Asymptotic Geometric Analysis, Part II

Shiri Artstein-Avidan, Tel Aviv University, Israel, Apostolos Giannopoulos, University of Athens, Greece, and Vitali D. Milman, Tel Aviv University, Israel

This book is a continuation of Asymptotic Geometric Analysis, Part I, which was published as volume 202 in this series.

Among the topics covered in the book are measure concentration, isoperimetric constants of log-concave measures, thin-shell estimates, stochastic localization, the geometry of Gaussian measures, volume inequalities for convex bodies, local theory of Banach spaces, type and cotype, the Banach-Mazur compactum, symmetrizations, restricted invertibility, and functional versions of geometric notions and inequalities.

Mathematical Surveys and Monographs, Volume 261; 2021; approximately 686 pages; Softcover; ISBN: 978-1-4704-6360-1; List US$125; AMS members US$100; MAA members US$112.50; Order code SURV/261
