PROCEEDINGS

OF THE

AMERICAN MATHEMATICAL SOCIETY

VOLUME 12, NUMBER 3

JUNE, 1961

Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and details of its meetings. It contains some of the officially invited addresses presented before the Society, research announcements and problems, and reviews of advanced mathematical books.

One volume of six numbers is planned for 1961. The subscription price is $7.00. The prices of back volumes, insofar as they are available, are as follows: vols. 1–27, 29 (1894–1921, 1923), $23.50 each; vol. 28 (1922), $19.70; vols. 30–35 (1924–1929), $20.00 each; vols. 36–55 (1930–1949), $28.00 each; vols. 56–65 (1950–1960), $14.00 each.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called MATHEMATICAL PEARLS was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Department of Mathematics, University of California, Berkeley 4, California; in probability, real variables, logic, and foundations to P. R. HALMOS, Eckhart Hall, University of Chicago, Chicago 37, Illinois; in abstract analysis to either P. R. HALMOS or ALEX ROSENBERG; in geometry and topology to E. H. SPANIER, Department of Mathematics, University of California, Berkeley 4, California; in other branches of analysis, applied mathematics, and all other fields to R. P. BOAS, Lunt Building, Northwestern University, Evanston, Illinois. All other communications to the editors should be addressed to the Managing Editor, P. R. HALMOS.

One volume of six numbers is planned for 1961. The subscription price is $11.00. Vols. 1–11 (1950–1960) are available at the price of $14.00 each. Volume 1 was published in 1950.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer memoirs than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1961. The price per volume is $8.00. Volumes 1–36 (1900–1934) consist of four numbers each. Volumes 66–67 (1949) and 78–88 (1955–1958) consist of two numbers each. All other volumes consist of three numbers each. The prices of back volumes, insofar as they are available, are as follows: vols. 1–36 (1900–1934), $16.00 each; vols. 37–65, 68–77 (1934–1954), $12.00 each; vols. 66, 67, 78–97 (1949, 1955–1960), $8.00 each.

Journals Published by the

American Mathematical Society

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

The publication of MATHEMATICAL REVIEWS was begun in 1940. Starting in 1961, it appears monthly, in two parts, and the price per annual volume is $50.00. Prior to 1961 it appeared in eleven single issues. Orders for complete volumes only are accepted. Volumes 10 and 17 are not available. Volumes 1–9, 11–16, and 18–21 are available at the following prices: Vols. 1–14 (1940–1953), $24.00 each; all other volumes $50.00.

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet DOKLADY. (The DOKLADY AKADEMII NAUK SSSR is issued three times a month, six issues constituting a volume.)

Rates per annual volume are as follows: Domestic subscriptions, $17.50; foreign subscriptions, $20.00. Single issues are $5.00.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

The subscription price is $7.00 per annual volume of 7 numbers. A single copy is $2.00.

All communications should be addressed to the Editor, G. L. WALKER, 190 Hope Street, Providence 6, R. I. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts of the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the table of contents.

Memoirs of the American Mathematical Society

This is a series of paperbound research tracts which are of the same general character as papers published in the TRANSACTIONS. An issue contains either a single monograph or a group of cognate papers. Published at irregular intervals. The latest numbers in this series are:

27. Emery Thomas, *The generalized Pontrjagin cohomology operations and rings with divided powers.* 82 pp. 1957. $1.70
28. Ernst Snapper, *Cohomology groups and genera of higher-dimensional fields.* 100 pp. 1957.   1.90
29. Edward Halpern, *Twisted polynomial hyperalgebras.* 61 pp. 1958.   1.50
30. L. Auslander and L. Markus, *Flat Lorentz 3-manifolds.* 60 pp. 1959.   2.00
31. W. S. Loud, *Periodic solutions of $x'' + cx' + g(x) = \epsilon f(t)$.* 58 pp. 1959.   2.00
32. R. S. Pierce, *Translation lattices.* 66 pp. 1959   1.70
33. Ernst Snapper, *Cohomology theory and algebraic correspondences.* 96 pp. 1959.   1.90
34. E. M. Zaustinsky, *Spaces with non-symmetric distance.* 91 pp. 1959.   2.00
35. Richard Bellman and K. L. Cooke, *Asymptotic behavior of solutions of differential-difference equations.* 91 pp. 1959.   2.00
36. Richard S. Palais, *The classification of G-spaces.* 72 pp. 1960.   1.65
37. Paul Olum, *Invariants for effective homotopy classification and extension of mappings.* 60 pp. 1961   1.60
