Functional Analysis Second Edition

S. Kesavan, *Institute of Mathematical Science, Chennai, Tamil Nadu, India*

This book is suited for a first course on Functional Analysis at the masters level. Efforts have been made to illustrate the use of various results via examples taken from differential equations and the calculus of variations, either through brief sections or through exercises. So, this book will be particularly useful for students who aspire to a research career in the applications of mathematics.

Special emphasis has been given to the treatment of weak topologies and their applications to notions like reflexivity, separability, and uniform convexity.

Hindustan Book Agency; 2022; 300 pages; Softcover; ISBN: 978-81-95196-13-5; List US\$56; AMS members US\$44.80; Order code HIN/84

Titles published by the Hindustan Book Agency (New Delhi, India) include studies in advanced mathematics, monographs, lecture notes, and/or conference proceedings on current topics of interest.
