Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 14 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author's name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 93–95 (1985) are $335.00 list; $268 institutional member; $201 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $10.00; subscribers in India must pay a postage surcharge of $20.00. Combination paper and microfiche subscription prices are $446.00 list; $357.00 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–89, $110.00 list, $88.00 institutional; for Volumes 90–92, $125.00 list; $100.00 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

Printed in the United States of America
The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

Information on Copying and Reprinting can be found at the back of this journal.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 11 (8½” × 11”) pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $50.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author’s paper for publication dependent upon payment of the page charge.

BACKLOG. 150 pages. Papers currently being received by the editors will be published in 9–11 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification and describe the fields being handled by the editor.

**LOGIC AND FOUNDATIONS (03 04)**
Thomas J. Jech, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

**COMBINATORICS AND DISCRETE MATHEMATICS (05 15)**
Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

**COMBINATORICS, COMPUTER SCIENCE AND INFORMATION THEORY (05 68 94)**
Andrew Odlyzko, Room 2C-370, Bell Laboratories, Murray Hill, New Jersey 07974

**COMMUTATIVE ALGEBRA (06 12 13 14 15 18)**
William C. Waterhouse, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

**GENERAL ALGEBRA (16 17 18 08)**
Donald Passman, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53706

**GROUP THEORY (20)**
Bhama Srinivasan, Department of Mathematics, University of Illinois, Chicago, Illinois 60680

**ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)**
Haynes R. Miller, Department of Mathematics, University of Notre Dame, Notre Dame, Indiana 46556

**REAL VARIABLES (26 28 40)**
J. Jerry Uhl, Jr., Department of Mathematics, University of Illinois, 1409 West Green Street, Urbana, Illinois 61801

**COMPLEX VARIABLES (30 31 32)**
Irwin Kra, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794

**NUMBER THEORY (10)**
Larry J. Goldstein, 2 Redgate Court, Silver Spring, Maryland 20904

**ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)**
George R. Sell, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

**PARTIAL DIFFERENTIAL EQUATIONS (35 49)**
Walter Littman, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

**FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)**
John B. Conway, Department of Mathematics, Indiana University, Bloomington, Indiana 47405

**FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)**
William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

**COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)**
Paul S. Muhly, Department of Mathematics, University of Iowa, Iowa City, Iowa 52242

**LIE GROUPS AND GEOMETRY (22 51 53)**
David G. Ebin, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794-3651

**GENERAL TOPOLOGY (54)**
Dennis Burke, Department of Mathematics, Miami University of Ohio, Oxford, Ohio 45056
Doug W. Curtis, Department of Mathematics, Louisiana State University, Baton Rouge, Louisiana 70803

**PROBABILITY AND CERTAIN OTHER FIELDS (60–99 inclusive)**
Bert E. Fristedt, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455
Daniel W. Stroock, Department of Mathematics, Room 2-272, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139

All other communications should be addressed to the Managing Editor, J. Jerry Uhl, Jr., at the above address.

ABCDEFHGIJ-AMS-8987654
CONTENTS—Continued from back cover

Orbits of higher-dimensional hereditarily indecomposable continua. By JAMES T. ROGERS, Jr. 483
A characterization of closed images of metric spaces. By L. FOGED 487
Sets of recurrent points of continuous maps of the interval. By XIONG JINCHENG 491
Riemannian foliations of the rank one symmetric spaces. By RICHARD H. ESCOBALES, JR. 495
Inverse systems of absolute retracts and almost continuity. By VLADIMIR N. AKIS 499

SHORTER NOTES

A formally normal operator having no normal extension. By KONRAD SCHMÜDGEN 503
CONTENTS

Vol. 95, No. 3  
November 1985  
Whole No. 317

A. ALGEBRA AND NUMBER THEORY

A structure theorem for the polars of unitarily invariant norms. By Govind S. Mudholkar and Marshall Freimer 331
Monic polynomials and generating ideals efficiently. By Budh Nashier 338
Stationary points of plane forms. By Susan Jane Colley 341
On G-systems and G-graded rings. By P. Grzeszczuk 348
A remark on the structure of absolute Galois groups. By Tilmann Würfel 353
Positive definite bounded matrices and a characterization of amenable groups. By Marek Bożejko 357
The potential J-relation and amalgamation bases for finite semigroups. By T. E. Hall and Mohan S. Putcha 361
Some modular identities of Ramanujan useful in approximating π. By Jon Borwein 365
Exponential sums and forms for varieties over finite fields. By Richard G. Sarkisian 372

B. ANALYSIS

On some properties of the Banach algebras \( A_p(G) \) for locally compact groups. By Edmond E. Granirer 375
Coincidence sets in the obstacle problem for the p-harmonic operator. By Shigeru Sakanaguchi 382
Weighted norm inequalities for certain integral operators. II. By H. P. Heinig 387
A small boundary for \( H^\infty \) on a strictly pseudoconvex domain. By Antonella Cupillari 396
A note on minimal covers for sofic systems. By Mike Boyle, Bruce Kitchens and Brian Marcus 403
On the spectra of \( C_1 \)-contractions. By H. Bercovici and L. Kérchy 412
A Hörmander type criterion for quasi-radial Fourier multipliers. By Henry Dappa and Hajo Luers 419
Monotone \( L_1 \)-approximation on the unit \( n \)-cube. By Richard B. Darst and Robert Huotari 425
Weak spectral theory. By M. W. Wong 429
Structure of the efficient point set. By Dinh The Luc 433
A nonlinear boundary problem. By John R. Hatcher 441
Minimal projections and absolute projection constants for regular polyhedral spaces. By Bruce L. Chalmers and Boris Shekhtman 449

C. APPLIED MATHEMATICS

D. GEOMETRY

Embedded minimal surfaces in 3-manifolds with positive scalar curvature. By J. H. Rubinstein 458
Fold singularities in pseudo Riemannian geodesic tubes. By Marek Kossowski 463

F. STATISTICS AND PROBABILITY

Weak convergence of the empirical characteristic function. By J. E. Yukich 470
Continuous functions on the space of probabilities. By S. C. Bagchi and B. V. Rao 474

G. TOPOLOGY

Open and monotone fixed point free maps on uniquely arcwise connected continua. By Lee Mohler and Lex G. Oversteegen 476

(Continued on inside back cover)
