A. ALGEBRA AND NUMBER THEORY

05. Combinatorics
   Bondy, J. A. Balanced colourings and the four colour conjecture, 241.

06. Order, Lattices, Ordered Algebraic Structures
   Hartman, Phillip A. Integrally closed and complete ordered quasigroups and loops, 250.
   Martinez, Jorge. Unique factorization in partially ordered sets, 213.
   Nemitz, William C. Implicative homomorphisms with finite ranges, 319.
   Stralka, A. R. The lattice of ideals of a compact semilattice, 175.

10. Number Theory
   Dressier, Robert E. A stronger Bertrand's postulate with an application to partitions, 226.

12. Algebraic Number Theory, Field Theory and Polynomials
   Boyce, William M. On polynomials which commute with a given polynomial, 229.
   Jacobson, David. On perfect subfields over which a field is separably generated, 292.

13. Commutative Rings and Algebras
   Rossa, R. F. More properties inherited by the lower radical, 247.

14. Algebraic Geometry
   Hoobler, Raymond T. and Magid, Andy R. Finite group schemes over fields, 310.

15. Linear and Multilinear Algebra; Matrix Theory (finite and infinite)
   Gibson, P. M. A lower bound for the permanent of a $(0, 1)$-matrix, 245.
   Lazer, A. C. Application of a lemma on bilinear forms to a problem in nonlinear oscillations, 89.

16. Associative Rings and Algebras
   Byrd, K. A. Rings whose quasi-injective modules are injective, 235.
   Carns, Gail L. and Chao, Chong-Yun. On the radical of the group algebra of a $p$-group over a modular field, 323.
   Lanski, Charles. Rings with involution whose symmetric elements are regular, 264.
   Passman, D. S. On the ring of quotients of a group ring, 221.
   Rossa, R. F. More properties inherited by the lower radical, 247.
   Stone, H. E. Ideals in halfrings, 8.
   Warner, Seth. Normality of certain topological rings, 423.
   Wong, Edward T. Regular rings and integral extension of a regular ring, 313.

17. Nonassociative Rings and Algebras

18. Category Theory, Homological Algebra

635
### SUBJECT INDEX

Sinclair, A. M. *Annihilator ideals in the cohomology of Banach algebras*, 361.
Van Osdol, D. H. *Coalgebras, sheaves, and cohomology*, 257.

#### 20. Group Theory and Generalizations

Hale, Mark P., Jr. *Normally closed saturated formations*, 337.
Miller, Donald W. *A characterization of groups with isomorphic subgroups*, 43.

#### B. ANALYSIS

### 26. Real Functions

Hsu, Ih-Ching. *On a converse of Young’s inequality*, 107.
Kroll, Jeffrey R. and Smith, Keith P. *An eigenvalue problem for the Stieltjes mean sigma-integral related to Gronwall’s inequality*, 384.

### 28. Measure and Integration

#### 30. Functions of a Complex Variable

Boyce, William M. *On polynomials which commute with a given polynomial*, 229.
Callas, Nicholas P. and Thron, W. J. *Singularities of a class of meromorphic functions*, 445.
Eenigenburg, P. J. *Boundary behavior of starlike functions*, 428.
Goodman, A. W. *Coefficients for the area theorem*, 438.
Gupta, R. S. *An extremal problem for functions with positive real part*, 455.
Kelleher, J. J. and Taylor, B. A. *The entire functions separate ßC*, 505.
Smart, John Roderick. *On meromorphic functions commuting with elements of a function group*, 343.

#### 32. Several Complex Variables and Analytic Spaces

Zame, William R. *Homomorphisms of rings of germs of analytic functions*, 410.

#### 34. Ordinary Differential Equations

Benson, Donald C. *Oscillation of solutions of a generalized Liénard equation*, 101.
Jones, Gary D. *A property of y'' + p(x)y' + q(x)y = 0*, 420.

Lazer, A. C. *Application of a lemma on bilinear forms to a problem in nonlinear oscillations*, 89.

Stevens, Robert R. *A congruence criterion*, 75.

35. **Partial Differential Equations**

Snow, Donald R. *Gronwall's inequality for systems of partial differential equations in two independent variables*, 46.

40. **Sequences, Series, Summability**

Callas, Nicholas P. and Thron, W. J. *Singularity of a class of meromorphic functions*, 445.

41. **Approximations and Expansions**

Jerome, Joseph W. *Asymptotic estimates of the n-widths in Hilbert space*, 367.

Richards, Franklin. *On the saturation class for spline functions*, 471.

42. **Fourier Analysis**

45. **Integral Equations**

Shilepsky, Carol. *A note on the asymptotic behavior of an integral equation*, 111.

46. **Functional Analysis**

Banilower, H. *Projecting C(S) onto C_c(S)*, 349.

Barnes, Bruce A. *Pure states with the restriction property*, 491.

Leach, E. B. and Whitfield, J. H. M. *Differentiable functions and rough norms on Banach spaces*, 120.

Peyser, Gideon. *On spaces with norms of negative and positive order*, 81.

Sinclair, A. M. *Annihilator ideals in the cohomology of Banach algebras*, 361.

Tan, Kok-Keong. *Common fixed point theorems for almost weakly periodic nonexpansive mappings*, 355.

Warner, Seth. *Normality of certain topological rings*, 423.

Zame, William R. *Homomorphisms of rings of germs of analytic functions*, 410.

47. **Operator Theory**

Chernoff, Paul R. *Perturbations of dissipative operators with relative bound one*, 72.

Gehé, L. *Cyclic vectors of a cyclic operator span the space*, 109.

Kauffman, Robert M. *Unitary groups and commutators*, 95.

Tan, Kok-Keong. *Common fixed point theorems for almost weakly periodic nonexpansive mappings*, 355.

49. Calculus of Variations and Optimal Control
   Gordon, William B. Convex functions and harmonic maps, 433.

C. Applied Mathematics

65. Numerical Analysis
   Schultz, Martin H. Quadrature-Galerkin approximations to solutions of elliptic
differential equations, 511.

D. Geometry

52. Convex Sets and Geometric Inequalities
   Fefferman, Charles, Jodeit, Max, Jr. and Perlman, Michael D. A spherical surface
measure inequality for convex sets, 114.

53. Differential Geometry
   Nagasawa, Jun. Linear isotropy group of an affine symmetric space, 516.

E. Logic and Foundations

02. Logic and Foundations
   Parikh, R. J. A note on rigid substructures, 520.
   Tall, Franklin D. A set-theoretic proposition implying the metrizability of normal
Moore spaces, 195.

F. Statistics and Probability

60. Probability Theory and Stochastic Processes
   Landers, Dieter. The convergence determining class of connected open sets in
product spaces, 529.
   Padgett, W. J. and Tsokos, Chris P. A random Fredholm integral equation, 534.
   Samal, G. and Mishra, M. N. On the lower bound of the number of real roots of a
random algebraic equation with infinite variance, 523.
   *Strait, Peggy Tang. A note on Lévy's Brownian process on the Hilbert sphere, 207.

G. Topology

22. Topological Groups, Lie Groups
   Brezin, Jonathan. Applications of nilmanifold theory to diophantine approxima-
tions, 543.
   Robertson, Lewis and Wilcox, Theodore W. Splitting in MAP groups, 613.
   Scheffer, Wladimiro, Maps between topological groups that are homotopic to
homomorphisms, 562.
   Stralka, A. R. The lattice of ideals of a compact semilattice, 175.
   Wiley, Samuel J. Extensions of left uniformly continuous functions on a topological
semigroup, 572.

54. General Topology
   Baggs, Ivan. Conditions implying continuity of open and closed functions, 185.
   Banilower, H. Projecting C(S) onto C₀(S), 349.
   Bentley, H. L. Some Wallman compactifications determined by retracts, 587.

Leach, E. B. and Whitfield, J. H. M. Differentiable functions and rough norms on Banach spaces, 120.
RESEARCH AND REVIEW JOURNALS PUBLISHED
BY THE AMERICAN MATHEMATICAL SOCIETY

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and a department of research announcements.

The current issue of the journal lists editors to whom prospective publications should be addressed. Publication is bimonthly.

Transactions of the American Mathematical Society

This monthly journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than those in the PROCEEDINGS.

The current issue of the journal lists editors to whom prospective publications should be addressed.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Currently publication is monthly; two volumes are published each year, each volume consisting of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Soviet Mathematics—Doklady

This bimonthly is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long.

Mathematics of the USSR—Izvestija

This journal is a cover-to-cover translation of IZVESTIJA AKADEMII NAUK SSSR SERIJA MATEMATIČESKAJA, published bimonthly by the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published bimonthly starting with Volume 1, Number 1, January-February 1967.

Mathematics of the USSR—Sbornik

This journal is a cover-to-cover translation of MATEMATIČESKIÍ SBORNIK (New Series), published monthly by the Moscow Mathematical Society and the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published monthly starting with Volume 1, Number 1, January 1967.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper.

*Algebra and algebraic number theory.*
