Analysis II
Fourth Edition
Terence Tao, University of California Los Angeles, CA

This is part two of a two-volume introduction to real analysis and is intended for honours undergraduates who have already been exposed to calculus. The emphasis is on rigour and on foundations. The material starts at the very beginning—the construction of the number systems and set theory—then goes on to the basics of analysis, through to power series, several variable calculus and Fourier analysis, and finally to the Lebesgue integral.

Hindustan Book Agency; 2022; 242 pages; Hardcover; ISBN: 978-81-95196-12-8; List US$52; AMS members US$41.60; Order code HIN/83

Titles published by the Hindustan Book Agency (New Delhi, India) include studies in advanced mathematics, monographs, lecture notes, and/or conference proceedings on current topics of interest.
