Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 14 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author’s name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 93–95 (1985) are $335.00 list; $268 institutional member; $201 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $10.00; subscribers in India must pay a postage surcharge of $30.00. Combination paper and microfiche subscription prices are $446.00 list; $357.00 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–89, $110.00 list, $88.00 institutional; for Volumes 90–92, $100.00 list, $100.00 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

Information on Copying and Reprinting can be found at the back of this journal.
INDEX TO VOLUME 94

“Starred items are Shorter Notes”

Allegretto, W.  *Sturmian theorems for second order systems*, 291.

Apostol, Tom M.  *Note on the trivial zeros of Dirichlet L-functions*, 29.

Arnold, J. T.  *The catenarian property of power series rings over a Prüfer domain*, 577.

Barge, Marcy and Martin, Joe.  *Dense periodicity on the interval*, 731.

Blau, Harvey I.  *On trivial intersection of cyclic Sylow subgroups*, 572.

Block, Louis and Franke, John E.  *Isolated chain recurrent points for one-dimensional maps*, 728.

Bloom, Steven.  *Boundedness of the maximal operator on weighted BMO*, 52.

Bor, Hüseyin.  *On \(|N, p_n|\) summability factors*, 419.

Charalambous, M. G.  *Spaces with noncoinciding dimensions*, 507.

Charatonik, Wlodzimierz J.  *A metric on hyperspaces defined by Whitney maps*, 535.

Chung, L. O. and Kobayashi, Y.  *Nil derivations and chain conditions in prime rings*, 201.

Coleman, R.  *A formal analogue of Hilbert’s Theorem 90*, 603.

Devaney, Robert L.  *Structural instability of \(\exp(z)\)*, 545.

Doković, Dragomir Ž.  *Inner derivations of division rings and canonical Jordan form of triangular operators*, 383.

Edelman, Paul H. and Walker, James W. *The homotopy type of hyperplane posets*, 221.

El Kohen, A. *On the Riesz-transforms along surfaces in $\mathbb{R}^3$*, 672.

Emmanuele, Giovanni. *Asymptotic behavior of iterates of nonexpansive mappings in Banach spaces with Opial’s condition*, 103.

Fox, Ralph and Kofner, Jacob. *A regular counterexample to the $\gamma$-space conjecture*, 502.

Franke, John E. *See Block, Louis.*

Gardner, R. J. *A problem of Sallee on equidecomposable convex bodies*, 329.

Ghosh, N. and Maurey, B. *The asymptotic-norming and the Radon-Nikodym properties are equivalent in separable Banach spaces*, 665.

Gillespie, D. C. *See Brown, E. M.*

Gintides, D. *Resonance and bifurcation of higher-dimensional tori*, 147.

Gjøk, T. *See Djikstra, J.*

Gurevič, R. *Equational theory of positive numbers with exponentiation*, 135.

Hattori, Yasunao. *A note on infinite-dimensional spaces defined by topological games*, 360.

Henderson, James P. *Recognizing $\sigma$-manifolds*, 721.

Herrero, Domingo A. *On the multiplicities of the powers of a Banach space operator*, 239.

Hobrock, John A. R. *See Bhatia, Rajendra.*

Howard, Ralph and Wei, S. Walter. *Inequalities relating sectional curvatures of a submanifold to the size of its second fundamental form and applications to pinching theorems for submanifolds*, 699.

Huikuri, A., Jenkins, J. W. and Ludwig, J. *Minimum eigenvalues for positive, ROCKLAND operators*, 718.

Humke, P. and Laczkovich, M. *Typical continuous functions are virtually nonmonotone*, 244.

Huotari, Robert and Legg, David. *Best monotone approximation in $L_1[0, 1]$, 279.

Hwang, C.-R. *Erratum to “Gaussian measure of large balls in a Hilbert space”*, 188.

Igusa, K. and Todorov, G. *Preprojective partitions and the determinant of the Hom matrix*, 189.

Ishikawa, G. *Strong limit theorems for orthogonal sequences in von Neumann algebras*, 229.

Jenkins, J. W. *See Huikuri, A.*

Jockusch, Carl G., Jr. and Mohrherr, Jeanleah. *Embedding the diamond lattice in the recursively enumerable truth-table degrees*, 123.

Johlhingam, P. *Test modules for projectivity*, 593.

Kamburelis, A. *See Cichoń, J.*

Kaper, H. G. *See Atkinson, F. V.*

Kechnis, Alexander S. *Determinacy with complicated strategies*, 333.

Kiang, Mo Tak. *See Edelstein, Michael.*

Kirow, Nikolai K. *Generic Fréchet differentiability of convex operators*, 97.

Kobayashi, Y. *See Chung, L. O.*

Kochman, Stanley O. *The Hurewicz image of Ray’s elements in $MSP_+$*, 715.
Kofner, Jacob. See Fox, Ralph.

Korzeniowski, Andrzej. See Stroock, Daniel W.

Kwong, Man Kam. See Atkinson, F. V.

Laczkovich, M. See Humke, P.

Legg, David. See Huotari, Robert.

Lequain, Yves. *A local characterization of Noetherian and Dedekind rings*, 369.

Leung, Y. J. and Schober, G. *High order coefficient estimates in the class S*, 659.

Löffler, Peter. See Davis, James F.

Lubineky, D. S. *Padé tables of a class of entire functions*, 399.

Ludwig, J. See Hulanicki, A.

Lutzer, D. See Dijkstra, J.

McDowell, Kenneth. See Bulman-Fleming, Sydney.

McDuff, Dusa. *Remarks on the homotopy type of groups of symplectic diffeomorphisms*, 348.

Malliah, Chinthayamma and Parameshwar Bhatta, S. *Lattices all of whose congruences are neutral, 49.

Marciniak, Zbigniew S. *A note on free products of linear groups*, 46.

Martin, Joe. See Barge, Marcy.

Masur, Howard. *Ergodic actions of the mapping class group*, 455.

Matsumoto, Shigenori and Morita, Shigeyuki. *Bounded cohomology of certain groups of homeomorphisms*, 539.

Maurey, B. See Ghoussoub, N.

Masur, T., Pflug, P. and Skwarczyński, M. *Invariant distances related to the Bergman function*, 72.

van Mill, J. See Dijkstra, J.

Milnor, Tilla Klotz. *Intrinsic curvature of the induced metric on harmonically immersed surfaces*, 549.

Milovanović, Gradimir V. *An extremal problem for polynomials with nonnegative coefficients*, 423.

Moeller, James W. *The factorization of a linear conjugate symmetric involution in Hilbert space*, 269.

Moh, T. T. *Set-theoretic complete intersections*, 217.

Mohr, Jeanleah. See Jockusch, Carl G., Jr.

Morita, Shigeyuki. See Matsumoto, Shigenori.

Nagaraj, B. R. *A characterization in the space of convolution operators*, 396.

Newcomb, Richard. See Crandall, Michael G.

Noell, Alan V. *Analyticity in the boundary of a pseudoconvex domain*, 450.

Olsen, Gunnar. See Lima, Ásvald.

Parameshwara Bhatta, S. See Malliah, Chinthayamma.

Parks, Alan E. *A group-theoretic characterization of M-groups*, 209.

Pawlikowski, J. See Cichoń, J.

Pflug, P. See Mazur, T.

Puri, Sangita. See Singh, Ram.

Raphael, Marc. *Quasisimilar operators in the commutant of a cyclic subnormal operator*, 265.

Reed, G. M. See Collins, P. J.

Roberts, Paul C. *A prime ideal in a polynomial ring whose symbolic blow-up is not Noetherian*, 589.

Rodin, Burton. *Conformal mapping of regions bounded by curvilinear polygons*, 297.

Roscoe, A. W. See Collins, P. J.

Rubel, Lee A. and Singer, Michael F. *A differentially algebraic elimination theorem with application to analog computability in the calculus of variations*, 653.

Rubinstein, J. H. See Vannini, W.

Rudin, M. E. See Collins, P. J.

Rudin, Walter. See Ahern, Patrick.

Sakai, Kazu-Hiro. *Periodic points of positively expansive maps*, 531.

Schechtman, Gideon. *Fine embeddings of finite dimensional subspaces of L_p, 1 ≤ p < 2, into l_1^n*, 617.

Schober, G. See Leung, Y. J.

Schulte, Thomas. See Moore, John Douglas.

Shiohama, Katsuhiro. *Total curvatures and minimal areas of complete open surfaces*, 310.

Simon, B. See Gesztesy, F.

Singer, Michael F. See Rubel, Lee A.

Singh, Surjeet. See Gupta, R. N.

Skwarczyński, M. See Mazur, T.

Smith, Howard. *The lower central series in some groups with the subnormal join property*, 585.

Srivastava, J. B. See Sharman, R. K.

Stelzer, J. *A cancellation criterion for finite-rank torsion-free abelian groups*, 363.

Taylor, J. C. See Koranyi, A.

Thaller, B. See Gesztesy, F.

Tingley, D. W. See Borwein, J. M.

Tischler, D. *Manifolds M^n of rank n − 1*, 158.

Todorov, G. See Iusa, K.

Toth, Gabor. *On nonrigidity of harmonic maps into spheres*, 711.

Troyanski, S. See Godefroy, G.

Tsukada, Makoto. *The strong limit of von Neumann subalgebras with conditional expectations*, 259.

Villani, Alfonso. *Functions with a dense set of proper local maximum points*, 353.
Walker, James W.  See Edelman, Paul H.
Walter, E. L.  See Perko, L. M.
Wei, S. Walter.  See Howard, Ralph.
Weiss, Benjamin.  See Bergelson, Vitaly.
Whitfield, J.  See Godefroy, G.
Wong, Pak-Ken.  Arens product and the algebra of double multipliers, 441.
Wulbert, Daniel.  See McCullough, Scott.
Yang, Kichoon.  Homogeneous minimal surfaces in Euclidean spheres with flat normal connections, 119.
Yatracos, Yannis G.  On the existence of uniformly consistent estimates, 479.
Young, Eutiquio C.  On integral inequalities of Gronwall-Bellman type, 636.
Zizler, V.  See Godefroy, G.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 11 (8½" × 11") pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. The 1980 Mathematics Subject Classification with instructions for its use can be found in the 1978 Subject Index to Mathematical Reviews.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $50.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author’s paper for publication dependent upon payment of the page charge.

BACKLOG. 150 pages. Papers currently being received by the editors will be published in 9–11 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of $1.00 plus $0.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)
Thomas J. Jech, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

COMBINATORICS AND DISCRETE MATHEMATICS (05 15)
Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

COMBINATORICS, COMPUTER SCIENCE AND INFORMATION THEORY (05 68 94)
Andrew Odlyzko, Room 2C-370, Bell Laboratories, Murray Hill, New Jersey 07974

COMMUTATIVE ALGEBRA (06 12 13 14 15 18)
William C. Waterhouse, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

GENERAL ALGEBRA (16 17 18 08)
Donald Passman, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53706

GROUP THEORY (20)
Bhama Srinivasan, Department of Mathematics, University of Illinois, Chicago, Illinois 60680

ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)
Haynes R. Miller, Department of Mathematics, University of Washington, Seattle, Washington 98195

REAL VARIABLES (26 28 40)
J. Jerry Uhl, Jr., Department of Mathematics, University of Illinois, 1409 West Green Street, Urbana, Illinois 61801

COMPLEX VARIABLES (30 31 32)
Irwin Kra, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794

NUMBER THEORY (10)
Larry J. Goldstein, 2 Redgate Court, Silver Spring, Maryland 20904

ORDINARY Differential EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)
George R. Sell, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

PARTIAL Differential EQUATIONS (35 49)
Walter Littman, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

GENERAL ANALYSIS (41 42 43 44 45)
Richard R. Goldberg, Department of Mathematics, Vanderbilt University, Nashville, Tennessee 37235

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)
John B. Conway, Department of Mathematics, Indiana University, Bloomington, Indiana 47405

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)
William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)
Paul S. Muhly, Department of Mathematics, University of Iowa, Iowa City, Iowa 52242

LIE GROUPS AND GEOMETRY (22 51 53)
David G. Ebin, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794-3651

GENERAL TOPOLOGY (54)
Dennis Burke, Department of Mathematics, Miami University of Ohio, Oxford, Ohio 45056
Doug W. Curtis, Department of Mathematics, Louisiana State University, Baton Rouge, Louisiana 70803

PROBABILITY AND CERTAIN OTHER FIELDS (60--99 inclusive)
Bert E. Fristedt, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455
Daniel W. Stroock, Department of Mathematics, Room 2-272, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139

All other communications should be addressed to the Managing Editor, J. Jerry Uhl, Jr., at the above address.

CONTENTS—Continued from back cover

Minimum eigenvalues for positive, Rockland operators. By A. Hulanicki, J. W. Jenkins and J. Ludwig ................................................................. 718
Recognizing $\sigma$-manifolds. By James P. Henderson ........................................ 721
Isolated chain recurrent points for one-dimensional maps. By Louis Block and John E. Franke ................................................................. 728
Dense periodicity on the interval. By Marcy Barge and Joe Martin ......................... 731

SHORTER NOTES

On the Radon-Nikodým property in Banach lattices. By Elias Saab .......................... 736
Index to Volume 94 ......................................................................................... 738
CONTENTS
Vol. 94, No. 4 August 1985 Whole No. 314

A. ALGEBRA AND NUMBER THEORY
Left absolutely flat generalized inverse semigroups. By SYDNEY BULMAN-FLEMING and KENNETH MCDOWELL .......................................................... 553
On a theorem of Cohen and Montgomery. By MICHEL VAN DEN BERGH ......................................................... 562
Decomposition of graded modules. By CARY WEBB .......................................................... 565
On trivial intersection of cyclic Sylow subgroups. By HARVEY I. BLAU .......................................................... 572
The catenarian property of power series rings over a Prüfer domain. By J. T. ARNOLD ......................................................... 577
Hermitian forms and the fibration of spheres. By PAUL BINDING .......................................................... 581
The lower central series in some groups with the subnormal join property. By HOWARD SMITH .......................................................... 585
A prime ideal in a polynomial ring whose symbolic blow-up is not Noetherian. By PAUL C. ROBERTS .......................................................... 589
Test modules for projectivity. By P. JOTHILINGAM .......................................................... 593
Brauer group of fibrations and symmetric products of curves. By GEORGES ELENCAWIJG .......................................................... 597
A formal analogue of Hilbert’s Theorem 90. By R. COLEMAN .......................................................... 603
Consecutive primitive roots in a finite field. II. By STEPHEN D. COHEN .......................................................... 605

B. ANALYSIS
On the well-posedness of a $C^\infty$ Goursat problem for a partial differential operator of order greater than two. By JAIME CARVALHO E SILVA .......................................................... 612
Fine embeddings of finite dimensional subspaces of $L^p, 1 < p < 2$, into $l^q$. By GIDEON SCHECHTMAN .......................................................... 617
A characterization of the invariant subspaces of direct sums of strictly cyclic algebras. By ERIK ROSENTHAL .......................................................... 624
Eventual disconjugacy of a linear differential equation. II. By WILLIAM F. TRENCH .......................................................... 629
On integral inequalities of Gronwall-Bellman type. By EUTIQUIO C. YOUNG .......................................................... 636
Convex functions and Fourier coefficients. By HANN-TZONG WANG .......................................................... 641
Three-space problem for locally uniformly rotund renormings of Banach spaces. By G. GODEFROY, S. TROYANSKI, J. WHITFIELD and V. ZIZLER .......................................................... 647
A differentially algebraic elimination theorem with application to analog computability in the calculus of variations. By LEE A. RUBEL and MICHAEL F. SINGER .......................................................... 653
High order coefficient estimates in the class $\Sigma$. By Y. J. LEUNG and G. SCHOBER .......................................................... 659
The asymptotic-norming and the Radon-Nikodym properties are equivalent in separable Banach spaces. By N. GHOUSsoUB and B. MAUREY .......................................................... 665
On the Riesz-transforms along surfaces in $R^3$. By A. EL KOHEN .......................................................... 672
Parametrizations boreliennes. By GABRIEL DEBS .......................................................... 675
The atomic decomposition of Besov-Bergman-Lipschitz spaces. By GERALDO SOARES DE SOUZA .......................................................... 682
The topological spaces that support Haar systems. By SCOTT MCCULLOUGH and DANIEL WULBERT .......................................................... 687

D. GEOMETRY
A characterization theorem for bounded starshaped sets in the plane. By MARYLIN BREEN .......................................................... 693
Inequalities relating sectional curvatures of a submanifold to the size of its second fundamental form and applications to pinching theorems for submanifolds. By RALPH HOWARD and S. WALTER WEI .......................................................... 699

G. TOPOLOGY
Function spaces of low Borel complexity. By J. DUKSTRA, T. GRILLIOT, D. LUTZER and J. VAN MILL .......................................................... 703
On nonrigidity of harmonic maps into spheres. By GABOR TOOTH .......................................................... 711
The Hurewicz image of Ray’s elements in $MSp^*$. By STANLEY O. KOCHMAN .......................................................... 715
