

New from Mathematics Circles Library: a new Mathematics Via Problems volume

A copublication of the AMS and the Simons Laufer Mathematical Sciences Institute (SLMath), formerly known as MSRI.

These books are translations from Russian of *Parts I, (Algebra), II (Geometry), and III (Combinatorics)* of the book *Mathematics Through Problems: From Olympiads and Math Circles to Profession*. The main goal of these books is to develop important parts of mathematics through problems. The problems are carefully arranged to provide a gradual introduction into each subject and are often accompanied by hints and/or complete solutions.
