6; Probability and Statistics, 1; Computer Science and Numerical Analysis, 2. TOTAL: 20

Fellowship (11)	2400-2800	12	
Teaching Fellowship (5)	3400-3800	12	4 class hrs.
Teaching Assistantship (11)	2500-3000	9	4 class hrs.
Research Assistantship (2)	3000-3630	12	15 acad. yr/ 30 summer
Scholarship	2425		

The University of Arizona
Department of Mathematics

Enjoy the scenic southwest with its mild climate and abundant outdoor activities while studying mathematics at the University of Arizona.

The Department of Mathematics at the University of Arizona has received a generous Science Development Grant from the National Science Foundation. Funds from this grant will be used to establish graduate fellowships and to acquire special prominent lecturers who will conduct seminars for the benefit of the faculty and especially the graduate students. This seminar program will include the following topics: hydrodynamics, bifurcation, and stability theory (*Spring, 1970*); abstract harmonic analysis (*Fall, 1970*); near rings, rings, and group theory (*Fall, 1970*); fixed point theory (*Spring, 1971*). Graduate and research assistantships and some additional fellowships are also available.

The department is now located in its own new, ultra-modern building which includes computer and library facilities for graduate instruction. Masters and doctoral programs are offered in a variety of pure and applied fields, including differential equations, algebra, number theory, topology, probability and statistics, analysis, functional analysis, continuum mechanics, and numerical analysis.

Application for assistantships and fellowships should be made prior to March 15. Applications for admission and any financial support may be obtained by writing to:

Professor Paul C. Fife, Acting Head
or
Professor P. K. Bhattacharya
Department of Mathematics
University of Arizona
Tucson, Arizona 85721

TYPE of financial assistance (with number anticipated in 1970-1971)	STIPEND Amount (dollars)	9 or 12 mo.	TUITION if not included in stipend	SERVICE REQUIRED Hrs/Week	Type

THE CLAREMONT COLLEGES

Claremont Graduate School was awarded an N.S.F. Departmental Development Grant to develop a new Ph.D. program in mathematics. This grant makes possible a number of fellowships. C.G.S. offers the Ph.D. in 14 fields and the M.A. in 23 fields. Claremont Men's College, Harvey Mudd College, Pitzer College, Pomona College, and Scripps College have long been known for the quality of their faculties and graduates. The following members of the Graduate Faculty in Mathematics (C.G.S. mathematicians and most of those at the other Claremont Colleges) are grouped by major fields of interest, with the institution of their Ph.D. indicated.

Algebra: B. Beechler (Iowa), G. Bradley (Caltech), M. Henriksen (Wisconsin), J. Lucke (Duke), A. Pixley (Berkeley). *Analysis*: S. Busenberg (Ill. Inst. Tech.), J. Ferling (U.S.C.), E. Fickas (Berkeley), H. Hamilton (Brown), E. Tolsted (Brown), A. White (Stanford). *Functional Analysis*: S. Grabiner (Harvard), R. Ives (U. Wash.), R. C. James (Caltech), H. Mullikin (Wisconsin), G. Orland (Berkeley). *Differential Equations*: R. Borrelli (Berkeley), C. Coleman (Princeton), K. Cooke (Stanford). *Geometry and Topology*: J. Greever (Virginia), R. Williamson (Berkeley), P. Yale (Harvard). *Probability and Statistics*: D. Bentley (Stanford), H. Krieger (Caltech), J. Myhre (Stockholm), H. M. Walker (Columbia). *Number Theory*: L. Durst (Caltech). *Computer Science*: F. Weingarten (Oregon State). *Philosophy of Mathematics*: G. Henry (C.G.S.). *Visiting Professors and Guest Lecturers for 1969-71*: R. D. Anderson, Mary Cartwright, E. Hewitt, W. Jurkat, J. Kelley, V. Klee, J. Korevaar, W. A. J. Luxemburg.

PH.D. Degrees awarded during last three years by field of specialization: TOTAL: 56

Fellowship (5)	2650-5000	12	Yes	None Required	
Teaching Assistantship (8) (pre-M.S.)	8400	12	Yes	13*	Teaching
Research Assistantship (12) (pre-M.S.)	8400	12	Yes	13*	Research
Research Associateship (8) (pre-doctoral)	11000	12	(partial)	13*	Research

* Appointments normally made on a one-third time basis.

Georgia Southern College

STATESBORO, GEORGIA 30458
Earl Lavender, Acting Head
Department of Mathematics

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 925
Baccalaureate Degrees by Department: 42

Research Assistantship (5)	1900-2100	9	$90	10	

TYPE of financial assistance (with number anticipated in 1970-1971)	STIPEND Amount (dollars)	9 or 12 mo.	TUITION if not included in stipend	SERVICE REQUIRED Hrs/Week	Type

Georgia State University

ATLANTA, GEORGIA 30303
Jan List Boal, Head
Department of Mathematics
Applications must be filed by May 1, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 1095
Baccalaureate Degrees by Department: 73
Master's Degrees by Department: 3

Teaching Assistantship (3)	2200-2400	9	$7 per qt. hr.	10	Teaching one course or equivalent

University of Georgia

ATHENS, GEORGIA 30602
J.G. Horne, Head
Department of Mathematics

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 3269
Baccalaureate Degrees by Department: 78
Master's Degrees by Department: 5

PH.D. Degrees awarded during last three years of field of specialization: Algebra and Number Theory, 2; Geometry and Topology, 9; Analysis and Functional Analysis, 1; Applied Mathematics, 1. TOTAL: 13

Teaching Assistantship (30)	2600-4000	9 mo.	$159/qtr.		5-8
Research Assistantship (15)	2400-3200	9/12	$159/qtr.	12	
Scholarship (10)	2400-2800	9 mo.			

West Georgia College

CARROLLTON, GEORGIA 30117
C.R. Pittman, Acting Head
Department of Mathematics

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 432
Baccalaureate Degrees by Department: 11

Teaching Assistantship (5)	2000	9	must pay	5	Teaching

HAWAII

University of Hawaii

HONOLULU, HAWAII 96822
Herbert S. Bear, Jr., Chairman
Department of Mathematics
Applications must be filed by February 1, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 1590
Baccalaureate Degrees by Department: 50
Master's Degrees by Department: 2

Teaching Assistantship (15)	3300-3800	9	exempt	6	Teaching
Part-time Instructor (3)	3800-5000	9	partly exempt	6	Teaching

TYPE of financial assistance (with number anticipated in 1970-1971)	STIPEND Amount (dollars)	9 or 12 mo.	TUITION if not included in stipend	SERVICE REQUIRED Hrs/Week	Type

IDAHO

Idaho State University

POCATELLO, IDAHO 83201
John Hilzman, Chairman
Department of Mathematics
Applications must be filed by March 15, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 560
Baccalaureate Degrees by Department: 12
Master's Degrees by Department: 6

Teaching Assistantship (5)	2200-2300	9	None	5	Teaching

University of Idaho

MOSCOW, IDAHO 83843
Howard E. Campbell, Head
Department of Mathematics
Applications must be filed by February 15, 1970

NUMBER OF DEGREES AWARDED IN 1969
Baccalaureate Degrees by Institution: 1108
Baccalaureate Degrees by Department: 26
Master's Degrees by Department: 10

PH.D. Degrees awarded during last three years by field of specialization: Geometry and Topology, 1.
TOTAL: 1

Teaching Assistantship (13)	2200-3000	9		6	Teaching
Scholarship (2)	500	9	$500		
NASA, NSF	2400*-2800*				

*plus dependency allowance

Ph. D. PROGRAM AT HAWAII

STARTS SEPTEMBER, 1970

T. A.'s $3300—$3800

TUITION EXEMPT

A number of half-time instructorships are available for suitably qualified advanced Ph. D. candidates:

$3,800—$5,000

WRITE: **Department of Mathematics**
University of Hawaii
Honolulu, Hawaii 96822

LOUISIANA POLYTECHNIC INSTITUTE

The Mathematics Department of Louisiana Polytechnic Institute offers the B.S., M.S. and Ph.D. degrees.

The mathematics faculty, including Ph.D.'s in Analysis, Algebra, Geometry, Topology, Probability, and Statistics, is experienced, competent and personally interested in its students.

The Mathematics Department which is housed in a new building has a calculator laboratory furnished with new electronic desk calculators. Computer facilities consist of an IBM 1620 and an IBM 360.

Fifteen assistantships and part-time teaching jobs are available and range in pay from $1800 to $3000 for nine months. Apply by February 1 to W. B. Temple, Head, Department of Mathematics, Ruston, Louisiana, 71270.

Baltimore, Maryland 21228

UNIVERSITY OF MARYLAND

DEPARTMENT OF MATHEMATICS

The Department of Mathematics offers strong programs leading to the M. A. and Ph. D. degrees in the fields of Algebra, Applied Mathematics, Real and Complex Function Theory, Functional Analysis, Geometry, Logic, Number Theory, Numerical Analysis, Probability, Statistics and Topology. The M. A. is offered under either a thesis or a non-thesis option.

The courses offered are numerous and varied. Approximately 115 graduate and advanced undergraduate courses are given each year. Many of these are selected topics courses. More than ten seminars meet regularly, and one or more weekly colloquia attract visiting mathematicians from all parts of the world.

Opportunities for financial aid are ample. Under a grant from the National Science Foundation, the Department of Mathematics now offers annually fifteen Graduate Fellowships at $3600 to qualified beginning graduate students and eight Senior Fellowships at $4000 to advanced students. Fellowships from various government agencies and private organizations, and research assistantships, as well as about 125 teaching assistantships, are also available.

INSTITUTE FOR FLUID DYNAMICS AND APPLIED MATHEMATICS

Many students working for a degree in the area of applied mathematics find their thesis advisers from among the faculty of the Institute for Fluid dynamics and Applied Mathematics. The faculty of the Institute, while engaged primarily in research, teach many courses in the Mathematics Department and conduct various specialized seminars. The fields of applied mathematics in which the Institute is particularly well represented include partial differential equations, ordinary differential equations, control theory, numerical analysis, and approximation theory.

COMPUTER SCIENCE CENTER

As an independent academic unit of the University, the Center offers M. S. and Ph. D. degrees in Computer Science.

Specialization is possible in the areas of numerical analysis; theory of computability; automata theory; programming languages; systems programming; picture processing and pattern recognition; automation and simulation of computer design; information storage; retrieval and dissemination; and mathematical and computational linguistics.

The Center provides computing service for all academic activities at the University. Present computer equipment includes a UNIVAC 1108 and an IBM 7094 as well as low and high speed remote terminals distributed over the University's College Park, Baltimore and Catonsville campuses.

SPECIAL EVENTS

Year in Several Complex Variables	1969-70
— includes many related colloquia and seminars, culminating with:	
International Conference in Several Complex Variables	April 6-17, 1970
Year in Topological Dynamics	1970-71
— includes a large number of related meetings and seminars.	
International Conference on Approximation Theory and Related Topics	October 26-30, 1970

The University of Maryland campus is only 8 miles from downtown Washington, with its many cultural and scholarly institutions, such as the Library of Congress. In addition, the concentration of government and industry in the Washington-Baltimore area creates a considerable demand for skilled mathematicians and computer scientists.

See the University of Maryland's listings for further details on financial aid. For further information and application forms write to:

WESTERN MICHIGAN UNIVERSITY
GRADUATE STUDY IN MATHEMATICS

The Department has 65 graduate students currently enrolled in programs leading to the regular M.A. (Mathematics), M.S. (Statistics), and Ph.D. degree, and also to the rather unique Specialist in Arts (Sp.A.) degree. This latter degree is designed for the preparation of liberal arts college and community college mathematics teachers. It involves a year of course work beyond the M.A. level and an expository thesis. The M.A. and Sp.A. programs conform rather closely to C.U.P.M. recommended guidelines for the First and Advanced Graduate Components.

Advanced graduate course work is available, and active faculty research is being pursued, in the following fields: algebra, analysis, graph theory, number theory, probability, and topology. All of these are possible concentration areas for Ph.D. or Sp.A. candidates.

Substantial student financial support is available under graduate assistantships, fellowships, and N.S.F. Traineeships.

UNIVERSITY OF MISSOURI-KANSAS CITY
GRADUATE STUDY IN MATHEMATICS
1970-1971

The University of Missouri-Kansas City offers the Master of Arts, Master of Science and Doctor of Philosophy degrees in mathematics. The doctoral program was initiated in the fall of 1967 and evolved from a master's program offered for seventeen years. Doctoral research is now being conducted in point-set topology, complex analysis, and ring theory.

The Linda Hall Library of Science and Technology, one of the finest science libraries in the nation with a separate endowment of twenty-five million dollars, is adjacent to our campus. Linda Hall Library has an outstanding mathematical collection including subscriptions to more than 300 current mathematical journals. The University has full access to its holdings and services.

The Department of Mathematics invites applications for graduate assistantships with stipends starting at $3,150 for nine months. Fees, amounting to $445 per year, are not included in these stipends.

Some NSF traineeships and NDEA Title IV fellowships will be available, and each applicant for a graduate assistantship will be considered for these awards.

WASHINGTON UNIVERSITY

Graduate Study Leading to the Degrees of:

M. S. in Applied Mathematics and Computer Science
D. Sc. in Applied Mathematics and Computer Science

Fields of Study:
Applied Analysis
Computer Science
Numerical Analysis
Operations Research
Probability and Statistics

Financial Assistance: Fellowships and Traineeships Providing Tuition Remission and a Stipend of $2,500.

Inquiries should be addressed to:

Professor Leon Cooper, Chairman
Department of Applied Mathematics and Computer Science
School of Engineering and Applied Science
Washington University
St. Louis, Missouri 63130

TYPE of financial assistance (with number anticipated in 1970-1971)	STIPEND Amount (dollars)	9 or 12 mo.	TUITION if not included in stipend	SERVICE REQUIRED Hrs/Week	Type

RUTGERS UNIVERSITY

THE STATE UNIVERSITY OF NEW JERSEY

GRADUATE FELLOWSHIPS AND ASSISTANTSHIPS IN MATHEMATICS
SPECIAL THREE-YEAR RESEARCH ASSISTANTSHIPS FOR OUTSTANDING STUDENTS
STIPEND: $4100 per year plus tuition

Additional three-year Research Assistantships with stipends of $3183 per year plus tuition are available. Fellowships are awarded by the Mathematics Department under traineeship programs sponsored by the National Science Foundation, the National Defense Education Act, and the National Aeronautics & Space Administration. Teaching Assistantships are available: the stipend will be $3183 plus tuition. Assistantships require five hours per week of teaching or its equivalent. Scholarships providing free tuition are also available.

GRADUATE PROGRAM

A full program in mathematics is offered leading to the M.S., M.S.T., and Ph.D. degrees. Rutgers has received a National Science Foundation Science Development Grant to develop a center of excellence in mathematics. The department sponsors some 150 seminars each year, many of which are presented by visiting specialists. The mathematics library contains approximately 10,000 volumes and receives more than 260 journals of interest to mathematicians. This collection will be housed in the new Mathematical Sciences building presently under construction.

Applications for admission will be accepted until July 15, 1970. Students desiring financial support should submit their applications before March 1, 1970. For information and application forms, write to

The Doctoral Program in Mathematics
of
The City University of New York

is at the Graduate Center Building of CUNY in mid-Manhattan, opposite the Public Library and Bryant Park. This program is now in its sixth year.

Advanced students have office space and others have carrels in the excellent departmental library. The student body is small enough to facilitate close contact with the staff.

Currently, the staff consists of Eldon Dyer, Executive Officer; Louis Auslander, Michel L. Balinski, Charles Barton, Edgar A. Feldman, Alex Heller, Alan J. Hoffman (Adjunct), Raymond Hoobler, Harvey M. Hyman, Richard E. Isaac, Stanley Kaplan, Linda Keen, Joseph Lewittes, Martin Moskowitz, Burton Randol, Richard Sacksteder, Robert Schatten, Raymond Smullyan, Fred Supnick, Alphonse T. Vasquez, Leo Zippin.

For a description of courses currently offered and other information, write to the

ADELPHI UNIVERSITY
GARDEN CITY, N.Y. 11530

The Department of Mathematics offers work in pure and applied mathematics leading to the M.S. and Ph.D. degrees. Fields of research are: analysis, numerical analysis, differential and integral equations, homological algebra, group theory, differential topology, category theory, applied mathematics (fluid dynamics, celestial mechanics, elasticity theory, electromagnetic theory, magnetohydrodynamics).

The M.S. Degree is also offered in Applied Science. An In-Service N.S.F. Institute offers courses which lead to the M.S. for high school teachers of mathematics. A computing center (CDC 3300) is available.

Applications for graduate scholarships, assistantships and transeeships are invited. Full-time graduate students have ample opportunity for close personal contact with the faculty. Living accomodations are available near the campus. Adelphi University is within easy (40 minutes) commuting distance from New York City by car or by train.

STATE UNIVERSITY OF NEW YORK
AT
BINGHAMTON

The Mathematics Department of the State University of New York at Binghamton is growing rapidly, and can now offer graduate students both an unusual amount of personal attention from an active faculty and a lively research atmosphere. A number of research seminars in algebra, analysis, and topology are in current operation. Doctoral research is possible in the fields of algebra, differential equations, functional analysis, graph theory, and topology. The department is especially strong in general topology.

Further information about the program may be obtained by writing to The Department of Mathematics.

FINANCIAL AID

SPECIAL FELLOWSHIPS AND GRADUATE ASSISTANTSHIPS WITH STIPENDS UP TO $3,250 PLUS REMISSION OF TUITION ARE AVAILABLE. SOME PART-TIME INSTRUCTORSHIPS WITH CONSIDERABLY HIGHER STIPENDS ARE ALSO HELD BY GRADUATE STUDENTS.

New York State residents may qualify for awards for graduate study at The State University of New York at Binghamton under the New York State Scholar Incentive Award program. For information and application forms, write to Regents Examination and Scholarship Center, State Education Department, Albany, New York, 12201.

Application forms for admission to the Graduate School and for Assistantships and Fellowships may be obtained from the Graduate Admissions Office, State University of New York at Binghamton, Binghamton, New York, 13901.

RESEARCH ASSOCIATESHIPS IN MATHEMATICS

1970-71

We invite applications for Research Associateships in mathematics. These are one-year appointments with possible renewal for a second year. Stipends: $10,000 for the academic year. Teaching load: two courses one semester and full-time research for one semester.

Applicants should have received the Ph.D. degree in mathematics by September, 1970. For information, write to: Professor L. F. McAuley, Department of Mathematics. Deadline for applications is March 15, 1970.

An urban university in a suburban setting...within easy travel distance of some of the world's richest cultural and research resources.

The Mathematics faculty is actively engaged in research relating to fluid dynamics, diffraction theory, graph theory, statistics, operations research, ordinary differential equations, control theory, functional analysis, point set topology, and elasticity.

Graduate work leading to the Master of Arts is offered in both pure and applied mathematics.

Approximately twelve graduate assistantships will be available for the academic year 1970-71.

Interested students are requested to write:

OREGON STATE UNIVERSITY CORVALLIS, OREGON

Oregon State University at Corvallis has programs leading to the M.A., M.S., and Ph.D. degrees in mathematics.

The present research interests of the faculty in pure mathematics are algebraic and differential topology, differential geometry, Riemann surfaces, partial differential equations, convex sets, approximation theory, singular integral operators, harmonic analysis, ergodic theory, operator theory, number theory and matrix theory. Those in applied mathematics are integral equations, numerical analysis, information theory, computer science, mathematical physics, and nonlinear continuum mechanics.

Financial Aid is available in the form of graduate assistantships and fellowships.

DREXEL INSTITUTE OF TECHNOLOGY

TThe Drexel Mathematics Department offers graduate programs leading to the M. S. and Ph. D. degrees. In addition to the regular masters' degree program is a cooperative M. S. program with cooperating industries during the summers. The Ph. D. program is primarily concentrated in the areas of analysis and applied mathematics. Financial aid is available through teaching and research assistantships, fellowships, and traineeships which carry stipends from $2,475 to $3,600 and a waiver of tuition and fees.

Interested applicants should request further information from:

Research Assistantship (75)	2200-2600 2600	9	tuition pd.	20 hrs.	Res. Asst. to Project

Various other fellowships and scholarships, some supported by industrial organization, carrying stipends of different amount in addition to tuition.

TEMPLE UNIVERSITY ... PHILADELPHIA

offers an M.A. and Ph.D. program in Mathematics with specialization in Probability and Mathematical Statistics, in addition to its existing programs in Pure Mathematics.

A limited number of assistantships and fellowships is available.

UNIVERSITY OF SOUTH CAROLINA

The Department of Mathematics has available for the 1970-71 academic year approximately forty assistantships, from $2,800 to $3,600, requiring five or six hours per week of classroom teaching or an equivalent amount of service in the department, including assistance with some graduate courses. A limited number of larger stipends, requiring additional work, may be given to capable and highly motivated students whose financial needs prevent their progressing with the usual work-study ratio. Tuition for graduate assistants is $30 per semester.

The programs offered lead to the Master of Arts in Teaching Mathematics, Master of Mathematics, Master of Arts, Master of Science and Doctor of Philosophy degrees. The student's program of study is arranged after individual consultation; the master's program, in particular, is adaptable to a variety of objectives. Doctoral research direction is available in algebra, analysis, topology, logic and foundations. Careful attention will be given to initial advicement and to starting each student in a program commensurate with his training and competence.

Completed applications should be in the graduate school office by March 1. All inquiries are welcome and should be sent to:

TEXAS A & M UNIVERSITY

The Mathematics Faculty invites interested persons to inquire about its graduate program leading to the M. S. or Ph. D. degrees.

Fields: Algebra, Analysis, Functional Analysis, Numerical Analysis, Topology

Financial Assistance: Fellowships and Assistantships granted by the Department carry stipends ranging from $2700 to $3150 for nine months, non-resident tuition waived. Apply before July 15, 1970.

Some NSF, NASA, and NDEA grants are available through the University on a competitive basis. Apply before March 15, 1970.

Application: Address all inquiries to

THE UNIVERSITY OF CALGARY

Graduate Study in Pure & Applied Mathematics, Statistics & Computing Science

This rapidly expanding University is situated within easy access to beautiful climbing and ski areas in the Rocky Mountains. The library already has over 275,000 volumes and subscribes to over 6,500 periodicals including 250 mathematical periodicals with back runs.

The department offers programmes leading to the M.A., M.Sc., and Ph.D. degrees. There are presently over 50 faculty members in the department with active research interests in algebra, analysis, functional analysis, combinatorics, logic, set theory, differential geometry, number theory, numerical analysis, continuum mechanics, relativity, multivariate analysis, probability, stochastic processes, artificial intelligence, automata theory, algorithmic languages, machine logic.

Teaching, service and research assistantships are available in the department and each applicant for graduate study will be considered for these. The average stipend is $3,000 for the 8 month session. Fees are waived. In addition, students working on their programme during the summer months may receive an additional $1,000.

UNIVERSITY OF VICTORIA
Victoria, B. C., Canada
Department of Mathematics

Mathematics Department Head:

The University is seeking an established senior colleague to head a growing thirty member department. The department offers an undergraduate major and honours programme, and has begun a graduate programme in the areas of Pure Mathematics, Applied Mathematics, Statistics, and Computing Science.

Applicants should have suitable experience in university teaching, mathematical research, and administration.

Applications will be received until January 9, 1970.

Duties to commence July 1, 1970.

Applications including *curriculum vitae* or requests for further information should be sent to:

Dr. L. A. Hinrichs
Chairman, Head Selection Committee
Department of Mathematics
University of Victoria
P. O. Box 1700
Victoria, B. C., Canada

FACULTY OF MATHEMATICS

Graduate Studies leading to Degrees of M. Math.; M. Phil.; Ph. D.

DEPARTMENTS: Applied Mathematics, Pure Mathematics, Combinatorics and Optimization, Applied Analysis and Computer Science, Statistics.

TEACHING FELLOWSHIPS AND RESEARCH ASSISTANTSHIPS: Combined values: $2000-$3000 for 8 months and up to $1500 for the summer term.

APPLY TO: **Associate Dean of Graduate Studies**
Faculty of Mathematics
The University of Waterloo
Waterloo, Ontario, Canada

TAX STATUS OF GRANTS

Under Section 117 of the Internal Revenue Service Code assistantships, fellowships and grants meeting certain conditions are excludable from gross income and therefore not subject to the Federal Income Tax. The Internal Revenue Service has given the following interpretation of Section 117.

"Section 117(a) of the Internal Revenue Code of 1954 permits an individual to exclude from his gross income amounts received as a scholarship or fellowship grant. Whether the amounts received are in fact a scholarship or fellowship grant, i.e., are paid for the primary purpose of furthering the recipient's education and training, is a conclusion reached by the Internal Revenue Service on the basis of the facts in a particular case.

"Section 117(b) (1) of the Code provides that in the case of individuals who are candidates for a degree the exclusion from gross income shall not apply to that portion of any amount received as payment for teaching, research, or other services in the nature of part-time employment required as a condition to receiving the scholarship or fellowship grant. However, if teaching, research, or other equivalent services are required of all candidates for a particular degree as a condition to receiving the degree, such teaching, research or other services shall not be regarded as part-time employment.

"In situations where research is required of all degree candidates, but only those students who engage in teaching receive stipends, the Service would conclude that the stipend was not excludable under Section 117(a) of the Code, but was paid for services rendered in the nature of part-time employment.

"If research and teaching services are required of all degree candidates and such research and services are performed for the primary purpose of furthering the students' education and training, the Service would conclude that stipends paid for the research and teaching services, required of all degree candidates, are excludable from the recipients' gross income under Section 117(a) of the Code. However, amounts paid to a degree candidate for teaching services not strictly required as a condition to receiving the degree for which the recipient is a candidate, at the time he performs the service, represents compensation for services rendered which is includable in the recipient's gross income."

To help expedite the processing of returns, two forms are given below showing the types of information which should be provided by the graduate school for the Internal Revenue Service to help determine the validity of the claimed tax exclusion.

Application for total exclusion of stipend from gross income:

TO WHOM IT MAY CONCERN:

During the calendar year 19__ _____ served as a Research
(Name of Student)
Assistant in the Department of _____ at the _____
University from _____ to _____. He was paid a stipend of
$_____ for his services. The funds were derived from _____.
(Description of grant or contract)
At the same time, he was a candidate for the degree of _____. The research which he performed under this arrangement met, in part, the requirements for this degree.

Equivalent research is required of all students working for this same degree at the _____ University, regardless of whether or not they are compensated for their services.

Application for partial exclusion from Federal Income Tax:

TO WHOM IT MAY CONCERN:

During the calendar year 19__ _____ served as a
(Name of Student)
_____ in the Department of _____ at the _____ University
(position)
from _____ to _____. He was paid a stipend of $_____. The funds were derived from _____. At the same time, he was a candidate for the degree of _____. During this period the candidate spent approximately (a) _____ per cent of his working time _____, which is not required for the degree, and (b) _____ per
(assigned duties)
cent of his time on degree requirements. The research or study which he performed under (b) met in part the requirements for his degree. Equivalent research is required of all students working for this same degree at the _____ University, regardless of whether or not they are compensated for their services.

SELECTED LIST OF STIPENDS

I. Graduate Fellowships and Loan Sources

Ames Laboratory. Graduate assistantships in applied mathematics and computer science. Direct inquiries to Dr. Clair G. Maple, Chief, Mathematics and Computer Science Division, Ames Laboratory of the U. S. Atomic Energy Commission, Iowa State University, Ames, Iowa 50010.

Boris A. Bakhmeteff Research Fellowship in Mechanics of Fluids. A Boris A. Bakhmeteff Research Fellowship will be available for the 1970-71 academic year in an amount up to $3,600. It is intended to be a specific contribution for a definite research project of an original and creative nature in the general field of mechanics of fluids. The recipient shall be a graduate student who is a candidate for the master's or doctor's degree. He shall have no commitment that will interfere with the research work and study on a full-time basis. It is expected that the stipend will be applied principally toward fees, tuition, and subsistence. The study and research may be undertaken at an institution of the Fellow's choice. In the judgment of the Committee, the adequacy of the facilities of the institution will have substantial weight in the selection of the Fellow. Application forms should be filed by February 15, 1970, with Dean William Allan, School of Engineering, The City College of The City University of New York, New York 10031.

Center for Naval Analyses, 1970 Summer Employment. CNA, operated under contract with the University of Rochester, is engaged in a broad spectrum of operations research and systems analysis studies for the U. S. Navy and other government agencies. Opportunities are available for graduate students in operations research, economics, engineering, mathematics, physics, and statistics. Assignments include analysis related to force level planning, manpower, logistics, and operational effectiveness. U. S. citizenship required. Write to Mr. Terry D. Harris, Center for Naval Analyses, 1401 Wilson Boulevard, Arlington, Virginia 22209.

Danforth Graduate Fellowships. Citizenship unrestricted. Open to men and women under 30 years of age who are seniors or recent graduates of accredited colleges in the United States, with no previous graduate study, and who intend to teach at the college level. Tenable at any accredited U. S. university. Must be nominated by liaison officer of college or university. See the liaison officer on campus or, for general information, write to Dr. John H. Chandler, Director, Graduate Fellowship Program, The Danforth Foundation, 222 South Central Avenue, St. Louis, Missouri 63105.

General Electric Foundation. Provides research and study grants to selected departments of selected graduate institutions on a programmed, rotational basis, to be used by the department in a number of ways, including fellowships and teaching assistantships. Write to J. Moreau Brown, Crotonville, P. O. Box 791, Ossining, New York.

Daniel and Florence Guggenheim Fellowships. For U. S. or Canadian residents interested in jet propulsion, space flight, and flight structures. Graduate fellowships at specified institutions. Write to Daniel and Florence Guggenheim Foundation, 120 Broadway, New York, New York 10005.

Hughes Aircraft Company Doctoral, Engineer and Masters Fellowship Programs. Academic training leading to these degrees and correlated experience developed through professional work assignments. Over 100 new awards each year in various fields of engineering, mathematics, and physics. Value of awards, including salary associated with work assignments, ranges from approximately $7,500 to $12,000 annually. Write to Scientific Education Office, Hughes Aircraft Company, P. O. Box 90515, Los Angeles, California 90009.

Johns Hopkins University. (1) Financial support for students taking the Ph.D. in mathematical statistics is available in the form of NSF and USPHS traineeships, NDEA fellowships, and research assistantships. Inquiries should be addressed to Chairman, Department of Statistics, The Johns Hopkins University, Baltimore, Maryland 21218. (2) USPHS traineeships are available to students seeking the Sc.M., Sc.D., or Ph.D., in biostatistics. Applicants for the biostatistics programs should have one year of biological, physical, or social science in addition to preparation in mathematics. Address inquiries to Chairman, Department of Biostatistics, School of Hygiene and Public Health, 615 North Wolfe Street, Baltimore, Maryland 21205.

Kappa Kappa Gamma Fraternity Fellowships. $500 each. Approximately 14 awards are available to women under 30 years of age who may or may not be fraternity members. A bachelor's degree is necessary from an institution where a chapter of Kappa Kappa Gamma is located, or graduate work must be taken on a campus where a chapter is located. U. S. or Canadian citizenship required. First year graduate students receive preference. Candidate must receive no more than $1,000 of additional financial aid. Not renewable. Application forms are available from Dr. Miriam Locke, Chairman of Fellowships, Kappa Kappa Gamma Fraternity, Box 1484, University, Alabama 35486. Applications must be completed by March 1.

Kent Fellowships. Purpose is to encourage and support persons who are preparing for teaching or administration in colleges and universities. Open to men and women to age 40. A minimum of one year of previous graduate study is required at the time of application. Fields unrestricted. A maximum of 50 awards are made. Information is available by writing to Director, Kent Program, The Danforth Foundation, 222 South Central Avenue, St. Louis, Missouri 63105.

Mathematics Research Center. For support of mathematical research of interest to the U. S. Army. Predoctoral fellowships for U. S. citizens for graduate study in any of the Departments of Mathematics, Computer Sciences, Statistics, or School of Business and College of Engineering, at the University of Wisconsin. For information write to J. Barkley Rosser, Director, Mathematics Research Center, United States Army, University of Wisconsin, Madison, Wisconsin 53706.

National Defense Student Loan Program. Fields unrestricted. Student must be carrying at least one half the normal full-time academic workload as determined by the institution where he is or will be enrolled. Funds are administered by participating institutions and applications should be made through the Director of Admissions or officer in charge of student financial aid. Other inquiries may be addressed to Division of Student Financial Aid, Office of Education, Department of Health, Education, and Welfare, Washington, D. C. 20202.

National Science Foundation Graduate Fellowships. Application may be made by college seniors and graduate students working in a degree program. All applicants must be citizens of the United States. Annual stipends are $2,400 for the first-year level; $2,600 for the intermediate level; and $2,800 for the terminal-year level. Dependency allowances and allowances for tuition, fees, and limited travel will also be provided. Further information and application materials may be obtained from the Fellowship Office, National Research Council, 2101 Constitution Avenue, N. W., Washington D. C. 20418. Applications are due in early December.

National Science Foundation Graduate Traineeships. For 9- or 12-month study programs leading to the master's or doctoral degree. Summer traineeships will also be available for graduate teaching assistants to enable them to continue their studies during the summer on a full-time basis. Trainees must be U. S. citizens or nationals. Trainees are selected by the institution at which graduate study is to be undertaken, and application must be made to the university. Further information and a list of participating institutions may be obtained from the Graduate Traineeship Program, Division of Graduate Education in Science, National Science Foundation, Washington, D. C. 20550.

North Atlantic Treaty Organization Fellowships. The Science Committee awards each year a number of Graduate Apprenticeships in Operational Research. The purpose of this scheme is to enable young scientists to receive practical training in operational research at one of a number of NATO or national centers. The normal assignment is for two years, subject to satisfactory completion of the first year. Applicants need not have previous experience in operational research, but they should have a scientific background with a sound basic training in mathematics. Each apprentice receives from NATO an allotment of $4,000 per year plus travel expenses, together with the removal expenses for his personal belongings. An allowance of $200 is also paid for each dependent accompanying the apprentice. Awards are also made to operational research scientists who wish to make a short "study visit" to a foreign country within the NATO Alliance, in order to learn about new techniques or procedures in operational research. Application forms for both of these awards can be obtained from the Scientific Affairs Division (Operational Research), NATO, Brussels, 39, Belgium.

Oak Ridge Graduate Fellowship Program. Opportunity for graduate students working toward doctoral degrees in scientific fields, including mathematics, to use AEC installations at Oak Ridge, Savannah River Laboratory, and Puerto Rico Nuclear Center for thesis research. U. S. citizenship is required. About 25 fellowships are awarded annually. Inquiries may be addressed to University Participation Office, Oak Ridge Associated Universities, Post Office Box 17, Oak Ridge, Tennessee 37830.

Population Council Fellowships in Demography. Citizenship unrestricted. Fields associated with

demography, statistics, economics, and sociology. Approximately 40 fellowships are awarded. Forms available from Fellowship Secretary, Population Council, 245 Park Avenue, New York, New York 10017.

RCA Fellowships. Grants are for graduate study in biomedical engineering, computer/information science, computer science, electrical engineering, electronics, and physics. (RCA-NBC Fellowships are available in journalism and telecommunications.) Candidates are selected by appropriate officials in designated universities. Although appointments are for one year, RCA Fellows are eligible for reappointment. For further information write to the RCA Educational Aid Committee, David Sarnoff Research Center, Princeton, New Jersey 08540.

Shell Companies Foundation, Incorporated, Shell Merit Residencies. 12-month residencies at Cornell and Stanford Universities; primarily for high school teachers of science and mathematics who have been Shell Merit Fellows. For information write to Coordinator, Shell Merit Programs, Room 19, Stone Hall, Cornell University, Ithaca, New York 14850, or to Dr. Paul DeHart Hurd, Coordinator, Shell Merit Programs, School of Education, Stanford University, Stanford, California.

Shell Merit Fellowships of Shell Companies Foundation, Inc. For U.S. citizens who are high school teachers of science and mathematics. Tenable at Cornell University during a 6-week summer period. Write to Coordinator, Shell Merit Programs, Room 19, Stone Hall, Cornell University, Ithaca, New York 14850.

Shell Merit Graduate Scholarships at Cornell University. For graduates of a college or university as National Merit or National Achievement Scholars or finalists who wish to enter or advance their preparation for pre-college science or mathematics teaching. For information write to Coordinator, Shell Merit Programs, Room 19, Stone Hall, Cornell University, Ithaca, New York 14850.

Sigma Delta Epsilon Grant-in-Aid. This award, to be given annually by Sigma Delta Epsilon, Graduate Women's Scientific Fraternity, is available to any woman who holds a degree from a recognized institution of higher learning and has demonstrated outstanding ability and promise in research in one of the mathematical, physical, or biological sciences. The period of the grant shall not exceed one calendar year. The stipend may be applied either directly to the research project or to course work, provided the latter is relevant to the research program. Appointments will be made irrespective of race, nationality, creed, or marital status. Preference will be shown to applicants 35 years of age or older but this limitation is not absolute. Application forms may be obtained from Dr. Kathleen R. Stitt, Doster Hall, University of Alabama, University, Alabama 35486. Applications should be submitted before February 1, 1970.

Smithsonian Institution Research Assistantships. For graduate and undergraduate students to work under the guidance of a Smithsonian staff member. Grants are made for a twelve-week period, during the summer. Deadline for receipt of applications is February 1, 1970. Further information and application forms may be obtained from the Division of Graduate Studies, Office of Academic Programs, Room 236, Pension Building, Smithsonian Institution, Washington, D. C. 20560.

Smithsonian Institution Visiting Research Associateships. For candidates for the Ph.D. or equivalent degree whose departments or universities approve their working at the Smithsonian. Deadline for applications is January 2, 1970. Further information and application forms may be obtained from the Division of Graduate Studies, Office of Academic Programs, Room 236, Pension Building, Smithsonian Institution, Washington, D. C. 20560.

United States Department of Health, Education and Welfare, National Defense Graduate Fellowship Program. Limited to specified universities. Applicant must have completed a bachelor's degree, intend to enroll in a full-time doctorate program, and signify an interest in a college teaching career. Fellowships are usually 3-year awards. Application is made directly to the university at which the student intends to study. For general information write to the Graduate Academic Programs Branch, Division of Graduate Programs, Bureau of Higher Education, Office of Education, United States Department of Health, Education and Welfare, Washington, D. C. 20202.

United States Department of Health, Education, and Welfare; National Institutes of Health. Supports predoctoral, postdoctoral, and special fellows. Research in biostatistics, especially as related to health and disease. Applicant must have earned an appropriate degree and show that his goal is a research career in the health related sciences. U. S. citizenship or lawful admittance to the U. S. for permanent residence is required. Announcements available from Fellowships Section, Career Development Review Branch, Division of Research Grants, National Institutes of Health, Bethesda, Maryland 20014.

United States Steel Corporation Fellowships. A bachelor's degree and U. S. citizenship are required. Applicant must usually be a candidate for a doctor's degree, but master's degree candidates may also be eligible. Thirty-three two-year awards are made through 33 participating colleges and universities for study in the natural and physical sciences, engineering, business administration, humanities, and social sciences. General information may be obtained from the United States Steel Corporation, Fellowship Program, Room 1805, 71 Broadway, New York, New York 10006.

United States Steel Foundation Fellowships. A bachelor's degree and U. S. citizenship are required. Applicant must usually be a candidate for a doctor's degree, but master's degree candidates may also be eligible. Forty-four two-year awards are made through 44 participating colleges and universities for study in the natural and physical sciences, engineering, business administration, humanities, and social sciences. General information may be obtained from the Executive Director, United States Steel Foundation, Inc., 71 Broadway, New York, New York 10006.

Woodrow Wilson National Fellowship Foundation. For U.S. and Canadian first-year graduate students interested in college teaching careers. Nominations from faculty members are due by October 20; no application will be accepted directly from students. For information write to Dr. Hans Rosenhaupt, President, Woodrow Wilson National Fellowship Foundation, Box 642, Princeton, New Jersey 08540.

Zonta International. Amelia Earhart Fellowships. For women holding a bachelor's degree in science and interested in graduate work in aero-space and related sciences. Recipients will be granted $3,000, and past recipients may apply for renewed grants. Write to Zonta International, 59 East Van Buren Street, Chicago, Illinois 60605.

II. Postdoctoral Awards

AFOSR-NRC Postdoctoral Research Program. Supported by the Air Force Office of Scientific Research and administered by the National Research Council. These awards, open only to citizens of the United States, are tenable at appropriate educational institutions and research laboratories in the United States and abroad, and provide to young investigators of superior ability, who are recent recipients of the doctoral degree, special opportunities for advanced study and fundamental research in various branches of the natural and applied sciences of particular importance to the Air Force. Application materials for the 1970-1971 program are available from the Fellowship Office, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418.

Agency for International Development. Research grants for research projects and analytical studies in systems and operations dealing with socio-economic development problems. Research groups are encouraged to investigate problems of their own devising within the above areas. For further information write to Mr. Glenn B. McClelland, Research Coordination Staff, Office of Program and Policy Coordination, Agency for International Development, Department of State, Washington, D. C. 20523.

Agency for International Development, Vietnam. Research grants for research projects and analytical studies in systems and operations dealing with socio-economic development problems in Vietnam. Research groups are encouraged to investigate problems of their own devising within the above areas. For further information, write to Dr. Karl F. Bode, Director, Research, Evaluation and Information Retrieval Staff, Bureau for Vietnam, Agency for International Development, Department of State, Washington, D. C. 20523.

Air Force Office of Aerospace Research. Postdoctoral and Senior Postdoctoral Research Associateships. Awards made in several fields, including mathematics. Tenable at two laboratories in the United States. Applicants should state, in some detail, their field of specialization and should indicate laboratory of interest. Annual stipends for these appointments range from $12,500 to $13,000 for the recent recipient of the doctorate with an adjustment made for the senior candidate. More details regarding this program may be obtained from the Office of Scientific Personnel, Associateship Office, National Research Council, 2101 Constitution Avenue, N.W., Washington, D. C. 20418. Deadline for submission of applications is February 6, 1970.

Air Force Office of Scientific Research. Research Contracts and Grants. Research mathematicians are encouraged to submit proposals through their college, university, or industrial laboratory for research in mathematical fields in which they specialize. Proposals should be mailed to the Director of Mathematical Sciences, Air Force Office of Scientific Research, 1400 Wilson Boulevard, Arlington, Virginia 22209.

American Association of University Women Educational Foundation. Fifty research fellowships for American women, unrestricted as to age or field, except the awards are not made in the creative or performing arts, to be used abroad or in the United States. Applicants must hold a doctorate or its equivalent in scholarly achievement or have fulfilled all requirements for the doctorate, except the dissertation, by July 1 preceding the fellowship year. Preference given to dissertation year applicants. Deadline for application is December 1. Write to Fellowships Office, AAUW Educational Foundation, 2401 Virginia Avenue, N.W., Washington, D. C. 20037.

American Philosophical Society. Postdoctoral research grants of small amounts according to need for candidates with Ph.D. or equivalent to aid specific research projects. Tenable abroad and in U. S. Awards made in October, December, February, April, and June. For information write to the American Philosophical Society, 104 South Fifth Street, Philadelphia, Pennsylvania 19106.

Argonne National Laboratory. Limited number of postdoctoral appointments and temporary appointments for faculty members in many fields of applied mathematics and the computer sciences. Write to James L. Weeks, Professional Placement Manager, Argonne National Laboratory, 9700 S. Cass Avenue, Argonne, Illinois 60439.

Atomic Energy Commission Division of Research. Supports research in applied mathematics, numerical analysis, digital computer design, programming research, and related topics at universities and other institutions. Submit proposals to the Division of Research, U. S. Atomic Energy Commission, Washington, D. C. 20545.

Atomic Energy Commission Postdoctoral Fellowships. Applicants must hold a Ph.D. degree and be interested in nuclear science. U. S. citizenship is required. Approximately 30 fellowships are awarded. Write to U. S. Atomic Energy Commission, Division of Nuclear Education and Training, University Relations Branch, Washington, D. C. 20545.

Courant Institute Instructorships in Mathematics are open to young mathematicians with doctor's degrees who show strong promise in research. The teaching duty will consist of one graduate course related to the field of interest of the instructor. Appointments are for two years. The academic salary for nine months will be $10,500. In addition, the instructor may receive 2/9 of this amount for research in residence during two summer months. Inquiries or requests for application forms should be addressed to the Committee on Instructorships, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012. Applications should be filed no later than January 1,1970.

Courant Institute Postdoctoral Visiting Memberships. The Courant Institute of Mathematical Sciences of New York University offers postdoctoral Visiting Memberships to mathematicians, scientists, and engineers who are interested in its program of training and research in a broad range of pure and applied mathematics. Applications for the academic year 1970-71 must be submitted before January 1, 1970. Inquiries should be addressed to the Visiting Membership Committee of the Courant Institute, 251 Mercer Street, New York, New York 10012.

Educational Testing Service. Two renewable research fellowships in psychometrics at Princeton University. Apply September, to Director, Psychometric Fellowship Program, Educational Testing Service, Princeton, New Jersey 08540.

G. C. Evans Instructorships at Rice University. For promising young mathematicians with the doctorate, primarily for new Ph.D.'s. Appointments are for two years at a salary of at least $10,000 for the regular academic year. Teaching duties will amount to six hours per week in one semester and three hours per week in the other, or the equivalent. Inquiries and applications should be addressed to Professor Salomon Bochner, Chairman, Department of Mathematics, Rice University, Houston, Texas 77001.

J. Willard Gibbs Instructorships in Mathematics. Offered by Yale University to promising young mathematicians with the doctorate, primarily recent Ph.D.'s. Appointments are for two years at a salary of $10,300 for the regular academic year. In the past, summer support for two months has been obtained from a grant from the Air Force Office of Scientific Research; it is expected that this practice will be continued in the future. Teaching duties will involve six hours per week in one semester and three hours per week in the other, or the equivalent. These will include one semester course at the graduate level in the general area of the instructor's research. Inquiries and applications should be addressed to the Chairman, Department of Mathematics, Yale University, Box 2155, Yale Station, New Haven, Connecticut 06520. Preference will be given to applications received before January 17, 1970.

John Simon Guggenheim Memorial Foundation Fellowships. Applicants should be between 30 and 45 years of age (exceptions are made) and engaged in scientific research. No academic degree is required, but the fellowships are on the advanced postdoctoral level. U. S. citizenship or permanent residence is required. Fellowships are also offered to citizens or permanent residents of all countries and territories of the Western Hemisphere and of the Philippines, to assist studies to be carried on in the United States. Nominations are made by the Committee of Selection. Approximately 350 awards are made, averaging (in 1969) $8,200. For more information write to President, John Simon Guggenheim Memorial Foundation, 90 Park Avenue, New York, New York 10016.

Václav Hlavatý Research Assistant Professorships in Mathematics. Offered by the Department of Mathematics at Indiana University to young mathematicians with doctorates who show definite promise in research. The appointment is for three years with an academic-year salary of at least $11,000. The teaching duties during the first academic year will involve three hours per week and during the next two academic years will involve six hours per week. The Air Force Office of Scientific Research will support summer research for the recipients of the Václav Hlavatý Research Assistant Professorship. This will provide 2/9 of the academic-year salary for the two summer months. There will also be an annual amount of $400 available for professional expenses, such as travel to meetings, supplies, publication costs, etc. Inquiries or request for application forms should be addressed to Professor George Springer, Chairman, Department of Mathematics, Swain Hall East, Indiana University, Bloomington, Indiana 47401. Preference will be given to applications received before January 31, 1970.

Institute for Advanced Study Membership. The School of Mathematics will grant a limited number of memberships, some with financial support, for research in mathematics at the Institute during the academic year 1970-1971. Candidates must have given evidence of ability in research comparable at least with that expected for the Ph.D. degree. Application blanks may be obtained from the Secretary of the School of Mathematics and should be returned (whether or not funds are expected from some other source) by January 15, 1970, or as soon thereafter as possible.

Los Alamos Scientific Laboratory. Offered to U.S. citizens holding Ph.D., with research opportunities in computer science, numerical science, and applied mathematics. A limited number of postdoctoral appointments are available for one year, subject to renewal for a second year. Write to Recruiting Department, Los Alamos Scientific Laboratory, University of California, P. O. Box 1663, Los Alamos, New Mexico 87544.

Mathematics Research Center. For support of mathematical research of interest to the U. S. Army. Visiting research member appointments at all levels from postdoctoral up. For information write to J. Barkley Rosser, Director, Mathematics Research Center, United States Army, University of Wisconsin, Madison, Wisconsin 53706.

Michigan State University Postdoctoral Fellowships. As part of a university development program under a grant from the National Science Foundation, the Department of Mathematics at Michigan State University has established five postdoctoral research fellowships. These are to be awarded each year to promising young Ph.D.'s. The teaching duties of a postdoctoral research fellow consist of one course each term which may be an advanced graduate course or seminar. The stipend for 1970-1971 will be $10,500 for an academic-year appointment. Research fellows are eligible for reappointment as a fellow for a second year or for appointment to a regular staff position. Additional information and application forms may be obtained from the Department of Mathematics, Michigan State University, Wells Hall, East Lansing, Michigan 48823. Completed applications should be filed by February 14, 1970.

C. L. E. Moore Instructorships in Mathematics. Offered by the Department of Mathematics at the Massachusetts Institute of Technology, open to young mathematicians with doctorates who show definite promise in research. The base salary will be $10,600 and the teaching load is six hours per week in one semester and three hours per week in the other. The salary can be supplemented by summer work on a research grant, sponsored by the Air Force Office of Scientific Research, or by teaching in the summer session. The appointments are annual but renewable for one additional year. Applications should be filed not later than January 5 on forms obtained from the Department, 2-247, Massachusetts Institute of Technology, Cambridge, Massachusetts.

National Aeronautics and Space Administration. Postdoctoral and Senior Postdoctoral Resident Research Associateships. Open to individuals at the postdoctoral level who have the Ph.D., M. D., or Sc. D. degree or its training equivalent, or who have completed the requirements for one of these degrees. Citizenship is unrestricted, but a foreign national must have full command of the English language. Approximately 150 awards are made in numerous fields, including mathematics. Tenable at

Ames Research Center, Moffett Field, California; Electronic Research Center, Cambridge, Massachusetts; Goddard Space Flight Center, Greenbelt, Maryland; Institute for Space Studies, New York City; Jet Propulsion Laboratory, Pasadena, California; Langley Research Center, Hampton, Virginia; Manned Spacecraft Center, Houston, Texas; and Marshall Space Flight Center, Huntsville, Alabama. Forms are available from the Associateship Office, Office of Scientific Personnel, Room JH 606, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418. Annual stipend begins at $13,000. Senior stipend variable. Deadlines for receipt of completed applications in 1970 are February 6, May 15, August 15, and October 31, with announcement of awards in April, July, October, and December.

National Aeronautics and Space Administration, Research Grants. Through grants and contracts to educational and nonprofit institutions and industries, NASA sponsors research in fundamental and applied mathematics related to space science and engineering problems. Unsolicited proposals should be submitted to the Office of University Affairs, National Aeronautics and Space Administration, Washington, D. C. 20546.

National Bureau of Standards. The Office of Scientific Personnel of the National Research Council announces the availability of Postdoctoral Research Associateship appointments for 1970-1971. Awards are made in several fields, including mathematics. Tenable in the Washington, D. C. area and Boulder, Colorado. Applicants should state, in some detail, their field of specialization and should indicate laboratory of interest. Annual stipend for these appointments is $13,389 for the recent recipient of the doctorate. More details regarding this program may be obtained from the Office of Scientific Personnel, Associateship Office, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418. Deadline for submission of applications is February 6, 1970.

National Research Council. In association with certain Federal laboratories, the Office of Scientific Personnel of the NRC evaluates applications and makes appointments for associateships at the following laboratories: National Bureau of Standards (Washington, D. C. area and Boulder, Colorado); Naval Undersea Research and Development Center (San Diego, California); Air Force Office of Aerospace Research (two laboratories); National Aeronautics and Space Administration (eight laboratories); Naval Research Laboratory (Washington, D. C.); U. S. Army Munitions Command (Feltman Laboratories, Dover, N. J., and other locations); U. S. Army Natick Laboratories (Natick, Massachusetts); Air Force Office of Scientific Research (at appropriate educational institutions and research laboratories in the U. S. and abroad). Detailed information regarding these programs may be obtained from the Office of Scientific Personnel, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418. Applicants should state, in some detail, their field of specialization and should indicate laboratory of interest.

National Science Foundation Postdoctoral Fellowships. For U. S. citizens or nationals who have earned or who will have earned a doctoral degree as of the beginning of their fellowships, who wish to enter upon or continue postdoctoral study. Application materials may be obtained from the Fellowship Office, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418. Applications due in early December.

National Science Foundation Research Grants. Proposals accepted at any time. Instructions for the preparation of proposals, contained in a booklet entitled "Grants for Scientific Research," may be obtained upon request from the Mathematical Sciences Section, National Science Foundation, Washington, D. C. 20550.

National Science Foundation Residencies in Computing and Computer Activities. The NSF will award up to ten one-year faculty residencies at Systems Development Corporation, Santa Monica, California, for training in computing and computer applications. Participants will spend from July 1, 1970, to June 30, 1971, in a program developed by SDC. Proposals for participation should be submitted by the institution of the proposed participant, and preference will be given to those institutions granting 100 or more baccalaureates in science in any three-year period since 1963. Since the objective of the program is to increase the number of institutions with strong academic computing activities, institutions already recognized as being outstanding in computing are not encouraged to apply. For additional information, write to the Education, Research and Training Section, Office of Computing Activities, National Science Foundation, Washington, D. C. 20550.

National Science Foundation Science Faculty Fellowships. Requirements are a bachelor's degree or its equivalent, three or more academic years' teaching experience at the collegiate level with the rank of instructor or higher, and the intention to continue teaching. Applicants must also be U. S. citizens or nationals. Approximately 200 awards are available. Forms may be obtained by writing to

the Division of Graduate Education in Science, National Science Foundation, Washington, D. C. 20550. Applications due in early October.

National Science Foundation Senior Postdoctoral Fellowships. Candidates must have held a doctoral degree in one of the basic fields of science, mathematics, or engineering for at least five years (or have had equivalent scientific training and experience), and have achieved recognized stature in their profession. Applicants must be U. S. citizens or nationals. Approximately 50 awards are made. Information and application materials will be available in the late summer from the Division of Graduate Education in Science, National Science Foundation, Washington, D. C. 20550. Applications due early in October.

Naval Ordnance Laboratory. The Office of Scientific Personnel of the National Research Council announces the availability of Postdoctoral Research Associateship appointments for 1970-1971. Awards are made in several fields, including mathematics. Tenable in Silver Spring, Maryland. Applicants should state, in some detail, their field of specialization. Annual stipend for these appointments is $13,389 for the recent recipient of the doctorate. More details regarding this program may be obtained from the Office of Scientific Personnel, Associateship Office, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418. Deadline for submission of applications is February 6, 1970.

Naval Undersea Research and Development Center. The Office of Scientific Personnel of the National Research Council announces the availability of Postdoctoral Research Associateship appointments for 1970-1971. Awards are made in several fields including mathematics. Tenable in San Diego, California. Applicants should state in some detail their field of specialization. Annual stipend for these appointments is $13,389 for the recent recipient of the doctorate. More details regarding this program may be obtained from the Office of Scientific Personnel, Associateship Office, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418. Deadline for submission of applications is February 6, 1970.

Benjamin Peirce Lectureships at Harvard University, now carrying the rank of Assistant Professorships. The appointments are for three years with a starting salary of $9,000 (for the nine-month academic year) and annual increments of $500. This salary can be augmented during the summer by teaching at the Summer School or by work on a research contract if funds are available. The teaching committment is six hours a week, including a graduate course on a subject of the lecturer's choice, if desired. Application forms may be obtained by writing to the Department of Mathematics, Harvard University, 2 Divinity Avenue, Cambridge, Massachusetts 02138, and should be filed by February 1, 1970.

Alfred P. Sloan Foundation. Unrestricted grants made to selected young university scientists who are regular faculty members for support of basic research in the physical sciences, including mathematics. Candidates do not apply but are nominated by their department chairmen or other scientists. For information write to the Alfred P. Sloan Foundation, 630 Fifth Avenue, New York, New York 10020.

J. D. Tamarkin Instructorships. These instructorships at Brown University are intended to give promising young mathematicians the opportunity to begin their careers in an active and stimulating mathematical environment where ample opportunity exists for association with senior staff members. Teaching load is six hours one semester and three the other. Salary for the academic year is $10,000 with opportunity for summer support. Applicant should have his doctorate by the time his appointment is to begin. Three letters of recommendation and a letter from applicant expressing interest in an instructorship must be submitted by January 15, 1970. For further information write to Chairman, Department of Mathematics, Brown University, Providence, R. I. 02912.

University of New Mexico. Postdoctoral fellowships which are provided under the terms of a National Science Foundation Departmental Grant for recent recipients of the doctorate or from persons expecting to receive the doctorate in 1970. Awards, which are for the period September 1970 to June 1971, provide a stipend of $11,000. No formal duties are imposed, but recipients of the awards are expected to engage actively in research and to maintain a close association with faculty members having related mathematical interests. Inquiries should be addressed to the Chairman, Department of Mathematics and Statistics, University of New Mexico, Albuquerque, New Mexico 87106.

U. S. Army Munitions Command. Postdoctoral and Senior Postdoctoral Resident Research Associateships. Awards made in several fields, including mathematics. Tenable at Feltman Laboratories, Dover, New Jersey, and other locations. Applicants should state, in some detail, their field of specialization and should indicate laboratory of interest. Annual stipends for these appointments range from $12,500 to $13,000 for the recent recipient of the doctorate with an adjustment made for the senior

candidate. More details regarding this program may be obtained from the Office of Scientific Personnel, Associateship Office, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418. Deadline for submission of applications is February 6, 1970.

U. S. Army Natick Laboratories. Postdoctoral and Senior Postdoctoral Visiting Scientists Research Associateships. Awards made in several fields, including mathematics. Tenable in Natick, Massachusetts. Applicants should state, in some detail, their field of specialization and should indicate laboratory of interest. Annual stipends for these appointments begin at $12,500. Senior stipend variable. More details regarding this program may be obtained from the Associateship Office, JH606, Office of Scientific Personnel, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418. Deadlines for submission of applications in 1970 are February 6, May 15, August 15, and October 31 with announcement of awards in April, July, October, and December.

U. S. Army Research Office--Durham. Research grants and contracts for basic research in mathematics, engineering, and physical and environmental sciences. Write to Commanding Officer, U. S. Army Research Office--Durham, Box CM, Duke Station, Durham, North Carolina 27706.

John Wesley Young Research Instructorships. Two instructorships are awarded by Dartmouth College each year. Teaching duties average six hours per week and are of a varied and nonroutine nature. The academic-year stipend may be supplemented by a summer research fellowship. The appointments are for two years and are not renewable. Applicants should write to Donald L. Kreider, Chairman, Mathematics Department, Dartmouth College, Hanover, New Hampshire 03755.

III. Study Abroad

Alexander von Humboldt Foundation Fellowships. These fellowships of 6 to 12 months are offered in order to pursue advanced academic research projects at a German university or research institute. Fields of research and citizenship are unrestricted. Amount of stipend: 'forschungsstipendium' DM 1200.-monthly, 'Dozentenstipendium' DM 1600.-monthly; supplementary family allowances, travel expenses. An extension of the original award period is possible. Applicants should furnish proof of independent teaching experience at university level or research work(of at least two years if interested in a 'Forschungsstipendium' and at least five years if interested in a 'Dozentenstipendium'). They should hold a Ph.D., have sufficient knowledge of German, and as a rule, not be older than 38. Applicants for a 'Dozentenstipendium' should have outstanding academic publications to their credit. For further information write to Alexander von Humboldt-Stiftung, 532 Bad Godesberg, Schillerstrasse 12, Germany.

Alliance Française Scholarships. For Americans between 20 and 30 years old with a working knowledge of French to study in France at the graduate level. Fields unrestricted. Write to Chairman of Scholarship Committee, Alliance Française de New York, Inc., 527 Madison Avenue, New York, New York 10022, or Alliance Française, 101 Boulevard Raspail, Paris 6, France.

American Association of University Women Educational Foundation. See Section II.

American Philosophical Society. See Section II.

American-Scandinavian Foundation. Graduate fellowships to be used in Scandinavia. Applicants must be U. S. citizens who have completed their college education and should be under 40 years old. Application deadline is December 1, 1969 (November 1 for Marshall Fellowships for Denmark). Write to The American-Scandinavian Foundation, 127 East 73 Street, New York, New York 10021.

Foreign Area Fellowship Program. This program offers a limited number of research training and internship opportunities in Latin America, Asia, Africa, Western and Eastern Europe, and the Near East, the majority of which are in the social sciences and humanities. A few grants are available for those in the natural and physical sciences. Applicants must be, in most cases, predoctoral students enrolled in American or Canadian universities. Further information may be obtained by writing to Foreign Area Fellowship Program, 110 East 59th Street, New York, New York 10022.

Fulbright-Hays Grants. For graduate study or research in any field in which the project can be profitably undertaken abroad. Applicant must be U. S. citizen and have language proficiency sufficient to carry out the proposed study and to communicate with the people of the host country. Students already enrolled in a U. S. university must apply directly to the Fulbright Program Advisor on his campus. Unenrolled students may apply to the Institute of International Education. Further details may

be obtained from the Information and Reference Services Division, Institute of International Education, 809 United Nations Plaza, New York, New York 10017.

Fulbright-Hays Postdoctoral Awards. United States Government grants available annually in all fields for university lecturing and postdoctoral research abroad. Elligibility requirements include U. S. citizenship; for lecturing, college teaching experience; for research, a doctoral degree or recognized professional standing at the time of application. In certain cases a knowledge of the language of the host country is required. Grants are generally tenable for one academic year in one designated country and include round-trip transportation for the grantee, maintenance allowance to cover living expenses of grantee and family, and a small incidental allowance to cover supplies and services essential to the project. Subject to the availability of funds, a supplemental dollar grant for lecturers in most non-European countries may be given. Write to Committee on International Exchange of Persons, Senior Fulbright-Hays Program, 2101 Constitution Avenue, N. W., Washington, D. C. 20418.

Institute of International Education. Grants for graduate study abroad; includes U. S. Government grants and fellowships offered by other governments, foundations, universities, organizations and private donors. Applicant must be U. S. citizen, have a Bachelor's degree or its equivalent before the beginning date of the grant, generally be under 35 years of age, and be able to read, write, and speak the language of the host country by time of application. Students already enrolled at U. S. universities must apply through the Fulbright Program Advisor at his university. Unenrolled students may apply through the Institute of International Education. IIE regional offices are (1) 65 E. South Water Street, Chicago, Illinois 60601; (2) Capitol Life Center, E. 16th Avenue at Grant Street, Denver, Colorado 80203; (3) Suite 1411, Peachtree Center, 230 Peachtree Street, N. W., Atlanta, Georgia 30303; (4) Suite 1-A, World Trade Center, 1520 Texas Avenue, Houston, Texas 77002; (5) 1212 Wilshire Boulevard, Los Angeles, California 90017; (6) 1530 P Street, N. W., Washington, D. C. 20005; (7) 291 Geary Street, San Francisco, California 94102; (8) 809 United Nations Plaza, New York, New York 10017 (Main Office).

International Research and Exchanges Board. IREX administers academic exchange programs between scholars in the United States and the countries of East-Central and Southeast Europe and the Soviet Union. These programs operate under reciprocal agreements with the countries concerned. U. S. citizenship is required for all programs, except short-term grants to citizens of the exchange countries for visits to the United States. Applicants to the exchange programs must have a full-time affiliation with a North American college or university and be faculty members or advanced doctoral candidates who will have completed all requirements for the Ph.D. except the thesis by the time of participation. Applicants will be expected to have mastery of the language of the host country sufficient for the purposes of their research and study. IREX provides domestic and international transportation and an internal travel allowance for the participant; one-half of domestic and international transportation costs for accompanying family members for stays of at least one semester, or full family transportation costs for stays of an academic year; for married graduate students a family allowance determined by the number of dependents; for salaried participants a stipend in lieu of salary less the value of housing and other benefits received from the host country. Stipends are adjusted to take into account such other resources as fellowships and sabbatical salaries. For further information, write to International Research and Exchanges Board, 110 East Fifty-Ninth Street, New York, New York 10022.

Marshall Scholarships. Offered by the British Government to U. S. Graduates; tenable at any university in the United Kingdom. Recipients of awards are required to take a degree at their British university . Fields unrestricted. Apply through British Consulates-General in the following regions: (1) Northeast: Room 2303, John Hancock Building, Boston, Massachusetts 02116; (2) East: 845 Third Avenue, New York, New York 10022; (3) South: 814 Atlanta Merchandise Mart, 240 Peachtree Street, N. W., Atlanta, Georgia 30303; (4) Midwest: 33 North Dearborn Street, Chicago, Illinois 60602; (5) Pacific: 5th Floor, Hong Kong Building, 160 Sansome Street, San Francisco, California 94104.

Netherland-America Foundation Graduate Study Grants. Small supplementary grants toward study in the Netherlands. Apply to the Netherland-America Foundation, Inc., 10 Rockefeller Plaza, New York, New York 10020.

North Atlantic Treaty Organization Postdoctoral Fellowships. For study abroad in countries in the NATO Alliance. Open to U. S. citizens who have earned a doctoral degree or who have had research training and experience equivalent to that represented by the doctoral degree in one of numerous scientific fields, including mathematics. Tenure is normally either 9 or 12 months. Write to the Fellowship Office, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418.

North Atlantic Treaty Organization Senior Fellowships in Sciences. For U. S. citizens or nationals to study new scientific techniques and developments at nonprofit research and educational institutions in other NATO nations, or countries cooperating with NATO, for tenures of one to three months. Senior staff members may be nominated by any U. S. educational institution that offers a postbaccalaureate degree in one of the sciences, or any nonprofit scientific research institution. Approximately 20 awards are made. Evaluations are made periodically. For application materials, write Division of Graduate Education in Science, National Science Foundation, Washington, D. C. 20550.

Organization of American States Fellowship. Applicants must be citizens or permanent residents of member states of the OAS. Graduate study must be done in member state other than the country of the applicant. Fields are individually limited by member countries. Forms are available from the Technical Secretariat of the OAS Fellowship Program, Division of Fellowships, Department of Technical Cooperation, Pan American Union, Washington, D. C. 20006.

Rotary Foundation Graduate Fellowships and Undergraduate Scholarships. One academic year of study abroad is available to outstanding young men and women who are interested in world affairs and who can fulfill a dual role of scholar and "ambassador of good will." Graduate Fellowships and Undergraduate Scholarships cover full transportation, education, living, and miscellaneous expenses for one academic year, plus, in certain cases, a period of intensive language training in the study country prior to the commencement of the regular academic year. Awards are made for study in any field and are tenable in more than 140 countries in which there are Rotary Clubs. An applicant for both types of awards must be unmarried. An applicant for a Graduate Fellowship must be between the ages of 20 and 28 inclusive as of July 1971, and have obtained a bachelor's degree or equivalent prior to the beginning of his fellowship year. An applicant for an Undergraduate Scholarship must be between the ages of 18 and 24 inclusive as of July 1971, and have completed two years of university level work but not have obtained a bachelor's degree prior to the beginning of his scholarship year. Application must be made through the Rotary Club nearest to the applicant's permanent residence not later than March 15, 1970.

Royal Norwegian Council for Scientific and Industrial Research Postdoctorate Fellowships. Fields: engineering and applied sciences. Candidates should not be more than 35 years of age. Studies can be carried out at the Universities of Oslo and Bergen, the Technical University of Norway, and at different institutes for applied research in Oslo, Bergen, and Trondheim. English may be used at all institutes; German and French at some institutes. Deadline each year is February 1. Write to Royal Norwegian Council for Scientific and Industrial Research, Gaustadelleen 30, Oslo, Norway.

William and Mildred Zelosky Scholarships. Open to American and Polish men at least 21 years of age. American candidates must have at least a master's degree and a knowledge of the Polish language. Polish candidates must have at least their master's degree and preferably their doctorate, plus sufficient knowledge of the English language. Polish citizenship is required for study in the United States; U. S. citizenship is required for study in Poland. Write to Kosciuszko Foundation, 15 East 65th Street, New York, New York 10021.

IV. Fellowships for Citizens of other Countries

Alliance Française Scholarships. Available to French citizens between 20 and 30 years old who have a working knowledge of English, for study in the U.S.A. at the graduate level. Fields unrestricted. Write to Chairman of Scholarship Committee, Alliance Française de New York, 527 Madison Avenue, New York, New York 10022 or Alliance Française, 101 Boulevard Raspail, Paris 6e, France.

American Association of University Women International Fellowships. Approximately 50 awards made to women of other countries for advanced study or research in the United States. No restriction as to age or field of study, except that awards are not made in the creative or performing arts. An applicant must hold a bachelor's degree, be proficient in English, and intend to return to her own country. Forms are to be obtained in the applicant's country from the Fellowships Office, AAUW Educational Foundation, 2401 Virginia Avenue, N. W., Washington, D. C. 20037 or the Cultural Affairs Officer of the U. S. Embassy.

Fulbright-Hays Program. Grants under the Fulbright-Hays Act for study, research, teaching, and lecturing in the United States are available to nationals of many countries. Information regarding these opportunities may be secured from the Cultural Affairs Officer of the United States Embassy or from the binational Educational Commission or Foundation if there is one in the inquirer's own country. The number of grants for the academic year 1970-1971 will depend on funds available.

John Simon Guggenheim Memorial Foundation Fellowships. See Section II.

Institute of International Education. Open to nationals of most countries. Levels: undergraduate and graduate. Fields unrestricted. Develops and administers exchange programs for a number of organizations and corporations and administers U. S. Government grants under the Fulbright-Hays Act for students under the educational exchange program of the Department of State. Write to the Selection Committee in the candidate's own country; address may be obtained from the United States Embassy or Consulate. IIE overseas regional offices: Post Office Box 5869, Nairobi, Kenya; Apartado 300, Lima, Peru; Reid Hall, 4 Rue de Chevreuse, Paris 6, France; P. O. Box 6907, Tsimshatsui, Hong Kong.

Kappa Kappa Gamma Fraternity Fellowships. For Canadian citizens. See Section I.

National Aeronautics and Space Administration. International University Fellowships in Space Science. Foreign nationals only. Level: graduate and postdoctoral. Candidates must be sponsored by their national or regional space research organization or national research councils; must have the equivalent of an earned Master of Science or Master of Engineering degree and must intend to return to their own countries. Fields: all space sciences. Fellowships in the mathematical sciences tenable at 33 U.S. universities. Applications should be made to the national space research organization, National Research Council, or appropriate organization of the applicant's own country. Further information may be obtained from the Office of Scientific Personnel, National Research Council, 2101 Constitution Avenue, Washington, D. C. 20418.

National Aeronautics and Space Administration. See Section II.

National Science Foundation Senior Foreign Scientist Fellowships. For foreign nationals who have had a doctoral degree in science for at least five years or comparable research or teaching experience over a 10-year period. Must be citizens of a nation which maintains diplomatic relations with the U. S. Approximately 50 awards are made. Applicants must be recommended by a U. S. educational institution participating in the program. Further information and a list of participating institutions may be obtained from Division of Graduate Education in Science, National Science Foundation, Washington, D.C. 20550. Application is made directly to the institution.

North Atlantic Treaty Organization Fellowships. See Section I.

Organization of American States Fellowships. Citizenship in member country of OAS is required. See Section III.

Population Council Fellowships in Demography. See Section I.

Shell Merit Fellowships of Shell Companies Foundation, Inc., and Shell Canada, Ltd. For Canadian citizens. See Section I.

Woodrow Wilson National Fellowship Foundation. For Canadian citizens. See Section I.

William and Mildred Zelosky Scholarships. Open to Polish men. See Section III.

V. Other Sources of Information

S. Norman Feingold Scholarships, Fellowships and Loans. Volumes III and IV, Bellman Publishing Company, Box 172, Cambridge, Massachusetts 02138, 1955, 1962. Listing of financial aid sources, plus an excellent bibliography especially in Volume III, listing other sources of similar information.

Fellowship and Research Opportunities in Mathematical Sciences, 1969-1970. Division of Mathematical Sciences, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418. Lists fellowships and grants available from various U. S. Government agencies and bureaus.

Fellowships Offered by Foreign Governments, Universities, and Private Donors. Institute of International Education, 809 United Nations Plaza, New York, New York 10017. List of fellowships and scholarships administered by the IIE for U. S. students.

Scholarships, Fellowships and Loans News Service. The Staff, Bellman Publishing Company, Box 172, Cambridge, Massachusetts 02138, published quarterly, $20 per year. Up-to-date information regarding student financial aid. Annotated bibliography of books and professional journals.

National Defense Graduate Fellowships, Graduate Programs 1969-1970. U. S. Department of Health, Education, and Welfare, Office of Education, Washington, D. C. 20202. Gives pertinent information on how to apply for a fellowship and lists the participating institutions.

Selected List of Major Fellowship Opportunities and Aids to Advanced Education for Foreign Nationals. Fellowship Office, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418, 1969. Contains a list of financial aid sources plus a bibliography listing other sources of financial aid information.

Selected List of Major Fellowship Opportunities and Aids to Advanced Education for United States Citizens. Fellowship Office, National Research Council, 2101 Constitution Avenue, N. W., Washington, D. C. 20418, 1969. Contains a list of fellowships available on the undergraduate, graduate, and post-doctoral levels plus a bibliography giving other sources of information on fellowships, scholarships, and loans.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION
(Act of October 23, 1962: Section 4369, Title 39, United States Code)

Publisher: File two copies of this form with your postmaster.
Postmaster: Complete verification on page 2

Form Approved, Budget Bureau No. 46-R029

1. DATE OF FILING: September 1, 1969
2. TITLE OF PUBLICATION: Notices of the American Mathematical Society
3. FREQUENCY OF ISSUE: * 8 times a year (*Jan., Feb., Apr., June, Aug., Oct., Nov., Dec.)
4. LOCATION OF KNOWN OFFICE OF PUBLICATION *(Street, city, county, state, ZIP code)*: 321 South Main Street, P. O. Box 6248, Providence, Rhode Island 02904
5. LOCATION OF THE HEADQUARTERS OR GENERAL BUSINESS OFFICES OF THE PUBLISHERS *(Not printers)*: Same
6. NAMES AND ADDRESSES OF PUBLISHER, EDITOR, AND MANAGING EDITOR

PUBLISHER *(Name and address)*: American Mathematical Society, P. O. Box 6248, 321 So. Main St., Providence, R. I. 02904

EDITOR *(Name and address)*: Gordon L. Walker, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02904

MANAGING EDITOR *(Name and address)*: None

7. OWNER *(If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given.)*

NAME	ADDRESS
American Mathematical Society	321 So. Main Street, P. O. 6248, Providence, R. I.

8. KNOWN BONDHOLDERS, MORTGAGEES, AND OTHER SECURITY HOLDERS OWNING OR HOLDING 1 PERCENT OR MORE OF TOTAL AMOUNT OF BONDS, MORTGAGES OR OTHER SECURITIES *(If there are none, so state.)*

NAME	ADDRESS
None	

9. FOR COMPLETION BY NONPROFIT ORGANIZATIONS AUTHORIZED TO MAIL AT SPECIAL RATES *(Section 132.122, Postal Manual)*

(Check one)

The purpose, function, and nonprofit status of this organization and the exempt status for Federal income tax purposes: ☒ Have not changed during preceding 12 months ☐ Have changed during preceding 12 months *(If changed, publisher must submit explanation of change with this statement.)*

10. EXTENT AND NATURE OF CIRCULATION	AVERAGE NO. COPIES EACH ISSUE DURING PRECEDING 12 MONTHS	ACTUAL NUMBER OF COPIES OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE
A. TOTAL NO. COPIES PRINTED *(Net Press Run)*	15760	15700
B. PAID CIRCULATION 1. SALES THROUGH DEALERS AND CARRIERS, STREET VENDORS AND COUNTER SALES	274	250
2. MAIL SUBSCRIPTIONS (including first class mailings)	14656	14715
C. TOTAL PAID CIRCULATION	14930	14965
D. FREE DISTRIBUTION *(including samples)* BY MAIL, CARRIER OR OTHER MEANS	39	43
E. TOTAL DISTRIBUTION *(Sum of C and D)*	14969	15008
F. OFFICE USE, LEFT-OVER, UNACCOUNTED, SPOILED AFTER PRINTING	791	692
G. TOTAL *(Sum of E & F—should equal net press run shown in A)*	15760	15700

I certify that the statements made by me above are correct and complete. *(Signature of editor, publisher, business manager, or owner)*: Gordon L. Walker

MEETINGS OF THE AMS
Abstracts of Contributed Papers, 86, 500, 640, 756, 947, 1043
Calendar of Meetings, 2, 374, 454, 610, 714, 874, 1002
Preliminary Announcements
April: Chicago, Illinois, 70, 376; New York, N. Y., 70, 375; Santa Cruz, California, 377
August: Eugene, Oregon, 477, 611
October: Cambridge, Massachusetts, 741
November: Baton Rouge, Louisiana, 741, 878; Claremont, California, 742, 879; Ann Arbor, Michigan 743, 880
January: Miami, Florida, 882; San Antonio, Texas, 1018, 1019
Programs of Meetings
January: New Orleans, Louisiana, 3
April: New York, New York, 455; Cincinnati, Ohio, 466; Santa Cruz, California, 473
August: Eugene, Oregon, 715
October: Cambridge, Massachusetts, 875
November: Baton Rouge, Louisiana, 1003; Claremont, California, 1009; Ann Arbor, Michigan, 1012
December: Boston, Massachusetts, 1025

MEMORANDA TO MEMBERS, 85, 380, 489, 631, 751, 940, 1039
Abstracts, 1039
Abstracts for 1970 Annual Meeting, 631
Additional Audio Recordings of Mathematical Lectures Available, 1040
Audio Recordings of Mathematical Lectures, 940
Back Issues of the Transactions, 631
Backlog of Mathematical Research Journals, 380, 751
Bulletin of the Australian Mathematical Society, 631
Colloquium Lectures, 941
Committee on the Welfare of Mathematicians and Students in Involuntary Service, 752
Computing and Mathematics, 1040

Mathematical Offprint Service, 632
Mathematical Sciences Employment Register, 941
Memoirs, 489
MOS Reprints, 942
Policy on Reprints, 381, 631
Referendum, 752
Retired Mathematicians, 942
Seminar on Mathematical Problems in the Geophysical Sciences, 489
1969 Summer Institute on Number Theory, 1039
Symposia Information Center, 940
Tax Exemption for British Citizens, 85
Travel Grants: International Congress of Mathematicians, 940

NATIONAL REGISTER REPORT, 478

NEW AMS PUBLICATIONS, 79, 383, 628, 1033

NEWS ITEMS AND ANNOUNCEMENTS, 69, 72, 74, 75, 82, 378, 381, 395, 399, 400, 472, 481, 496, 632, 633, 634, 740, 745, 750, 753, 877, 932, 943, 1008, 1011, 1017, 1031

PERSONAL ITEMS, 80, 396, 488, 625, 748, 936, 1032
Erratum, 939

RESERVATION FORMS, 452, 712, 1000, 1108

SALARY SURVEYS
Annual Salary Survey, 933
Starting Salary for Mathematicians with a Ph.D., 1026

SELECTED LIST OF STIPENDS, 1227

SUMMER INSTITUTES AND GRADUATE COURSES, 385, 491
Institutes, 71, 393, 494
Graduate Courses, 385, 491

SUMMER SEMINAR, 72
Cancellation, 378

TAX STATUS OF GRANTS, 1125

New Translations of the American Mathematical Society

INTRODUCTION TO THE THEORY OF LINEAR NONSELFADJOINT OPERATORS

By I. C. Gohberg and M. G. Kreĭn

Translations of Mathematical Monographs, Volume 18

396 Pages; List Price $21.40; Member Price $16.05

The theory of nonselfadjoint operators in Hilbert space is a recent branch of functional analysis. In recent times, it has attracted the ever increasing attention of mathematicians and physicists, and sometimes of engineers also. The aim of this book is to present a number of achievements in this field, most of them related to the theory of completely continuous operators.

The authors discuss the well-known results of the general theory of bounded nonselfadjoint operators; the theory of symmetrically-normed ideals of the ring of bounded operators in a Hilbert space; the theory of perturbation of determinants and some of its applications; the various theorems on the completeness of the system of root (eigen-and associated) vectors of a completely continuous operator (operator bundle); the study of the spectral properties of a selfadjoint quadratic bundle; the simplest tests for the existence of a basis (of one kind or another) made up of the root vectors of a given linear operator.

The presentation in this book is carried out in the spirit of the abstract theory of operators. It is illustrated by various applications to the theory of integral equations. The reader who has some experience in the theory of boundary value problems for differential equations, or an acquaintance with the theory of linear vibrating systems with a finite or infinite number of degrees of freedom, will easily discover how many of the results discussed here find immediate application in each of these fields.

MAHLER'S PROBLEM IN METRIC NUMBER THEORY

By V. G. Sprindžuk

Translations of Mathematical Monographs, Volume 25

200 Pages; List Price $12.70; Member Price $9.53

This book deals with the solution of a group of questions related both to the general theory of transcendental numbers and to the metrical theory of diophantine (and also algebraic) approximations. The fundamental problem in this field has been known in the literature since 1932 as Mahler's conjecture. The main result of this book is a proof of Mahler's conjecture and some analogous theorems.

In Part I, the "classical" case of Mahler's conjecture, dealing with real and complex numbers, is considered. This part should be comprehensible to anyone who knows the elements of measure theory and possesses sufficient perseverance in overcoming purely logical difficulties. Part II is concerned with locally compact fields with nonarchimedean valuation. This part requires a general familiarity with the structure of fields with nonarchimedean valuation. All the necessary information is given in the text with references to the sources.
