Proceedings of the American Mathematical Society
This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

1. On January 22, 1975, the Council of the American Mathematical Society voted: “To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 11 typed pages.

“Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.”

2. On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author’s name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 87–89 (1983) are $206.00 list; $103.00 member. Combination paper and microform (microfiche or microfilm) subscription prices are $254.00 list; $127.00 member. Microfiche of each issue will be mailed the fastest way before the camera copy is sent to the printer.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–77, $52.00 list, $39.90 member; for Volumes 78–83, $84.00 list, $63.00 member; for Volumes 84–86, $95.00 list, $71.00 member. Beginning with Volume 68, back volumes are available in microfiche or microfilm; volumes before Volume 68 are available in microfilm only. The microfilm may be mounted on spools or in Kodak or 3M cartridges. Only current subscribers are eligible to purchase back volumes on microform. Write to the AMS for a detailed price list.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R.I. 02940

Information on Copying and Reprinting can be found at the back of this journal.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 11 (8 1/2” × 11”) pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. The 1980 Mathematics Subject Classification with instructions for its use can be found in the 1978 Subject Index to Mathematical Reviews.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

REPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author’s paper for publication dependent upon payment of the page charge.

BACKLOG. 50 pages. Papers currently being received by the editors will be published in 9–11 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given. Reproduction, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classifications from the 1980 Mathematics Subject Classification and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)
Thomas J. Jech, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

COMBINATORICS AND DISCRETE MATHEMATICS (05 15)
Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

COMMUTATIVE ALGEBRA (06 13 14 15 18)
William C. Waterhouse, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

GENERAL ALGEBRA (16 17 18 08)
Donald Passman, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53706

GROUP THEORY (20)
David M. Goldschmidt, Department of Mathematics, University of California at Berkeley, Berkeley, California 94720

ALGEBRAIC AND DIFERENTIAL TOPOLOGY (55 57 58)
Reinhard E. Schultz, Department of Mathematics, Purdue University, West Lafayette, Indiana 47907

REAL VARIABLES (26 28 40)
J. Jerry Uhl, Jr., Department of Mathematics, University of Illinois, Urbana, Illinois 61801

COMPLEX VARIABLES (30 31 32)
W. E. Kirwan, Department of Mathematics, University of Maryland, College Park, Maryland 20742

NUMBER THEORY (10)
Larry J. Goldstein, Department of Mathematics, University of Maryland, College Park, Maryland 20742

ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)
George R. Sell, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

PARTIAL DIFFERENTIAL EQUATIONS (35 49)
Walter Littman, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

GENERAL ANALYSIS (41 42 43 44 45)
Richard R. Goldberg, Department of Mathematics, Vanderbilt University, Nashville, Tennessee 37235

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)
Catherine L. Olsen, Department of Mathematics, State University of New York at Buffalo, Buffalo, New York 14214

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)
William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)
Donald E. Sarason, Department of Mathematics, University of California at Berkeley, Berkeley, California 94720

LIE GROUPS AND GEOMETRY (22 51 53)
David G. Ebin, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794

GENERAL TOPOLOGY (54)
David J. Lutzer, Department of Mathematics and Statistics, Miami University, Oxford, Ohio 45056
Doug W. Curtis, Department of Mathematics, Louisiana State University, Baton Rouge, Louisiana 70803

PROBABILITY AND CERTAIN OTHER FIELDS (60–99 inclusive)
Bert E. Fristedt, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

All other communications should be addressed to the Managing Editor, Richard R. Goldberg, at the above address.

ABCDEFGHJ—AMS—89876543
CONTENTS—Continued from back cover

Note on the residues of the singularities of a Riemannian foliation. By Xiang-Ming Mei 359
A theorem on the cardinality of $\kappa$-total spaces. By R. M. Stephenson, Jr. 367
Monotonic semiconjugacies onto expanding maps of the interval. By Bill Byers 371

H. COMBINATORICS

A composition theorem for $\delta$-codes. By C. H. Yang 375
CONTENTS

Vol. 89, No. 2       October 1983       Whole No. 292

A. ALGEBRA AND NUMBER THEORY

Extremal values of continuants. By G. Ramharter ........................................... 189
A localisation principle for quadratic spaces over Laurent extensions. By Raman Parimala
and Parvin Sinclair .................................................................................................. 202
Archimedean, semiperfect and π-regular lattice-ordered algebras with polynomial constraints
are f-algebras. By Stuart A. Steinberg .................................................................... 205
Sums of three integer squares in complex quadratic fields. By Dennis R. Estes and J. S.
Hsia ......................................................................................................................... 211

B. ANALYSIS

An extension of the Hausdorff-Toeplitz theorem on the numerical range. By Yik-Hoi Au-
Yeung and Nam-Kiu Tsing ...................................................................................... 215
Two Tauberian theorems for nonconvolution Volterra integral operators. By Gustaf
Gripenberg ............................................................................................................. 219
One example of the boundary behaviour of biholomorphic transformations. By B. L.
Fridman .................................................................................................................... 226
Support points of the unit ball of $H^p (1 \leq p \leq \infty)$. By Yusuf Abu-Muhanna ........ 229
On spectral synthesis for sets of the form $E = \text{Int}(E)$. By David Colella ............... 236
Some applications of generalized exponentials to partial differential equations. By J.
Abramowich ................................................................................................................ 239
Fourier type and complex interpolation. By Mario Milman ........................................ 246
The uniqueness of multiplication in function algebras. By Krzysztof Jarosz ................ 249
On the existence and boundary behavior of solutions to a class of nonlinear Dirichlet problems.
By Carlos E. Kenig and Wei-Ming Ni ..................................................................... 254
Inequalities for the derivative of a polynomial. By Abdul Aziz ................................. 259
Characterization of quasi-units in terms of equilibrium potentials. By Maynard Arsov
and Heinz Leutwiler .............................................................................................. 267
Crossed products of $C^*$-dynamical systems with ground states. By Masaharu Kusuda .. 273
Sets of uniqueness for a certain class $\mathcal{M}_e$ on the dyadic group. By Kaoru Yoneda .... 279
On the Bures distance and the Uhlmann transition probability of states on a von Neumann
algebra. By Hideki Kosaki ....................................................................................... 285
A semibounded closed symmetric operator whose square has trivial domain. By Paul R.
Chernoff ................................................................................................................... 289
Some results connected with a problem of Erdős. III. By J. Arias de Reyna .................. 291
A note on rank-one operators in reflexive algebras. By Cecelia Laurie and W. E. Long-
staff ......................................................................................................................... 293

D. GEOMETRY

A smooth scissors congruence problem. By Peter Greenberg .................................... 298

G. TOPOLOGY

Realizability and nonrealizability of Dickson algebras as cohomology rings. By Larry
Smith and R. M. Switzer ....................................................................................... 303
A note on $\alpha$-compact spaces. By Tekklehaimanot Retta ...................................... 314
A note on chains of open sets. By John Ginsburg ................................................. 317
A conjecture on compact Fréchet spaces. By Zhou Hao-Xuan ................................. 326
A Hilbert space limit for the iterated hyperspace functor. By H. Toruńczyk and J. West 329
Cardinal functions on Pixley-Roy hyperspaces. By Shoizo Sakai ............................. 336
CH and open subspaces of $F$-spaces. By Alan Dow ............................................. 341
Monadic properties of uniformities. By D. G. Coyle and M. E. Szabo ..................... 346
Connecting locally compact abelian groups. By Ed Enochs and Walt Gerlach ........ 351
Mapping theorems on mesocompact spaces. By Kuo-Shih Kao and Li-Sheng Wu ........ 355
