A. ALGEBRA AND NUMBER THEORY

05. Combinatorics
   Bang, C. M. Isomorphism types of infinite symmetric graphs, 31.
   Wright, E. M. The probability of connectedness of an unlabelled graph can be less
   for more edges, 21.

06. Order, Lattices, Ordered Algebraic Structures
   Schnare, Paul S. The topological complementation theorem à la Zorn, 285.

08. General Mathematical Systems
   Bang, C. M. Isomorphism types of infinite symmetric graphs, 31.
   Davis, Robert C. Quasi-cotripleable categories, 43.
   Grätzer, G. and Lakser, H. Two observations on the congruence extension property,
   63.

10. Number Theory
   Brown, Lawrence G. Topologically complete groups, 593.
   Davis, Martin. On the number of solutions of Diophantine equations, 552.
   Joshi, V. S. On the order of some error functions related to k-free integers, 325.
   Mordell, L. J. Rational functions representing all residues mod p. II, 411.
   Spira, Robert. Zeros of ζ(s) in the critical strip, 59.

12. Algebraic Number Theory, Field Theory and Polynomials
   Weinberger, P. J. A counterexample to an analogue of Artin's conjecture, 49.

13. Commutative Rings and Algebras
   Brown, William C. An application of the algebra of differentials of infinite rank, 9.
   Cheatham, T. and Enochs, E. The epimorphic images of a Dedekind domain, 37.
   Gustafson, William H. On an induction theorem for relative Grothendieck groups,
   26.
   Heinzer, William and Ohm, Jack. The finiteness of I when R[X]/I is R-flat. II, 1.
   Janusz, G. J. The Schur index and roots of unity, 387.
   Kohn, Peter. Ideals generated by three elements, 55.
   Tang, Hwa Tsang. Gauss' lemma, 372.
   Vasconcelos, Wolmer V. The local rings of global dimension two, 381.

14. Algebraic Geometry

15. Linear and Multilinear Algebra; Matrix Theory (finite and infinite)
   Solazzi, Robert E. On isomorphisms between certain congruence groups, 405.
   Suchan, Gerald E. Operators associated with a pair of nonnegative matrices, 53.

16. Associative Rings and Algebras
   Albert, A. A. Tensor products of quaternion algebras, 65.
   Boratyński, M. Injective dimension and completeness, 357.
   Brown, William C. A note on higher derivations and integral dependence, 367.
   Fuelberth, John D. and Teply, Mark L. A splitting ring of global dimension two,
   317.

625
Hutchinson, John and Zelmanowitz, Julius. *Quotient rings of endomorphism rings of modules with zero singular submodule*, 16.

Monk, G. S. *A characterization of exchange rings*, 349.

Nico, William R. *An improved upper bound for global dimension of semigroup algebras*, 34.

17. **Nonassociative Rings and Algebras**

Goldman, Jerry. *Nodal algebras defined by skew-symmetric bilinear forms*, 333.

McCrimmon, Kevin. *Quadratic Jordan algebras whose elements are all invertible or nilpotent*, 309.

18. **Category Theory, Homological Algebra**

Davis, Robert C. *Quasi-cotripleable categories*, 43.

Fuelberth, John D. and Teply, Mark L. *A splitting ring of global dimension two*, 317.

20. **Group Theory and Generalizations**

Baumslag, Gilbert. *A finitely presented metabelian group with a free abelian derived group of infinite rank*, 61.

Hill, W. Mack and Wright, Charles R. B. *Normal subgroups contained in the Frattini subgroup*, 413.

Janusz, G. J. *The Schur index and roots of unity*, 387.

Nico, William R. *An improved upper bound for global dimension of semigroup algebras*, 34.

Shult, E. *A note on Janko's simple group of order 175,560*, 342.

Solazzi, Robert E. *On the isomorphisms between certain congruence groups*, 405.

**B. Analysis**

26. **Real Functions**

Lawrence, Scott and Segalman, Daniel. *A generalization of two inequalities involving means*, 96.

28. **Measure and Integration**

Gowrisankaran, Chandra. *Quasi-invariant Radon measures on groups*, 503.

Saworotnow, Parfeny P. *Integral as a certain type of a positive definite function*, 93.

30. **Functions of a Complex Variable**

McCarty, Carl P. *Functions with real part greater than α*, 211.

32. **Several Complex Variables and Analytic Spaces**

Barth, Theodore J. *The Kobayashi distance induces the standard topology*, 439.

Patterson, David B. *The Teichmüller spaces are distinct*, 179.
34. Ordinary Differential Equations

Chiou, Kuo-liang. *The existence of oscillatory solutions for the equation*\[ \frac{d^2y}{dt^2} + q(t)y = 0, 0 < r(t) < 1, 120.\]

Evans, W. D. *On the length of gaps in the essential spectrum of a generalised Dirac operator*, 137.

Ford, Wayne T. *On the first boundary value problem for* \( h(x, x', t) = f(x, x', t) \), 491.

Wilson, H. K. *Gauge functions and limit sets for nonautonomous ordinary differential equations*, 487.

35. Partial Differential Equations

Freund, D. D. *A note on Kaplun limits and double asymptotics*, 464.

Strauss, Monty J. *Uniqueness and norm convexity in the Cauchy problem for evolution equations with convolution operators*, 423.

40. Sequences, Series, Summability

41. Approximations and Expansions

Freund, D. D. *A note on Kaplun limits and double asymptotics*, 464.

42. Fourier Analysis

*Blei, Ron C. A note on some characterizations of Sidon sets*, 303.

Burnham, J. T. *Nonfactorization in subsets of the measure algebra*, 104.

44. Integral Transforms, Operational Calculus

Petersen, Bent E. *On the Laplace transform of a temperate distribution supported by a cone*, 123.

45. Integral Equations

Lew, John S. *On linear Volterra integral equations of convolution type*, 450.

46. Functional Analysis

INDEX TO VOLUME 35

October

Brown, H. I., Kerr, D. R. and Stratton, H. H. Corrections to "The structure of $B(c)$ and extensions of the concept of conull matrix," 621.

Chalice, Donald R. On a theorem of Rudin, 296.

Jenkins, J. W. On the characterization of Abelian $W^*$-algebras, 436.

Koehler, Donald O. The analytic properties of $G_n$ spaces, 201.

Moore, Berrien III. A factorable weight with zero Szegö infimum, 301.

Petersen, Bent E. On the Laplace transform of a temperate distribution supported by a cone, 123.

Samn, Sherwood. Existence of a seminormal basis in $C[0, 1]$, 183.

Shapiro, Joel H. Noncoincidence of the strict and strong operator topologies, 81.

Summers, W. H. Separability in the strict and substrict topologies, 507.

Ylinen, Kari. A note on the compact elements of $C^*$-algebras, 305.

47. Operator Theory

Clark, Douglas N. Commutants that do not dilate, 483.

Fox, Charles. Applications of Laplace transforms and their inverses, 193.

Gossez, Jean-Pierre. On the range of a coercive maximal monotone operator in a nonreflexive Banach space, 88.

Hanna, Michael P. Generalized overrelaxation and Gauss-Seidel convergence on Hilbert space, 524.

Howland, James S. Nonexistence of asymptotic observables, 175.

Kritt, Brian. The Fourier transform of an unbounded spectral distribution, 74.

Kurtz, Thomas G. A random Trotter product formula, 147.

Sato, Ryotaro. On a general ratio ergodic theorem with weighted averages, 177.

C. Applied Mathematics

65. Numerical Analysis

Hanna, Michael P. Generalized overrelaxation and Gauss-Seidel convergence on Hilbert space, 524.

81. Quantum Mechanics

Simon, Barry. Continuum embedded eigenvalues in a spatially cutoff $P(\phi)_2$ field theory, 223.

90. Economics, Operations Research, Programming, Games

Peleg, Bezalel. Topological properties of the efficient point set, 531.

D. Geometry

52. Convex Sets and Geometric Inequalities

Hare, W. R., Jr. and Smith, C. R. On convex subsets of a polytope, 238.

Stolarsky, Kenneth B. Sums of distances between points on a sphere, 547.

Witsenhausen, H. S. On closed curves in Minkowski spaces, 240.
53. Differential Geometry
Hansen, Vagn Lundsgaard. Integrable parallelizable manifolds, 543.
Houh, Chorng-Shi. On an integral formula for closed hypersurfaces of the sphere, 234.
Schneider, Rolf. Closed convex hypersurfaces with second fundamental form of constant curvature, 230.

E. Logic and Foundations

02. Logic and Foundations
Davis, Martin. On the number of solutions of Diophantine equations, 552.

04. Set Theory
Blass, Andreas. Weak partition relations, 249.
Zuckerman, Martin M. Ordinal sum-sets, 242.

F. Statistics and Probability

60. Probability Theory and Stochastic Processes
Huff, Barthel W. Further comments on the continuity of distribution functions obtained by superposition, 561.

G. Topology

22. Topological Groups, Lie Groups
Brown, Lawrence G. Topologically complete groups, 593.
Das, Mrinal Kanti. Some properties of special functions derived from the theory of continuous transformation groups, 565.
McCharen, John D. Euclidean neighborhoods in compact semigroups, 291.

54. General Topology
Cornette, J. L. and Lehman, B. Another locally connected Hausdorff continuum not connected by ordered continua, 281.
Green, John William. Filter characterizations of C- and C*-embeddings, 574.
Kannan, V. A countable connected Urysohn space containing a dispersion point, 289.
Martin, Harold W. Metrization of symmetric spaces and regular maps, 269.
Nanzetta, Philip and Plank, Donald. Closed ideals in C(\(X\)), 601.
Schnare, Paul S. The topological complementation theorem à la Zorn, 285.

55. Algebraic Topology
Chapman, T. A. Contractible Hilbert cube manifolds, 254.
Feustel, C. D. On embedding annuli in \(M^3\), 581.
Gordon, C. McA. and Heil, W. Simply-connected branched coverings of \(S^3\), 287.
Lyon, Herbert C. Knots without unknotted incompressible spanning surfaces, 617.

57. Manifolds and Cell Complexes
Erle, Dieter. Smooth structure and signature of codimension 2 embeddings, 611.
Feder, S. and Segal, D. M. Immersions and embeddings of projective spaces, 590.
Hansen, Vagn Lundsgaard. *Integrably parallelizable manifolds*, 543.
Hodgson, J. P. E. *The Whitney technique for Poincaré complex embeddings*, 263.
Knoblauch, Tom. *Toroidal arcs are cellular*, 607.
Rinne, Robert L. *δ-equivariant bordism of maps*, 587.
Stong, R. E. *Map bordism of maps*, 259.

---

**58. Global Analysis, Analysis on Manifolds**

Strauss, Monty J. *Uniqueness and norm convexity in the Cauchy problem for evolution equations with convolution operators*, 423.

---

Generalizations of results of Agmon and Nirenberg to the Cauchy problem of evolution equations, 431.

RESEARCH AND REVIEW JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and a department of research announcements.

The current issue of the journal lists editors to whom prospective publications should be addressed. Publication is bimonthly.

Transactions of the American Mathematical Society

This monthly journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than those in the PROCEEDINGS.

The current issue of the journal lists editors to whom prospective publications should be addressed.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Currently publication is monthly; two volumes are published each year, each volume consisting of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Soviet Mathematics—Doklady

This bimonthly is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long.

Mathematics of the USSR—Izvestija

This journal is a cover-to-cover translation of IZVESTIJA AKADEMII NAUK SSSR SERIIA MATEMATIKESKAJA, published bimonthly by the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published bimonthly starting with Volume 1, Number 1, January-February 1967.

Mathematics of the USSR—Sbornik

This journal is a cover-to-cover translation of MATHEMATICSKII SBORNIK (New Series), published monthly by the Moscow Mathematical Society and the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published monthly starting with Volume 1, Number 1, January 1967.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper.

**Algebra and algebraic number theory.**
