Building a Permanent AMS Resource for Early Career Mathematicians

A special campaign is underway in the AMS community. The Campaign for The Next Generation is building an endowment designated to supporting early career mathematicians. Campaign volunteers and AMS staff are working to raise \$1.5 million to meet a generous benefactor's matching challenge gift.

This philanthropist has long supported rising mathematicians at the AMS, and began The Next Generation Fund to create a permanent resource dedicated to their success: "It is my hope that this fund will impact many individuals who are limited not by their abilities or their goals but simply by financial concerns. I believe this fund can help provide them with the kinds of opportunities to which they may not otherwise have access."

Early career mathematicians work intensely to establish their careers. Doctoral students strive to finish dissertations, and PhD recipients compete for employment while working to deepen their research. Financial support can play a critical role, yet traditional university and federal funding is increasingly difficult to obtain.

The Next Generation Fund will be a permanent resource for many doctoral and post-doctoral mathematicians each year. It will support proven AMS programs that up until now have existed on temporary funding, such as AMS Graduate Student Travel Grants, Mathematics Research Communities, Graduate Student Chapters, and others.
