SUPPORT THE AMS 2020 FUND

Join us on the path toward an equitable future.

The 2020 Fund supports and promotes the scholarship of Black mathematicians in perpetuity.

This is a permanent fund, dedicated to the long-term work of creating equity in mathematics for Black students and professionals. It is part of the multi-pronged approach the AMS is taking to create equity in mathematics.

Members of the AMS Governance established this fund through personal gifts in the summer of 2020, in solidarity with the Black Lives Matter movement, and in acknowledgment of historic failures of the AMS. Hundreds of donors have since contributed to build this important fund.

We hope that you will join this community of donors and make a gift in support of greater equity in mathematics.
