GET MORE FROM YOUR JOURNALS

Introducing AMS MathViewer:
An interactive, dual-panel reading experience for journals published by the American Mathematical Society.

AMS MathViewer’s responsive HTML format perfectly renders mathematical content on desktop, tablet, or phone. Click on embedded links to formulas, theorems, figures, and references to view them in the second panel, right beside the original text.

Two-way linking means that you won’t lose your place in the text.

AMS MathViewer

This new reading experience is currently available on these journals, with more to follow in 2017:

Proceedings of the American Mathematical Society-Series B
Transactions of the American Mathematical Society-Series B
