ALGEBRAIC GEOMETRY II

David Mumford, Brown University, Providence, RI, and Tadao Oda, Tohoku University, Japan

Several generations of students of algebraic geometry have learned the subject from David Mumford’s fabled “Red Book,” which contains notes of his lectures at Harvard University. Their genesis and evolution are described by Mumford in the preface.

2015; 516 pages; Hardcover; ISBN: 978-93-80250-80-9; List US$76; AMS members US$60.80; Order code HIN/70

OPERATORS ON HILBERT SPACE

V. S. Sunder, Institute of Mathematical Sciences, Chennai, India

This book’s principal goals are: (i) to present the spectral theorem as a statement on the existence of a unique continuous and measurable functional calculus, (ii) to present a proof without digressing into a course on the Gelfand theory of commutative Banach algebras, (iii) to introduce the reader to the basic facts concerning the various von Neumann-Schatten ideals, the compact operators, the trace-class operators and all bounded operators, and finally, (iv) to serve as a primer on the theory of bounded linear operators on separable Hilbert space.

2015; 110 pages; Softcover; ISBN: 978-93-80250-74-8; List US$40; AMS members US$32; Order code HIN/69
