Dynamic Optimization for Beginners

With Prerequisites and Applications

Piermarco Cannarsa, *University of Rome Tor Vergata, Rome, Italy*, and **Filippo Gazzola**, *Polytechnic Institute of Milan, Milan, Italy*

The primary purpose of this book is to give interested readers a friendly introduction to this subject, providing them with the essential ideas needed to handle most of the concrete situations they will encounter. The main topics covered are calculus of variations, optimal control theory, and dynamic programming.

EMS Textbooks in Mathematics, Volume 24; 2021; 360 pages; Hardcover; ISBN: 978-3-98547-012-9; List US\$59; AMS members US\$47.20; Order code EMSTEXT/24
