How do AMS Graduate Student Chapters support the mathematical community and beyond?

University of Hawaiʻi

Community Outreach:
Despite the pandemic, U Hawaiʻi hosted events that built camaraderie and furthered education, while helping the broader community. Members organized “Be a Scientist Day” where they worked with Hawaiʻi’s Institute for Human Services to provide math and science-based activities and food to local children from an often-underserved community. The kids learned about coding and other topics, and were encouraged to engage in science.

Oklahoma State University

Math Seminars:
OSU said their most rewarding result of 2020–2021 was their ability to keep their chapter alive during a time when many other voluntary campus organizations folded. OSU continued their math seminar, which uplifted members both academically and socially amidst the COVID-19 pandemic.

Washington State University

Workshops:
WSU was very active despite the pandemic. 2020–2021 included valuable workshops, including a two-part workshop on LaTeX, one on MATLAB, and one on the learning management system Canvas. WSU also continued its tradition of weekly teas, and held several game nights—all in a virtual format.

The Chapter Program makes meaningful contributions to the professional development of graduate students in the mathematical sciences and connects graduate students with AMS offerings.
