Every five years the Conference Board of Mathematical Sciences (CBMS) sponsors a national survey of undergraduate mathematical and statistical sciences in the nation’s four-year and two-year universities and colleges. In this latest survey, learn more about

- Enrollments
- Curriculum
- Bachelor’s degrees awarded
- Course availability
- Faculty demographics
- Special one-time topics:
  - departments
    - teacher certification and licensure
    - distance learning and other changes in pedagogy and curriculum
    - dual enrollments and AP credit
  - students
    - participation in research, internships, or consulting
    - majors’ post-graduation plans

Survey results can be used by departments and at the state and national level to inform strategy and support funding for programs in mathematics, science, and technology.
