

FEATURED TITLE FROM HINDUSTAN BOOK AGENCY

Inequalities: An Approach through Problems Second Edition

B. J. Venkatchala, *Homi Bhabha
Centre for Science Education, Mumbai,
India*

This book is an introduction to basic topics in inequalities and their applications. These include the arithmetic mean-geometric mean inequality, Cauchy-Schwarz inequality, Chebyshev inequality, rearrangement inequality, convex and concave functions and Muirhead's theorem. More than 400 problems are included in the book and their solutions are explained. A chapter on geometric inequalities is a special feature of this book. Most of these problems are from International Mathematical Olympiads and from many national Mathematical Olympiads.

The book is intended to help students who are preparing for various mathematical competitions. It is also a good sourcebook for graduate students in consolidating their knowledge of inequalities and their applications.

Hindustan Book Agency; 2018; 532 pages; Softcover; ISBN: 978-93-86279-68-2; List US\$72; AMS members US\$57.60; Order code HIN/75

Titles published by the Hindustan Book Agency (New Delhi, India) include studies in advanced mathematics, monographs, lecture notes, and/or conference proceedings on current topics of interest.
