

# INTRODUCING

 Diamond Open Access Journal

*Communications of the American Mathematical Society* (CAMS) is a new journal designed to provide a home for the very best research and review articles across all areas of mathematics. The journal will be a natural home for both pure and applied mathematics, presenting a window into a holistic view of mathematics and its applications to a wide range of disciplines. The AMS expects the journal to be a diverse and inclusive home for mathematicians around the world in support of emerging research.

CAMS uses a Diamond Open Access model, meaning that there are no article processing charges for authors and that all published articles will be freely available to read without charge to individuals or institutions.

CAMS will be led by a stellar group of mathematicians across all aspects of mathematics, under the leadership of Ralph Cohen (Stanford University) and Qiang Du (Columbia University) as Co-managing Editors.

---

## EDITORIAL BOARD:

### Co-managing Editors:

- Ralph Cohen, *Stanford University*
- Qiang Du, *Columbia University*

### Editors:
