Organize a 2025 Mathematics Research Community (MRC)

Bring your expertise and help generate new collaborations in your research area.

Organize a week-long, hands-on summer MRC conference and:

- work with motivated early-career mathematicians;
- help early-career professionals form a network of lasting collaborators;
- share insights as a scholar and a mentor; and
- enjoy focused research time in a week-long retreat setting.

You plan the week’s scientific program; AMS staff will arrange all conference logistics.

We welcome proposals in all areas of pure, applied, and interdisciplinary mathematics, including topics of relevance in business, entrepreneurial, government labs and agencies, industry, and non-profit (BEGIN) arenas.

Details about the MRC program and guidelines for organizer preparation can be found at www.ams.org/mrc-proposals-25.

Email expressions of interest, proposals for 2025, and inquiries for future years to: mrc2025@ams.org

The target date for expressions of interest and initial proposals is September 15, 2023.

Full proposals received by November 30, 2023, will receive full consideration.

The 2025 MRC program is funded by the National Science Foundation, the AMS, and private donors.
