New from the Tata Institute of Fundamental Research

Arithmetic Geometry

N. Fakhruddin, Tata Institute of Fundamental Research, Mumbai, India, E. Ghate, Tata Institute of Fundamental Research, Mumbai, India, A. Nair, Tata Institute of Fundamental Research, Mumbai, India, C. S. Rajan, Tata Institute of Fundamental Research, Mumbai, India, and S. Varma, Tata Institute of Fundamental Research, Mumbai, India, Editors

This book contains the proceedings of the International Colloquium on Arithmetic Geometry organized by the Tata Institute of Fundamental Research in January 2020, one of a series of colloquia held every four years since 1956. This volume contains original contributions, as well as expository material, by leading experts on a range of topics in arithmetic geometry, including the arithmetic of local and global fields, Galois representations and their deformations, Shimura varieties, and automorphic forms.

A Tata Institute of Fundamental Research Publication. Distributed worldwide except in India, Bangladesh, Bhutan, Maldives, Nepal, Pakistan, and Sri Lanka.
